Illicit drugs: metropolitan France: transshipment point for South American cocaine, Southwest Asian heroin, and European synthetics

French Guiana: small amount of marijuana grown for local consumption; minor transshipment point to Europe

Martinique: transshipment point for cocaine and marijuana bound for the US and Europe

FRENCH POLYNESIA

INTRODUCTION

Background: The French annexed various Polynesian island groups during the 19th century. In September 1995, France stirred up widespread protests by resuming nuclear testing on the Mururoa atoll after a three-year moratorium. The tests were halted in January 1996. In recent years, French Polynesia's autonomy has been considerably expanded.

Government—note: under certain acts of France, French Polynesia has acquired autonomy in all areas except those relating to police and justice, monetary policy, tertiary education, immigration, and defense and foreign affairs; the duties of its president are fashioned after those of the French prime minister

ECONOMY

Economy—overview: Since 1962, when France stationed military personnel in the region, French Polynesia has changed from a subsistence agricultural economy to one in which a high proportion of the work force is either employed by the

military or supports the tourist industry. With the halt of French nuclear testing in 1996, the military contribution to the economy fell sharply. Tourism accounts for about one-fourth of GDP and is a primary source of hard currency earnings. Other sources of income are handicrafts, public works projects, aquaculture, pearl farming and deep-sea commercial fishing. The small manufacturing sector primarily processes agricultural products. The territory benefits substantially from development agreements with France aimed principally at creating new businesses and strengthening social services.

FRENCH SOUTHERN AND ANTARCTIC LANDS

INTRODUCTION

Background: In February 2007, the Iles Eparses became an integral part of the French Southern and Antarctic Lands (TAAF). The Southern Lands are now divided into five administrative districts, two of which are archipelagos, Iles Crozet and Iles Kerguelen; the third is a district composed of two volcanic islands, Ile Saint-Paul and Ile Amsterdam; the fourth, Iles Eparses, consists of five scattered tropical islands around Madagascar. They contain no permanent inhabitants and are visited only by researchers studying the native fauna, scientists at the various scientific stations, fishermen, and military personnel. The fifth district is the Antarctic portion, which consists of "Adelie Land," a thin slice of the Antarctic continent discovered and claimed by the French in 1840.

Ile Amsterdam: Discovered but not named in 1522 by the Spanish, the island subsequently

received the appellation of Nieuw Amsterdam from a Dutchman; it was claimed by France in 1843. A short-lived attempt at cattle farming began in 1871. A French meteorological station established on the island in 1949 is still in use.

Ile Saint Paul: Claimed by France since 1893, the island was a fishing industry center from 1843 to 1914. In 1928, a spiny lobster cannery was established, but when the company went bankrupt in 1931, seven workers were abandoned. Only two survived until 1934 when rescue finally arrived.

Iles Crozet: A large archipelago formed from the Crozet Plateau, Iles Crozet is divided into two main groups: L'Occidental (the West), which includes Ile aux Cochons, Ilots des Apotres, Ile des Pingouins, and the reefs Brisants de l'Heroine; and L'Oriental (the East), which includes Ile d'Est and Ile de la Possession (the largest island of the Crozets). Discovered and claimed by France in

1772, the islands were used for seal hunting and as a base for whaling. Originally administered as a dependency of Madagascar, they became part of the TA AF in 1955.

Iles Kerguelen: This island group, discovered in 1772, is made up of one large island (Ile Kerguelen) and about 300 smaller islands. A permanent group of 50 to 100 scientists resides at the main base at Port-aux-Francais.

Adelie Land: The only non-insular district of the TAAF is the Antarctic claim known as "Adelie Land." The US Government does not recognize it as a French dependency.

Bassas da India: A French possession since 1897, this atoll is a volcanic rock surrounded by reefs and is awash at high tide.

Europa Island: This heavily wooded island has been a French possession since 1897; it is the site of a small military garrison that staffs a weather station.

Glorioso Islands: A French possession since 1892, the Glorioso Islands are composed of two lushly vegetated coral islands (Ile Glorieuse and Ile du Lys) and three rock islets. A military garrison operates a weather and radio station on Ile Glorieuse.

Juan de Nova Island: Named after a famous 15th century Spanish navigator and explorer, the island has been a French possession since 1897. It has been exploited for its guano and phosphate. Presently a small military garrison oversees a meteorological station.

Tromelin Island: First explored by the French in 1776, the island came under the jurisdiction of Reunion in 1814. At present, it serves as a sea turtle sanctuary and is the site of an important meteorological station.

GEOGRAPHY

Location: southeast and east of Africa, islands in the southern Indian Ocean, some near Madagascar and others about equidistant between Africa, Antarctica, and Australia; note—French Southern and Antarctic Lands include Ile Amsterdam, Ile Saint-Paul, Iles Crozet, Iles Kerguelen, Bassas da India, Europa Island, Glorioso Islands, Juan de Nova Island, and Tromelin Island in the southern Indian Ocean, along with the French-claimed sector of Antarctica, "Adelie Land"; the US does not recognize the French claim to "Adelie Land"

exclusive economic zone: 200 nm from Iles Kerguelen and Iles Eparses (does not include the rest of French Southern and Antarctic Lands); Juan de Nova Island and Tromelin Island claim a continental shelf of 200-m depth or to the depth of exploitation

Climate: Ile Amsterdam et Ile Saint-Paul: oceanic with persistent westerly winds and high humidity
Iles Crozet: windy, cold, wet, and cloudy
Iles Kerguelen: oceanic, cold, overcast, windy
Iles Eparses: tropical

Terrain: Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul): a volcanic island with steep coastal cliffs; the center floor of the volcano is a large plateau

Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul): triangular in shape, the island is the top of a volcano, rocky with steep cliffs on the eastern side; has active thermal springs
Iles Crozet: a large archipelago formed from the Crozet Plateau is divided into two groups of islands

Iles Kerguelen: the interior of the large island of Ile Kerguelen is composed of rugged terrain of high mountains, hills, valleys, and plains with a number of peninsulas stretching off its coasts
Bassas da India (Iles Eparses): atoll, awash at high tide; shallow (15 m) lagoon
Europa Island, Glorioso Islands, Juan de Nova Island: low, flat, and sandy
Tromelin Island (Iles Eparses): low, flat, sandy; likely volcanic seamount

Elevation extremes: lowest point: Indian Ocean 0 m

highest point: Mont de la Dives on Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul) 867 m; unnamed location on Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul) 272 m; Pic Marion-Dufresne in Iles Crozet 1,090 m; Mont Ross in Iles Kerguelen 1,850 m; unnamed location on Bassas da India (Iles Eparses) 2.4 m; unnamed location on Europa Island (Iles Eparses) 24 m; unnamed location on Glorioso Islands (Iles Eparses) 12 m; unnamed location on Juan de Nova Island (Iles Eparses) 10 m; unnamed location on Tromelin Island (Iles Eparses) 7 m

Natural resources: fish, crayfish

note: Glorioso Islands and Tromelin Island (Iles Eparses) have guano, phosphates, and coconuts

Land use: Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul)—100% trees, grasses, ferns, and moss; Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul)—100% grass, ferns, and moss; Iles Crozet—100% tussock grass, heath, and fern; Iles Kerguelen—100% tussock grass and Kerguelen cabbage; Bassas da India (Iles Eparses)—100% rock, coral reef, and sand; Europa Island (Iles Eparses)—100% mangrove swamp and dry woodlands; Glorioso Islands (Iles Eparses)—100% lush vegetation and coconut palms; Juan de Nova Island (Iles Eparses)—90% forest, 10% other; Tromelin Island (Iles Eparses)—100% grasses and scattered brush (2011)

Irrigated land: 0 sq km (2011)

Natural hazards: Ile Amsterdam and Ile Saint-Paul are inactive volcanoes; Iles Eparses subject to periodic cyclones; Bassas da India is a maritime hazard since it is under water for a period of three hours prior to and following the high tide and surrounded by reefs

volcanism: Reunion Island—Piton de la Fournaise (elev. 2,632 m), which has erupted many times in recent years including 2010, is one of the world's most active volcanoes; although rare, eruptions outside the volcano's caldera could threaten nearby cities

Environment—current issues: introduction of foreign species on Iles Crozet has caused severe damage to the original ecosystem; overfishing of Patagonian toothfish around Iles Crozet and Iles Kerguelen

Geography—note: islands component is widely scattered across remote locations in the southern Indian Ocean

Bassas da India (Iles Eparses): the atoll is a circular reef that sits atop a long-extinct, submerged volcano

Europa Island and Juan de Nova Island (Iles Eparses): wildlife sanctuary for seabirds and sea turtles

Glorioso Island (Iles Eparses): the islands and rocks are surrounded by an extensive reef system

Tromelin Island (Iles Eparses): climatologically important location for forecasting cyclones in the western Indian Ocean; wildlife sanctuary (seabirds, tortoises)

PEOPLE AND SOCIETY

Population: no indigenous inhabitants

Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul): has no permanent residents but has a meteorological station

Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul): is uninhabited but is frequently visited by fishermen and has a scientific research cabin for short stays

Iles Crozet: are uninhabited except for 18 to 30 people staffing the Alfred Faure research station on Ile del la Possession

Iles Kerguelen: 50 to 100 scientists are located at the main base at Port-aux-Francais on Ile Kerguelen

Bassas da India (Iles Eparses): uninhabitable
Europa Island, Glorioso Islands, Juan de Nova Island (Iles Eparses): a small French military garrison and a few meteorologists on each possession; visited by scientists
Tromelin Island (Iles Eparses): uninhabited, except for visits by scientists

GOVERNMENT

TRANSNATIONAL ISSUES

Disputes—international: French claim to "Adelie Land" in Antarctica is not recognized by the US
Bassas da India, Europa Island, Glorioso Islands, Juan de Nova Island (Iles Eparses): claimed by Madagascar; the vegetated drying cays of Banc du Geyser, which were claimed by Madagascar in 1976, also fall within the EEZ claims of the Comoros and France (Glorioso Islands)
Tromelin Island (Iles Eparses): claimed by Mauritius

INTRODUCTION

Background: El Hadj Omar BONGO Ondimba—one of the longest-serving heads of state in the world—dominated the country's political scene for four decades (1967-2009) following independence from France in 1960. President BONGO introduced a nominal multiparty system and a new constitution in the early 1990s. However, allegations of electoral fraud during local elections in 2002-03 and the presidential elections in 2005 exposed the weaknesses of formal political structures in Gabon. Following President BONGO's death in 2009, new elections brought Ali BONGO Ondimba, son of the former president, to power. Despite constrained political conditions, Gabon's small population, abundant natural resources, and considerable foreign support have helped make it one of the more prosperous and stable African countries.

ECONOMY

Economy—overview: Gabon enjoys a per capita income four times that of most sub-Saharan African nations, but because of high income inequality, a large proportion of the population remains poor. Gabon depended on timber and manganese until oil was discovered offshore in the early 1970s. The economy was reliant on oil for about 50% of its GDP, about 70% of revenues, and 87% of goods exports for 2010, although some fields have passed their peak production. A rebound of oil prices from 1999 to 2008 helped growth, but declining production has hampered Gabon from fully realizing potential gains. Gabon signed a 14-month Stand-By Arrangement with the IMF in May 2007, and later that year issued a \$1 billion sovereign bond to buy back a sizable portion of its Paris Club debt. Gabon continues to face fluctuating prices for its oil, timber, and manganese exports. Despite the abundance of natural wealth, poor fiscal management has stifled the economy. However, President BONGO ONDIMBA has made efforts to increase transparency and is taking steps to make Gabon a more attractive investment destination to diversify the economy. BONGO ONDIMBA has attempted to boost growth by increasing government investment in human resources and infrastructure. GDP grew more than 6% per year over the 2010-12 period.

GAMBIA, THE

INTRODUCTION

Background: The Gambia gained its independence from the UK in 1965. Geographically surrounded by Senegal, it formed a short-lived federation of Senegambia between 1982 and 1989. In 1991 the two nations signed a friendship and cooperation treaty, but tensions have flared up intermittently since then. Yahya JAMMEH led a military coup in 1994 that overthrew the president and banned political activity. A new constitution and presidential elections in 1996, followed by parliamentary balloting in 1997, completed a nominal return to civilian rule. JAMMEH has been elected president in all subsequent elections including most recently in late 2011.

ECONOMY

Economy—overview: The Gambia has sparse natural resource deposits and a limited agricultural base, and relies in part on remittances from workers overseas and tourist receipts. About three-quarters of the population depends on the agricultural sector for its livelihood and the sector provides for about one-quarter of GDP. The agricultural sector has untapped potential—less than half of arable land is cultivated. Small-scale manufacturing activity features the processing of peanuts, fish, and hides. The Gambia's natural beauty and

proximity to Europe has made it one of the larger markets for tourism in West Africa, boosted by government and private sector investments in ecotourism and upscale facilities. In 2012, however, sluggish tourism led to a decline in GDP. Tourism brings in about one-fifth of GDP. Agriculture also took a hit in 2012 due to unfavorable weather patterns. The Gambia's re-export trade accounts for almost 80% of goods exports. Unemployment and underemployment rates remain high. Economic progress depends on sustained bilateral and multilateral aid, on responsible government economic management, and on continued technical assistance from multilateral and bilateral donors. International donors and lenders continue to be concerned about the quality of fiscal management and The Gambia's debt burden.

GAZA STRIP

INTRODUCTION

Background: Inhabited since at least the 15th century B.C., Gaza has been dominated by many different peoples and empires throughout its history; it was incorporated into the Ottoman Empire in the early 16th century. Gaza fell to British forces during World War I, becoming a part of the British Mandate of Palestine. Following the 1948 Arab-Israeli War, Egypt administered the newly formed Gaza Strip; it was captured by Israel in the Six-Day War with Egypt in 1967, and later transferred to the Palestinian National Authority. Under a series of agreements signed between 1994 and 1999, Israel transferred to the Palestinian Authority (PA) security and civilian responsibility for many Palestinian-populated areas of the Gaza Strip as well as the West Bank. Negotiations to determine

the permanent status of the West Bank and Gaza Strip stalled after the outbreak of an intifada in mid-2000. In early 2003, the "Quarter" of the US, EU, UN, and Russia, presented a roadmap to a final peace settlement by 2005, calling for two states—Israel and a democratic Palestine. Following Palestinian leader Yasir ARAFAT's death in late 2004 and the subsequent election of Mahmud ABBAS (head of the Fatah political party) as the PA president, Israel and the PA agreed to move the peace process forward. Israel in late 2005 unilaterally withdrew all of its settlers and soldiers and dismantled its military facilities in the Gaza Strip, but continues to control maritime, airspace, and other access. In early 2006, the Islamic Resistance Movement, HAMAS, won the Palestinian Legislative Council election and took control of the PA government. Attempts to form a unity government failed, and violent clashes between Fatah and HAMAS supporters ensued, culminating in HAMAS's violent seizure of all military and governmental institutions in the Gaza Strip. Fatah and HAMAS in early 2011 agreed to reunify the Gaza Strip and West Bank, but the factions have struggled to implement details on governance and security. Brief periods of increased violence between Israel and Palestinian militants in the Gaza Strip in 2007-08 and again in 2012, both led to Egyptian-brokered truces. The status quo remains with HAMAS in control of the Gaza Strip and the PA governing the West Bank.

ECONOMY

Economy—overview: Israeli security controls imposed since the end of the second intifada have degraded economic conditions in the Gaza Strip, the smaller of the two areas comprising the Palestinian territories. Israeli-imposed border closures, which became more restrictive after HAMAS seized control of the territory in June 2007, have resulted in high unemployment, elevated poverty rates, and a sharp contraction of the private sector that had relied primarily on export markets. The population depends on government spending—by both the Palestinian Authority and HAMAS's de facto government—and humanitarian assistance. Changes to Israeli restrictions on imports in 2010 resulted in a rebound in some economic activity, but regular exports from Gaza still are not permitted. Standard-of-living measures remain below levels seen in the mid-1990s.

GEORGIA

INTRODUCTION

Background: The region of present day Georgia contained the ancient kingdoms of Colchis and Kartli-Iberia. The area came under Roman influence in the first centuries A.D., and Christianity became the state religion in the 330s. Domination by Persians, Arabs, and Turks was followed by a Georgian golden age (11th-13th centuries) that was cut short by the Mongol invasion of 1236. Subsequently, the Ottoman and Persian empires competed for influence in the region. Georgia was absorbed into the Russian Empire in the 19th century. Independent for three years (1918-1921) following the Russian revolution, it was forcibly incorporated into the USSR in 1921 and regained its independence when the Soviet Union dissolved in 1991. Mounting public discontent over rampant corruption and ineffective government services, followed by an attempt by the incumbent Georgian Government to manipulate national legislative elections in November 2003 touched off widespread protests that led to the resignation of Eduard SHEVARDNADZE, president since 1995. In the aftermath of that popular movement, which became known as the "Rose Revolution," new elections in early 2004 swept Mikheil SAKASHVILI into power along with his United National Movement (UNM) party. Progress on market reforms and democratization has been made in the years since independence, but this progress has been complicated by Russian assistance and support to the separatist regions of Abkhazia and South Ossetia. Periodic flare-ups in tension and violence culminated in a five-day conflict in August 2008 between Russia and Georgia, including the invasion of large portions of undisputed Georgian territory. Russian troops pledged to pull back from most occupied Georgian territory, but in late August 2008 Russia

unilaterally recognized the independence of Abkhazia and South Ossetia, and Russian military forces remain in those regions. Billionaire philanthropist Bidzina IVANISHVILI's unexpected entry into politics in October 2011 brought the divided opposition together under his Georgian Dream coalition, which won a majority of seats in the October 2012 parliamentary election and removed UNM from power. A new constitution shifting many powers from the president to the prime minister and parliament, including the power to name the prime minister and government ministers, does not go into effect until after a new president is elected in the fall of 2013. Conceding defeat, SAKASHVILI named IVANISHVILI as prime minister and allowed Georgian Dream to create a new government. Tensions remain high as IVANISHVILI, SAKASHVILI, and their supporters struggle to co-exist until the end of the president's term.

ECONOMY

Economy—overview: Georgia's main economic activities include the cultivation of agricultural products such as grapes, citrus fruits, and hazelnuts; mining of manganese, copper, and gold; and output of a small industrial sector producing alcoholic and nonalcoholic beverages, metals, machinery, and chemicals. The country imports nearly all its needed supplies of natural gas and oil products. It has sizeable hydropower capacity that now provides most of its energy needs. Georgia has overcome the chronic energy shortages and gas supply interruptions of the past by renovating hydropower plants and by increasingly relying on natural gas imports from Azerbaijan instead of from Russia. Construction of the Baku-Tbilisi-Ceyhan oil pipeline, the Baku-Tbilisi-Erzurum gas pipeline, and the Kars-Akhalkalaki Railroad are part of a strategy to capitalize on Georgia's strategic location between Europe and Asia and develop its role as a transit point for gas, oil, and other goods. Georgia's economy sustained GDP growth of more than 10% in 2006-07, based on

strong inflows of foreign investment and robust government spending. However, GDP growth slowed following the August 2008 conflict with Russia, and sunk to negative 4 percent in 2009 as foreign direct investment and workers' remittances declined in the wake of the global financial crisis. The economy rebounded in 2010-12, with growth rates above 6% per year, but FDI inflows, the engine of Georgian economic growth prior to the 2008 conflict, have not recovered fully. Unemployment has also remained high at above 15%. Georgia has historically suffered from a chronic failure to collect tax revenues; however, the government, since coming to power in 2004, has simplified the tax code, improved tax administration, increased tax enforcement, and cracked down on petty corruption, leading to higher revenues. The country is pinning its hopes for renewed growth on a determined effort to continue to liberalize the economy by reducing regulation, taxes, and corruption in order to attract foreign investment; with a focus on hydropower, agriculture, tourism, and textiles production. Since 2004, the government has taken a series of actions against endemic corruption, including reform of the traffic police and implementation of a fair examination system for entering the university system. The government has received high marks from the World Bank for its anti-corruption efforts.

GERMANY

INTRODUCTION

Background: As Europe's largest economy and second most populous nation (after Russia), Germany is a key member of the continent's economic, political, and defense organizations. European power struggles immersed Germany in two devastating World Wars in the first half of the 20th century and left the country occupied by the victorious Allied powers of the US, UK, France, and the Soviet Union in 1945. With the advent of the Cold War, two German states were formed in 1949: the western Federal Republic of Germany (FRG) and the eastern German Democratic Republic (GDR). The democratic FRG embedded itself in key Western economic and security organizations, the EC, which became the EU, and NATO, while the Communist GDR was on the front line of the Soviet-led Warsaw Pact. The decline of the USSR and the end of the Cold War allowed for German unification in 1990. Since then, Germany has expended considerable funds to bring Eastern productivity and wages up to Western standards. In January 1999, Germany and 10 other EU countries introduced a common European exchange currency, the euro.

Flag description: three equal horizontal bands of black (top), red, and gold; these colors have played an important role in German history and can be traced back to the medieval banner of the Holy Roman Emperor—a black eagle with red claws and beak on a gold field

National symbol(s): golden eagle

National anthem: *name:* "Das Lied der Deutschen" (Song of the Germans)

lyrics/music: August Heinrich HOFFMANN VON FALLERSLEBEN/Franz Joseph HAYDN

note: adopted 1922; the anthem, also known as "Deutschlandlied" (Song of Germany), was originally adopted for its connection to the March 1848 liberal revolution; following appropriation by the Nazis of the first verse, specifically the phrase, "Deutschland, Deutschland ueber alles" (Germany, Germany above all) to promote nationalism, it was banned after 1945; in 1952, its third verse was adopted by West Germany as its national anthem; in 1990, it became the national anthem for the reunited Germany

country's social welfare system and necessitate structural reforms. Reforms launched by the government of Chancellor Gerhard SCHROEDER (1998-2005), deemed necessary to address chronically high unemployment and low average growth, contributed to strong growth in 2006 and 2007 and falling unemployment. These advances, as well as a government subsidized, reduced working hour scheme, help explain the relatively modest increase in unemployment during the 2008-09 recession—the deepest since World War II—and its decrease to 6.5% in 2012. GDP contracted 5.1% in 2009 but grew by 4.2% in 2010, and 3.0% in 2011, before dipping to 0.7% in 2012—a reflection of low investment spending due to crisis-induced uncertainty and the decreased demand for German exports from recession-stricken periphery countries. Stimulus and stabilization efforts initiated in 2008 and 2009 and tax cuts introduced in Chancellor Angela MERKEL's second term increased Germany's total budget deficit—including federal, state, and municipal—to 4.1% in 2010, but slower spending and higher tax revenues reduced the deficit to 0.8% in 2011. In 2012 Germany reached a budget surplus of 0.1%. A constitutional amendment approved in 2009 limits the federal government to structural deficits of no more than 0.35% of GDP per annum as of 2016 though the target was already reached in 2012. By 2014, the federal government wants to balance its budget. Following the March 2011 Fukushima nuclear disaster, Chancellor Angela Merkel announced in May 2011 that eight of the country's 17 nuclear reactors would be shut down immediately and the remaining plants would close by 2022. Germany hopes to replace nuclear power with renewable energy. Before the shutdown of the eight reactors, Germany relied on nuclear power for 23% of its electricity generating capacity and 46% of its base-load electricity production.

INTRODUCTION

Background: Formed from the merger of the British colony of the Gold Coast and the Togoland trust territory, Ghana in 1957 became the first sub-Saharan country in colonial Africa to gain its independence. Ghana endured a long series of coups before Lt. Jerry RAWLINGS took power in 1981 and banned political parties. After approving a new constitution and restoring multiparty politics in 1992, RAWLINGS won presidential elections in 1992 and 1996 but was constitutionally prevented from running for a third term in 2000. John KUFUOR succeeded him and was reelected in 2004. John Atta MILLS took over as head of state in early 2009, but he died in July 2012 and was succeeded by his vice president John Dramani MAHAMA, who subsequently won a December 2012 special presidential election.

Economy—overview: Ghana's economy has been strengthened by a quarter century of relatively sound management, a competitive business environment, and sustained reductions in poverty levels. Ghana is well endowed with natural resources and agriculture accounts for roughly one-quarter of GDP and employs more than half of the workforce, mainly small landholders. The services sector accounts for 50% of GDP. Gold and cocoa production and individual remittances are major sources of foreign exchange. Oil production at Ghana's offshore Jubilee field began in mid-December, 2010, and is expected to boost economic growth. President MAHAMA faces challenges in managing new oil revenue while maintaining fiscal discipline and resisting debt accumulation. Estimated oil reserves have jumped to almost 700 million barrels. Ghana signed a Millennium Challenge Corporation (MCC) Compact in 2006, which aims to assist in transforming Ghana's agricultural sector. Ghana opted for debt relief under the Heavily Indebted Poor Country (HIPC) program in 2002, and is also benefiting from the Multilateral Debt Relief Initiative that took effect in 2006. In 2009 Ghana signed a three-year Poverty Reduction and Growth Facility with the IMF to improve macroeconomic stability, private sector competitiveness, human resource development, and good governance and civic responsibility. Sound macro-economic management along with higher prices for oil, gold and, cocoa helped sustain high GDP growth in 2008-12.

GIBRALTAR

INTRODUCTION

Background: Strategically important, Gibraltar was reluctantly ceded to Great Britain by Spain in the 1713 Treaty of Utrecht; the British garrison was formally declared a colony in 1830. In a referendum held in 1967, Gibraltarians voted overwhelmingly to remain a British dependency. The subsequent granting of autonomy in 1969 by the UK led to Spain closing the border and severing all communication links. Between 1997 and 2002, the UK and Spain held a series of talks on establishing temporary joint sovereignty over Gibraltar. In response to these talks, the Gibraltar Government called a referendum in late 2002 in which the majority of citizens voted overwhelmingly against any sharing of sovereignty with Spain. Since late 2004, Spain, the UK, and Gibraltar have held tripartite talks with the aim of cooperatively resolving problems that affect the local population, and work continues on cooperation agreements in areas such as taxation and financial services; communications and maritime security; policy, legal and customs services; environmental protection; and education and visa services. Throughout 2009, a dispute over Gibraltar's claim to territorial waters extending out three miles gave rise to periodic nonviolent maritime confrontations between Spanish and UK naval patrols. A new noncolonial constitution came into effect in 2007, and the European Court of First Instance recognized Gibraltar's right to regulate its own tax regime in December 2008. The UK retains responsibility for defense, foreign relations, internal security, and financial stability.

ECONOMY

Economy—overview: Self-sufficient Gibraltar benefits from an extensive shipping trade, offshore banking, and its position as an international conference center. Tax rates are low to attract foreign investment. The British military presence has been sharply reduced and now contributes about 7% to the local economy, compared with 60% in 1984. The financial sector, tourism (almost 5 million visitors in 1998), gaming revenues, shipping services fees, and duties on consumer goods also generate revenue. The financial sector, tourism, and the shipping sector contribute 30%, 30%, and 25%, respectively, of GDP. Telecommunications,

e-commerce, and e-gaming account for the remaining 15%. In recent years, Gibraltar has seen major structural change from a public to a private sector economy, but changes in government spending still have a major impact on the level of employment.

GREECE

INTRODUCTION

Background: Greece achieved independence from the Ottoman Empire in 1830. During the second half of the 19th century and the first half of the 20th century, it gradually added neighboring islands and territories, most with Greek-speaking populations. In World War II, Greece was first invaded by Italy (1940) and subsequently occupied by Germany (1941-44); fighting endured in a protracted civil war between supporters of the king and other anti-Communist and Communist rebels. Following the latter's defeat in 1949, Greece joined NATO in 1952. In 1967, a group of military officers seized power, establishing a military dictatorship that suspended many political liberties and forced the king to flee the country. In 1974,

democratic elections and a referendum created a parliamentary republic and abolished the monarchy. In 1981, Greece joined the EC (now the EU); it became the 12th member of the European Economic and Monetary Union in 2001. In 2010, the prospect of a Greek default on its euro-denominated debt created severe strains within the EMU and raised the question of whether a member country might voluntarily leave the common currency or be removed.

National anthem: name: "Ymnos eis tin Eleftherian" (Hymn to Liberty)

lyrics/music: Dionysios SOLOMOS/Nikolaos MANTZAROS

note: adopted 1864; the anthem is based on a 158 verse poem by the same name, which was inspired by the Greek Revolution of 1821 against the Ottomans; Cyprus also uses "Hymn to Liberty" as its anthem

ECONOMY

Economy—overview: Greece has a capitalist economy with a public sector accounting for about 40% of GDP and with per capita GDP about two-thirds that of the leading euro-zone economies. Tourism provides 15% of GDP. Immigrants make up nearly one-fifth of the work force, mainly in agricultural and unskilled jobs. Greece is a major beneficiary of EU aid, equal to about 3.3% of annual GDP. The Greek economy grew by nearly 4% per year between 2003 and 2007, due partly to infrastructural spending related to the 2004 Athens Olympic Games, and in part to an increased availability of credit, which has sustained record levels of consumer spending. But the economy went into recession in 2009 as a result of the world financial crisis, tightening credit conditions, and Athens' failure to address a growing budget deficit. The economy contracted by 2.3% in 2009, 3.5% in 2010, 6.9% in 2011, and 6.0% in 2012. Greece violated the EU's Growth and Stability Pact budget deficit criterion of no more than 3% of GDP from 2001 to 2006, but finally met that criterion in 2007-08, before exceeding it again in 2009, with the deficit reaching 15% of GDP. Austerity measures reduced the deficit to about 8% in 2012. Deteriorating public finances, inaccurate and misreported statistics, and consistent underperformance on reforms prompted major credit rating agencies to downgrade Greece's international debt rating in late 2009, and has led the country into a financial crisis. Under intense pressure from the EU and international market participants, the government adopted a medium-term austerity program that includes cutting government spending, decreasing tax evasion, overhauling the health-care and pension systems, and reforming the labor and product markets. Athens, however, faces long-term challenges to push through unpopular reforms in the face of widespread unrest from the country's powerful labor unions and the general public. In April 2010 a leading credit agency assigned Greek debt its lowest possible credit rating; in May 2010, the International Monetary Fund and Euro-Zone governments provided Greece emergency short- and medium-term loans worth \$147 billion so that the country could make debt repayments to creditors. In exchange for the largest bailout ever assembled, the government announced combined spending cuts and tax increases totaling \$40 billion over three years, on top of the tough austerity measures already taken. Greece, however, struggled to meet 2010 targets set by the EU and the IMF, especially after Eurostat—the EU's statistical office—revised upward Greece's deficit and debt numbers for 2009 and 2010. European leaders and the IMF agreed in October 2011 to provide Athens a second bailout package of \$169 billion. The second deal however, calls for Greece's creditors to write down a significant portion of their Greek

government bond holdings. In exchange for the second loan Greece has promised to introduce an additional \$7.8 billion in austerity measures during 2013-15. However, these massive austerity cuts are lengthening Greece's economic recession and depressing tax revenues. Greece's lenders are calling on Athens to step up efforts to increase tax collection, privatize public enterprises, and rein in health spending, and are planning to give Greece more time to shore up its economy and finances. Many investors doubt that Greece can sustain fiscal efforts in the face of a bleak economic outlook, public discontent, and political instability.

TRANSNATIONAL ISSUES**Disputes—international:** Greece and Turkey continue discussions to resolve their complex maritime, air, territorial, and boundary disputes in the Aegean Sea; Greece rejects the use of the name Macedonia or Republic of Macedonia; the mass migration of unemployed Albanians still remains a problem for developed countries, chiefly Greece and Italy**Illicit drugs:** a gateway to Europe for traffickers smuggling cannabis and heroin from the Middle East and Southwest Asia to the West and precursor chemicals to the East; some South American cocaine transits or is consumed in Greece; money laundering related to drug trafficking and organized crime**GREENLAND****INTRODUCTION****Background:** Greenland, the world's largest island, is about 81% ice capped. Vikings reached the island in the 10th century from Iceland; Danish colonization began in the 18th century, and Greenland was made an integral part of Denmark in 1953. It joined the European Community (now the EU) with Denmark in 1973 but withdrew in 1985 over a dispute centered on stringent fishing quotas. Greenland was granted self-government in 1979 by the Danish parliament; the law went into effect the following year. Greenland voted in favor of increased self-rule in November 2008 and acquired greater responsibility for internal affairs when the Act on Greenland Self-Government was signed into law in June 2009. Denmark, however, continues to exercise control of Greenland's foreign affairs, security, and financial policy in consultation with Greenland's Home Rule Government.**GEOGRAPHY****Location:** Northern North America, island between the Arctic Ocean and the North Atlantic Ocean, northeast of Canada**Geographic coordinates:** 72 00 N, 40 00 W**Map references:** North America**Area:** total: 2,166,086 sq km

lyrics/music: Henrik LUND/Jonathan PETERSEN

note: adopted 1916; the government also recognizes "Nuna asiilasooq" as a secondary anthem

ECONOMY

Economy—overview: The economy remains critically dependent on exports of shrimp and fish, income from resource exploration and extraction, and on a substantial subsidy from the Danish Government. The subsidy is budgeted to be about \$650 million in 2012, approximately 56% of government revenues in 2012 for the year. The public sector, including publicly owned enterprises and the municipalities, plays the dominant role in Greenland's economy. Greenland's real GDP

contracted about 1% in 2009 as a result of the global economic slow down, but is estimated to have grown 2% in 2010 and 3% in 2011. The relative ease with which Greenland has weathered the economic crisis is due to increased hydrocarbon and mineral exploration and extraction activities, a high level of construction activity in the Nuuk area and the increasing price of fish and shrimp. During the last decade the Greenland Home Rule Government (GHRG) pursued conservative fiscal and monetary policies, but public pressure has increased for better schools, health care and retirement systems. The Greenlandic economy has benefited from increasing catches and exports of shrimp, Greenland halibut and, more recently, crabs. Due to Greenland's continued dependence on exports of fish—which accounted for 89% of exports in 2010—the economy remains very sensitive to foreign developments. International consortia are increasingly active in exploring for hydrocarbon resources off Greenland's western coast, and international studies indicate the potential for oil and gas fields in northern and northeastern Greenland. In May 2007 a US aluminum producer concluded a memorandum of understanding with the Greenland Home Rule Government to build an aluminum smelter and a power generation facility, which takes advantage of Greenland's abundant hydropower potential. Within the area of mining, olivine sand continues to be produced and gold production has resumed in south Greenland, while rare-earth and iron ore mineral projects have been proposed or planned elsewhere on the island. Tourism also offers another avenue of economic growth for Greenland, with increasing numbers of cruise lines now operating in Greenland's western and southern waters during the peak summer tourism season.

Flag description: a rectangle divided diagonally into yellow triangles (top and bottom) and green triangles (hoist side and outer side), with a red border around the flag; there are seven yellow, five-pointed stars with three centered in the top red border, three centered in the bottom red border, and one on a red disk superimposed at the center of the flag; there is also a symbolic nutmeg pod on the hoist-side triangle (Grenada is the world's second-largest producer of nutmeg, after Indonesia); the seven stars stand for the seven administrative divisions, with the central star denoting the capital, St. George; yellow represents the sun and the warmth of the people, green stands for vegetation and agriculture, and red symbolizes harmony, unity, and courage

National anthem: name: "Hail Grenada"

lyrics/music: Irva Merle BAPTISTE/Louis Arnold MASANTO

note: adopted 1974

ECONOMY

Economy—overview: Grenada relies on tourism as its main source of foreign exchange especially since the construction of an international airport in 1985. Hurricanes Ivan (2004) and Emily (2005) severely damaged the agricultural sector—particularly nutmeg and cocoa cultivation—which had been a key driver of economic growth. Grenada has rebounded from the devastating effects of the hurricanes but is now saddled with the debt burden from the rebuilding process. Public debt-to-GDP is nearly 110%, leaving the THOMAS administration limited room to engage in public investments and social spending. Strong performances in construction and manufacturing, together with the development of tourism and an offshore financial industry, have also contributed to growth in national output; however, economic growth remained stagnant in 2010-12 after a sizeable contraction in 2009, because of the global economic slow down's effects on tourism and remittances.

GUATEMALA

INTRODUCTION

Background: The Maya civilization flourished in Guatemala and surrounding regions during the first millennium A.D. After almost three centuries as a Spanish colony, Guatemala won its independence in 1821. During the second half of the 20th century, it experienced a variety of military and civilian governments, as well as a 36-year guerrilla war. In 1996, the government signed a peace agreement

formally ending the conflict, which had left more than 200,000 people dead and had created, by some estimates, some 1 million refugees. In January 2012, Guatemala assumed a nonpermanent seat on the UN Security Council for the 2012-13 term.

GEOGRAPHY

Location: Central America, bordering the North Pacific Ocean, between El Salvador and Mexico, and bordering the Gulf of Honduras (Caribbean Sea) between Honduras and Belize

Geographic coordinates: 15 30 N, 90 15 W

Map references: Central America and the Caribbean

Area: total: 108,889 sq km
country comparison to the world: 107
land: 107,159 sq km

Area—comparative: slightly smaller than Tennessee

Land boundaries: total: 1,687 km
border countries: Belize 266 km, El Salvador 203 km, Honduras 256 km, Mexico 962 km

Coastline: 400 km

Maritime claims: territorial sea: 12 nm
exclusive economic zone: 200 nm

continental shelf: 200 m depth or to the depth of exploitation

Climate: tropical; hot, humid in low lands; cooler in highlands

Terrain: mostly mountains with narrow coastal plains and rolling limestone plateau

Elevation extremes: lowest point: Pacific Ocean 0 m

highest point: Volcan Tajumulco 4,211 m
note: highest point in Central America

Natural resources: petroleum, nickel, rare woods, fish, chicle, hydropower

Land use: arable land: 13.78%
permanent crops: 8.68%
other: 77.55% (2011)

Irrigated land: 3,121 sq km (2003)

Total renewable water resources: 111.3 cu km (2011)

Freshwater withdrawal (domestic/industrial/agricultural): total: 3.46 cu km/yr (15%/31%/54%)
per capita: 259.1 cu m/yr (2006)

Natural hazards: numerous volcanoes in mountains, with occasional violent earthquakes; Caribbean coast extremely susceptible to hurricanes and other tropical storms

volcanism: significant volcanic activity in the Sierra Madre range; Santa Maria (elev. 3,772 m) has been deemed a "Decade Volcano" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to its explosive history and close proximity to human populations; Pacaya (elev. 2,552 m), which erupted in May 2010 causing an ashfall on Guatemala City and prompting evacuations, is one of the country's most active volcanoes with frequent eruptions since 1965; other historically active volcanoes include Acatenango, Almolonga, Atitlan, Fuego, and Tacana

Environment—current issues: deforestation in the Peten rainforest; soil erosion; water pollution

Environment—international agreements: party to: Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Wetlands, Whaling
signed, but not ratified: none of the selected agreements

PEOPLE AND SOCIETY

Nationality: noun: Guatemalan(s)
adjective: Guatemalan

Ethnic groups: Mestizo (mixed Amerindian-Spanish—in local Spanish called Ladino) and European 59.4%, K'iche 9.1%, Kaqchikel 8.4%, Mam 7.9%, Q'eqchi 6.3%, other Mayan 8.6%, indigenous non-Mayan 0.2%, other 0.1% (2001 census)

Languages: Spanish (official) 60%, Amerindian languages 40%

note: there are 23 officially recognized Amerindian languages, including Quiche, Cakchiquel, Kekchi, Mam, Garifuna, and Xinka

Religions: Roman Catholic, Protestant, indigenous Mayan beliefs

Demographic profile: Guatemala is a predominantly poor country that struggles in several areas of health and development, including infant, child, and maternal mortality, malnutrition, literacy, and contraceptive awareness and use. The large indigenous population is disproportionately affected. Guatemala is the most populous country in Central America and has the highest fertility rate in Latin America. It also has the highest population growth rate in Latin America, which is likely to continue in the long term because of its large reproductive-age population and high birth rate. Almost half of Guatemala's population is under age 19, making it the youngest population in Latin America. Guatemala's total fertility rate has slowly declined during the last few decades due in part to limited government-funded health programs. However, the birth rate is still more than three children per woman and is markedly higher among its rural and indigenous populations. Guatemalans have a history of emigrating legally and illegally to Mexico, the United States, and Canada because of a lack of economic opportunity, political instability, and natural disasters. Emigration, primarily to the United States,

escalated during the 1960-1996 civil war and accelerated after a peace agreement was signed. Thousands of Guatemalans who fled to Mexico returned after the war, but labor migration to southern Mexico continues.

ECONOMY

Economy—overview: Guatemala is the most populous country in Central America with a GDP per capita roughly one-half that of the average for Latin America and the Caribbean. The agricultural sector accounts for 13% of GDP and 38% of the labor force; key agricultural exports include coffee, sugar, bananas, and vegetables. The 1996 peace accords, which ended 36 years of civil war, removed a major obstacle to foreign investment, and since then Guatemala has pursued important reforms and macroeconomic stabilization. The Dominican Republic-Central American Free Trade Agreement (CAFTA-DR) entered into force in July 2006 spurring increased investment and diversification of exports, with the largest increases in ethanol and non-traditional agricultural exports. While CAFTA-DR has helped improve the investment climate, concerns over security, the lack of skilled workers and poor infrastructure continue to hamper foreign direct investment. The distribution of income remains highly unequal with the richest 20% of the population accounting for more than 51% of Guatemala's overall consumption. More than half of the population is below the national poverty line and 13% of the population lives in extreme poverty. Poverty among indigenous groups, which make up 38% of the population, averages 73% and extreme poverty rises to 28%. Nearly one-half of Guatemala's children under age five are chronically malnourished, one of the highest malnutrition rates in the world. Given Guatemala's large expatriate community in the United States, it is the top remittance recipient in Central America, with inflows serving as a primary source of foreign income equivalent to nearly two-fifths of exports or one-tenth of GDP. Economic growth fell in 2009 as export demand from US and other

Central American markets dropped and foreign investment slowed amid the global recession. The economy gradually recovered in 2010-12.

TRANSNATIONAL ISSUES

Disputes—international: annual ministerial meetings under the Organization of American States-initiated Agreement on the Framework for Negotiations and Confidence Building Measures continue to address Guatemalan land and maritime claims in Belize and the Caribbean Sea; Guatemala persists in its territorial claim to half of Belize, but agrees to Line of Adjacency to keep Guatemalan squatters out of Belize's forested interior; both countries agreed in April 2012 to hold simultaneous referenda, scheduled for 6 October 2013, to decide whether to refer the dispute to the ICJ for binding resolution; Mexico must deal with thousands of impoverished Guatemalans and other Central Americans who cross the porous border looking for work in Mexico and the United States

Refugees and internally displaced persons: IDPs: undetermined (more than three decades of internal conflict that ended in 1996 displaced mainly the indigenous Maya population and rural peasants; ongoing drug cartel and gang violence) (2011)

Illicit drugs: major transit country for cocaine and heroin; in 2005, cultivated 100 hectares of opium poppy after reemerging as a potential source of opium in 2004; potential production of less than 1 metric ton of pure heroin; marijuana cultivation for mostly domestic consumption; proximity to Mexico makes Guatemala a major staging area for drugs (particularly for cocaine); money laundering is a serious problem; corruption is a major problem

GUERNSEY

INTRODUCTION

Background: Guernsey and the other Channel Islands represent the last remnants of the medieval Dukedom of Normandy, which held sway in both France and England. The islands were the

only British soil occupied by German troops in World War II. Guernsey is a British crown dependency but is not part of the UK or of the European Union. However, the UK Government is constitutionally responsible for its defense and international representation.

ECONOMY

Economy—overview: Financial services—banking, fund management, insurance—account for about 23% of employment and about 55% of total income in this tiny, prosperous Channel Island economy. Tourism, manufacturing, and horticulture, mainly tomatoes and cut flowers, have been declining. Financial services, construction, retail, and the public sector have been growing. Light tax and death duties make Guernsey a popular tax haven. In January 2013, Guernsey signed a tax agreement with Jersey and the Isle of Man, in order to enable the islands' authorities to end tax avoidance and evasion. The evolving economic integration of the EU nations is changing the environment under which Guernsey operates.

GUINEA

INTRODUCTION

Background: Guinea has had a history of authoritarian rule since gaining its independence from France in 1958. Lansana CONTE came to power in 1984 when the military seized the government after the death of the first president, Sekou TOURE. Guinea did not hold democratic elections until 1993 when Gen. CONTE (head of the military government) was elected president of the civilian government. He was reelected in 1998 and again in 2003, though all the polls were marred by irregularities. History repeated itself in December 2008 when following President CONTE's death, Capt. Moussa Dadis CAMARA led a military coup, seizing power and suspending the constitution. His unwillingness to yield to domestic and international pressure to step down led to heightened political tensions that culminated in September 2009 when presidential guards opened fire on an opposition rally killing more than 150 people, and in early December 2009 when CAMARA was wounded in an assassination attempt and evacuated to Morocco and

subsequently to Burkina Faso. A transitional government led by Gen. Sekouba KONATE held democratic elections in 2010 and Alpha CONDE was elected president in the country's first free and fair elections since independence. CONDE in July 2011 survived an attack on his residence allegedly perpetrated by the military. In October 2012, he announced a cabinet reshuffle that removed three members of the military from their positions, making the current administration Guinea's first all-civilian government.

ECONOMY

Economy—overview: Guinea is a poor country that possesses major mineral, hydropower, and agricultural resources. The country has almost half of the world's bauxite reserves and significant iron ore, gold, and diamond reserves. However, Guinea has been unable to profit from this potential, as rampant corruption, dilapidated infrastructure, and political uncertainty have drained investor confidence. In the time since a 2008 coup following the death of long-term President Lansana CONTE, international donors, including the G-8, the IMF, and the World Bank, have significantly curtailed their development programs. Throughout 2009, policies of the ruling military junta severely weakened the economy. The junta leaders spent and printed money at an accelerating rate, driving inflation and debt to perilously high levels. In early 2010, the junta collapsed and was replaced by a Transition Government, which ceded power in December 2010 to the country's first-ever democratically elected president, Alpha CONDE. International assistance and investment are expected to return to Guinea, but the levels will depend upon the ability of the new government to combat corruption, reform its banking system, improve its business environment, and build infrastructure. IMF and World Bank programs will be especially critical as Guinea attempts to gain debt relief. International investors have expressed keen interest in Guinea's vast iron ore reserves, which could further propel the country's growth. The government put forward a new mining code in September 2011 that includes provisions to combat corruption, protect the environment, and review all existing mining contracts. Longer range plans to deploy broadband Internet throughout the country could spur economic growth as well.

GUINEA-BISSAU

INTRODUCTION

Background: Since independence from Portugal in 1974, Guinea-Bissau has experienced considerable political and military upheaval. In 1980, a military coup established authoritarian dictator Joao Bernardo "Nino" VIEIRA as president. Despite setting a path to a market economy and multiparty system, VIEIRA's regime was characterized by the suppression of political opposition and the purging of political rivals. Several coup attempts through the 1980s and early 1990s failed to unseat him. In 1994 VIEIRA was elected president in the country's first free elections. A military mutiny and resulting civil war in 1998 eventually led to VIEIRA's ouster in May 1999. In February 2000, a transitional government turned

over power to opposition leader Kumba YALA after he was elected president in transparent polling. In September 2003, after only three years in office, YALA was overthrown in a bloodless military coup, and businessman Henrique ROSA was sworn in as interim president. In 2005, former President VIEIRA was re-elected president pledging to pursue economic development and national reconciliation; he was assassinated in March 2009. Malam Bacai SANHA was elected in an emergency election held in June 2009, but he passed away in January 2012 from an existing illness. A military coup in April 2012 prevented Guinea-Bissau's second-round presidential election—to determine SANHA's successor—from taking place.

note: adopted 1974; a delegation from Portuguese Guinea visited China in 1963 and heard music by XIAO He; Amilcar Lopes CABRA, the leader of Guinea-Bissau's independence movement, asked the composer to create a piece that would inspire his people to struggle for independence

ECONOMY

Economy—overview: One of the poorest countries in the world, Guinea-Bissau's legal economy depends mainly on farming and fishing, but trafficking in narcotics is probably the most lucrative trade. The combination of limited economic prospects, a weak and faction-ridden government, and favorable geography have made this West African country away station for drugs bound for Europe. Cashew crops have increased remarkably in recent years; low rainfall hindered cereals and other crops in 2011. Guinea-Bissau exports fish and seafood along with small amounts of peanuts, palm kernels, and timber. Rice is the major crop and staple food. However, intermittent fighting between Senegalese-backed government troops and a military junta destroyed much of the country's infrastructure and caused widespread damage to the economy in 1998; the civil war led to a 28% drop in GDP that year, with partial recovery in 1999-2002. In December 2003, the World Bank, IMF, and UNDP were forced to step in to provide emergency budgetary support in the amount of \$107 million for 2004, representing over 80% of the total national budget. The government is successfully implementing a three-year \$33 million extended credit arrangement with the IMF that runs through 2012. In December 2010 the World Bank and IMF announced support for \$1.2 billion worth of debt relief. Guinea-Bissau made progress with debt relief in 2011 when members of the Paris Club opted to write-off much of the country's obligations.

TRANSNATIONAL ISSUES

Disputes—international: in 2006, political instability within Senegal's Casamance region resulted in thousands of Senegalese refugees, cross-border raids, and arms smuggling into Guinea-Bissau

Refugees and internally displaced persons: refugees (country of origin): 7,658 (Senegal) (2011)

Trafficking in persons: current situation: Guinea-Bissau is a country of origin and destination for children subjected to forced labor and sex trafficking; the scope of the problem of trafficking women or men for forced labor or forced prostitution is unknown; boys reportedly were transported to southern Senegal for forced manual and agricultural labor; girls may be subjected to forced domestic service and child prostitution in Senegal and Guinea; both boys and girls are forced to work as street vendors in cities in Guinea-Bissau and Senegal
 tier rating: Tier 2 Watch List—the government of Guinea-Bissau does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government acknowledged human trafficking is a problem and enacted a comprehensive anti-trafficking law in June 2011, followed by a national plan of action for implementing the law; the government facilitated the repatriation of 120 trafficking victims from Senegal and gave a small amount of funding to NGO shelters that provided victim care but did not pursue criminal action against trafficking offenders during the year (2012)

Illicit drugs: increasingly important transit country for South American cocaine enroute to Europe; enabling environment for trafficker operations thanks to pervasive corruption; archipelago-like geography around the capital facilitates drug smuggling

GUYANA

INTRODUCTION

Background: Originally a Dutch colony in the 17th century, by 1815 Guyana had become a British possession. The abolition of slavery led to black settlement of urban areas and the importation of indentured servants from India to work the sugar plantations. The resulting ethnocultural divide has persisted and has led to turbulent politics. Guyana achieved independence from the UK in 1966, and since then it has been ruled mostly by socialist-oriented governments. In 1992, Cheddi JAGAN was elected president in what is considered the country's first free and fair election since independence. After his death five years later, his wife, Janet JAGAN, became president but resigned in 1999 due to poor health. Her successor, Bharrat JAGDEO, was reelected in 2001 and again in 2006. Donald RAMOTAR was elected president in 2011.

PEOPLE AND SOCIETY

Nationality: noun: Guyanese (singular and plural)
adjective: Guyanese

Ethnic groups: East Indian 43.5%, black (African) 30.2%, mixed 16.7%, Amerindian 9.1%, other 0.5% (2002 census)

Languages: English, Amerindian dialects, Creole, Caribbean Hindustani (a dialect of Hindi), Urdu

Religions: Protestant 30.5% (Pentecostal 16.9%, Anglican 6.9%, Seventh-Day Adventist 5%, Methodist 1.7%), Hindu 28.4%, Roman Catholic 8.1%, Jehovah's Witnesses 1.1%, Muslim 7.2%, other Christian 17.7%, other 4.3%, none 4.3% (2002 census)

Demographic profile: Guyana is the only English-speaking country in South America and shares cultural and historical bonds with the Anglophone Caribbean. Guyana's two largest ethnic groups are the Afro-Guyanese (descendants of African slaves) and the Indo-Guyanese (descendants of Indian indentured laborers), which together comprise about three quarters of Guyana's population. Tensions periodically have boiled over between the two groups, which back ethnically based political parties and vote along ethnic lines. Poverty reduction has stagnated since the late 1990s. About one-third of the Guyanese population lives below the poverty line; indigenous people are disproportionately affected.

Although Guyana's literacy rate is reported to be among the highest in the Western Hemisphere, the level of functional literacy is considerably lower, which has been attributed to poor education quality, teacher training, and infrastructure. Guyana's emigration rate is among the highest in the world—more than 55% of its citizens reside abroad—and it is one of the largest recipients of remittances relative to GDP among Latin American and Caribbean counties. Although remittances are a vital source of income for most citizens, the pervasive emigration of skilled workers deprives Guyana of professionals in healthcare and other key sectors. More than 80% of Guyanese nationals with tertiary level educations have emigrated. Brain drain and the concentration of limited medical resources in Georgetown hamper Guyana's ability to meet the health needs of its predominantly rural population. Guyana has one of the highest HIV prevalence rates in the region and continues to rely on international support for its HIV treatment and prevention programs.

ECONOMY

Economy—overview: The Guyanese economy exhibited moderate economic growth in recent years and is based largely on agriculture and extractive industries. The economy is heavily dependent upon the export of six commodities—sugar, gold, bauxite, shrimp, timber, and rice—which represent nearly 60% of the country's GDP and are highly susceptible to adverse weather conditions and fluctuations in commodity prices. Guyana's entrance into

the Caricom Single Market and Economy (CSME) in January 2006 has broadened the country's export market, primarily in the raw materials sector. Guyana has experienced positive growth almost every year over the past decade. Inflation has been kept under control. Recent years have seen the government's stock of debt reduced significantly—with external debt now less than half of what it was in the early 1990s. Chronic problems include a shortage of skilled labor and a deficient infrastructure. Despite recent improvements, the government is still juggling a sizable external debt against the urgent need for expanded public investment. In March 2007, the Inter-American Development Bank, Guyana's principal donor, canceled Guyana's nearly \$470 million debt, equivalent to 21% of GDP, which along with other Highly Indebted Poor Country (HIPC) debt forgiveness brought the debt-to-GDP ratio down from 183% in 2006 to 120% in 2007. Guyana became heavily indebted as a result of the inward-looking, state-led development model pursued in the 1970s and 1980s. Growth slowed in 2009 as a result of the world recession, but picked up in 2010-11, before slowing again in 2012, as a result of a second recession, this focused mainly in Europe. The slow down in the domestic economy and lower import costs has helped to narrow the country's current account deficit, despite generally lower earnings from exports.

TRANSNATIONAL ISSUES

Disputes—international: all of the area west of the Essequibo River is claimed by Venezuela preventing any discussion of a maritime boundary; Guyana has expressed its intention to join Barbados in asserting claims before UN Convention on the Law of the Sea (UNCLOS) that Trinidad and Tobago's maritime boundary with Venezuela extends into their waters; Suriname claims a triangle of land between the New and Kutari/Koetari rivers in a historic dispute over the headwaters of the Courantyne; Guyana seeks arbitration under provisions of the UNCLOS to resolve the longstanding dispute with Suriname over the axis of the territorial sea boundary in potentially oil-rich waters

Illicit drugs: transshipment point for narcotics from South America—primarily Venezuela—to Europe and the US; producer of cannabis; rising money laundering related to drug trafficking and human smuggling

HAITI

INTRODUCTION

Background: The native Taino—who inhabited the island of Hispaniola when it was discovered by Christopher COLUMBUS in 1492—were virtually annihilated by Spanish settlers within 25 years. In the early 17th century, the French established a presence on Hispaniola. In 1697, Spain ceded to the French the western third of the island, which later became Haiti. The French colony, based on forestry and sugar-related industries, became one of the wealthiest in the Caribbean but only through the heavy importation of African slaves and considerable environmental degradation. In the late 18th century, Haiti's nearly half million slaves revolted under Toussaint L'OUVERTURE. After a prolonged struggle, Haiti became the first post-colonial black-led nation in the world, declaring its independence in 1804. Currently the poorest country in the Western Hemisphere, Haiti has experienced political instability for most of its history. After an armed rebellion led to the forced resignation and exile of President Jean-Bertrand ARISTIDE in February 2004, an interim government took office to organize new elections under the auspices of the United Nations. Continued instability and technical delays prompted repeated postponements, but Haiti inaugurated a democratically elected president and parliament in May of 2006. This was followed by contested elections in 2010 that resulted in the election of Haiti's current President, Michel MARTELLY. A massive magnitude 7.0 earthquake struck Haiti in January 2010 with an epicenter about 25 km (15 mi) west of the capital, Port-au-Prince. Estimates are that over 300,000 people were killed and some 1.5 million left homeless. The earthquake was assessed as the worst in this region over the last 200 years.

ECONOMY

Economy—overview: Haiti is a free market economy that enjoys the advantages of low labor costs and tariff-free access to the US for many of its exports. Poverty, corruption, vulnerability to natural disasters, and low levels of education for much of the population are among Haiti's most serious impediments to economic growth. Haiti's economy suffered a severe setback in January 2010 when a 7.0 magnitude earthquake destroyed much of its capital city, Port-au-Prince, and neighboring areas. Currently the poorest country in the Western Hemisphere with 80% of the population living under the poverty line and 54% in abject poverty, the earthquake further inflicted \$7.8 billion in damage and caused the country's GDP to contract 5.4% in 2010. In 2011, the Haitian economy had begun recovering slowly from the effects of the earthquake. However, two hurricanes adversely affected agricultural output and the slow public capital spending negatively affected the economic recovery in 2012. GDP growth for 2012 was 2.8%, down from 5.6% in 2011. Two-fifths of all Haitians depend on the agricultural sector, mainly small-scale subsistence farming, and remain vulnerable to damage from frequent natural disasters, exacerbated by the country's widespread deforestation. US economic engagement under the Caribbean Basin Trade Preference Agreement (CBTPA) and the 2008 Haitian Hemispheric Opportunity through Partnership Encouragement (HOPE II) Act helped increase apparel exports and investment by providing duty free access to the US. Congress voted in 2010 to extend the CBTPA and HOPE II until 2020 under the Haiti Economic Lift Program (HELP) Act; the apparel sector accounts for about 90% of Haitian exports and nearly one-twentieth of GDP. Remittances are the primary source of foreign exchange, equaling 20% of GDP and representing more than five times the earnings from exports in 2012. Haiti suffers from a lack of investment, partly because of weak infrastructure such as access to electricity. In 2005, Haiti paid its arrears to the World Bank, paving the way for reengagement with the Bank.

Haiti received debt forgiveness for over \$1 billion through the Highly-Indebted Poor Country initiative in mid-2009. The remainder of its outstanding external debt was cancelled by donor countries following the 2010 earthquake, but has since risen to nearly \$1 billion. The government relies on formal international economic assistance for fiscal sustainability, with over half of its annual budget coming from outside sources. The MARTELLY administration in 2011 launched a campaign aimed at drawing foreign investment into Haiti as a means for sustainable development. To that end, the MARTELLY government in 2012 created a Commission for Commercial Code Reform, effected reforms to the justice sector, and inaugurated the Caracol industrial park in Haiti's north coast.

TRANSNATIONAL ISSUES

Disputes—international: since 2004, peacekeepers from the UN Stabilization Mission in Haiti have assisted in maintaining civil order in Haiti; the mission currently includes 6,685 military, 2,607 police, and 443 civilian personnel; despite efforts to control illegal migration, Haitians cross into the Dominican Republic and sail to neighboring countries; Haiti claims US-administered Navassa Island

Refugees and internally displaced persons:

IDPs: 357,785 (includes only IDPs from the 2010 earthquake living in camps or camp-like situations; information is lacking about IDPs living outside camps or who have left camps) (2012)

Illicit drugs: Caribbean transshipment point for cocaine enroute to the US and Europe; substantial bulk cash smuggling activity; Colombian narcotics traffickers favor Haiti for illicit financial transactions; pervasive corruption; significant consumer of cannabis

HEARD ISLAND AND MCDONALD ISLANDS

INTRODUCTION

Background: The United Kingdom transferred these uninhabited, barren, sub-Antarctic islands to Australia in 1947. Populated by large numbers of seal and bird species, the islands have been designated a nature preserve.

GEOGRAPHY

HOLY SEE (VATICAN CITY)

INTRODUCTION

Background: Popes in their secular role ruled portions of the Italian peninsula for more than a thousand years until the mid 19th century, when many of the Papal States were seized by the newly united Kingdom of Italy. In 1870, the pope's holdings were further circumscribed when Rome itself was annexed. Disputes between a series of "prisoner" popes and Italy were resolved in 1929 by three Lateran Treaties, which established the independent state of Vatican City and granted Roman Catholicism special status in Italy. In 1984, a concordat between the Holy See and Italy modified certain of the earlier treaty provisions, including the primacy of Roman Catholicism as the Italian state religion. Present concerns of the Holy See include religious freedom, threats against minority Christian communities in Africa and the Middle East, international development, interreligious dialogue and reconciliation, and the application of church doctrine in an era of rapid change and globalization. About 1.2 billion people worldwide profess the Catholic faith.

ECONOMY

Economy—overview: The Holy See is supported financially by a variety of sources, including investments, real estate income, and donations from Catholic individuals, dioceses, and institutions; these help fund the Roman Curia (Vatican bureaucracy), diplomatic missions, and media outlets. Moreover, an annual collection taken up in dioceses and from direct donations go to a non-budgetary fund, known as Peter's Pence, which is used directly by the Pope for charity, disaster relief, and aid to churches in developing nations. Donations increased between 2010 and 2011. The separate Vatican City State budget includes the Vatican museums and post office and is supported financially by the sale of stamps, coins, medals, and tourist mementos; by fees for admission to museums; and by publication sales. Its revenues increased between 2010 and 2011 because of expanded opening hours and a growing number of visitors. However, the Holy See has not escaped the financial difficulties engulfing other European countries; in 2012 it started a spending review to determine where to cut costs to reverse its 2011 budget deficit of 15 million euros. Most public expenditures go to wages and other personnel costs; the incomes and living standards of lay workers are comparable to those of counterparts who work in the city of Rome.

HONDURAS

INTRODUCTION

Background: Once part of Spain's vast empire in the New World, Honduras became an independent nation in 1821. After two and a half decades of

mostly military rule, a freely elected civilian government came to power in 1982. During the 1980s, Honduras proved a haven for anti-Sandinista contras fighting the Marxist Nicaraguan Government and an ally to Salvadoran Government forces

fighting leftist guerrillas. The country was devastated by Hurricane Mitch in 1998, which killed about 5,600 people and caused approximately \$2 billion in damage. Since then, the economy has slowly rebounded.

GEOGRAPHY

Location: Central America, bordering the Caribbean Sea, between Guatemala and Nicaragua and bordering the Gulf of Fonseca (North Pacific Ocean), between El Salvador and Nicaragua

Geographic coordinates: 15 00 N, 86 30 W

Map references: Central America and the Caribbean

Area: *total:* 112,090 sq km

Climate: subtropical in low lands, temperate in mountains

Terrain: mostly mountains in interior, narrow coastal plains

Elevation extremes: *lowest point:* Caribbean Sea 0 m
highest point: Cerro Las Minas 2,870 m

Natural resources: timber, gold, silver, copper, lead, zinc, iron ore, antimony, coal, fish, hydropower

Land use: *arable land:* 9.07%
permanent crops: 3.91%

Freshwater withdrawal (domestic/industrial/agricultural): *total:* 2.12 cu km/yr (16%/23%/61%)
per capita: 295.6 cu m/yr (2006)

Natural hazards: frequent, but generally mild, earthquakes; extremely susceptible to damaging hurricanes and floods along the Caribbean coast

Environment—current issues: urban population expanding; deforestation results from logging and the clearing of land for agricultural purposes; further land degradation and soil erosion hastened by

uncontrolled development and improper land use practices such as farming of marginal lands; mining activities polluting Lago de Yojoa (the country's largest source of fresh water), as well as several rivers and streams, with heavy metals

Environment—international agreements: party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands
signed, but not ratified: none of the selected agreements

Geography—note: has only a short Pacific coast but a long Caribbean shoreline, including the virtually uninhabited eastern Mosquito Coast

PEOPLE AND SOCIETY

Nationality: *noun:* Honduran(s)
adjective: Honduran

Ethnic groups: mestizo (mixed Amerindian and European) 90%, Amerindian 7%, black 2%, white 1%

Languages: Spanish (official), Amerindian dialects

Religions: Roman Catholic 97%, Protestant 3%

Demographic profile: Honduras is one of the poorest countries in Latin America and has the world's highest murder rate. More than half of the population lives in poverty and per capita income is one of the lowest in the region. Poverty rates are higher among rural and indigenous people and in the south, west, and along the eastern border than in the north and central areas where most of Honduras' industries and infrastructure are concentrated. The increased productivity needed to break Honduras' persistent high poverty rate depends, in part, on further improvements in educational attainment. Although primary-school enrollment is near 100%, educational quality is poor, the dropout rate and grade repetition remain high, and teacher and school accountability is low. Honduras' population growth rate has slowed since the 1990s, but it remains high at nearly 2% annually because the birth rate averages approximately three children per woman and more among rural, indigenous, and poor women. Consequently, Honduras' young adult population—ages 15 to 29—is projected to continue growing rapidly for the next three decades and then stabilize or slowly shrink. Population growth and limited job prospects outside of agriculture will continue to drive emigration. Remittances represent about a fifth of GDP.

Flag description: three equal horizontal bands of blue (top), white, and blue, with five blue, five-pointed stars arranged in an X pattern centered in the white band; the stars represent the members of the former Federal Republic of Central America—Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua; the blue bands symbolize the Pacific Ocean and the Caribbean Sea; the white band represents the land between the two bodies of water and the peace and prosperity of its people
note: similar to the flag of El Salvador, which features a round emblem encircled by the words REPUBLICA DE EL SALVADOR EN LA AMERICA CENTRAL centered in the white band; also similar to the flag of Nicaragua, which features a triangle encircled by the words REPUBLICA DE NICARAGUA on top and AMERICA CENTRAL on the bottom, centered in the white band

National symbol(s): scarlet macaw; white-tailed deer

National anthem: name: "Himno Nacional de Honduras" (National Anthem of Honduras)

lyrics/music: Augusto Constanancio COELLO/Carlos HARTLING

note: adopted 1915; the anthem's seven verses chronicle Honduran history; on official occasions, only the chorus and last verse are sung

ECONOMY

Economy—overview: Honduras, the second poorest country in Central America, suffers from extraordinarily unequal distribution of income, as well as high underemployment. While historically dependent on the export of bananas and coffee, Honduras has diversified its export base to include apparel and automobile wire harnessing. Nearly half of Honduras's economic activity is directly tied to the US, with exports to the US accounting for 30% of GDP and remittances for another 20%. The US-Central America-Dominican Republic Free Trade Agreement (CAFTA-DR) came into force in 2006 and has helped foster foreign direct investment, but physical and political insecurity, as well as crime and perceptions of corruption, may deter potential investors; about 70% of FDI is from US firms. The economy registered modest economic growth of 3.0%-4.0% from 2010 to 2012, insufficient to improve living standards for the nearly 65% of the population in poverty. An 18-month IMF Standby Arrangement expired in March 2012 and was not renewed, due to the country's growing budget deficit and weak current account performance. Public sector workers complained of not receiving their salaries in November and December 2012, and government suppliers are owed at least several hundred million dollars in unpaid contracts. The government announced in January 2013 that loss-making public enterprises will be forced to submit financial rescue plans before receiving their budget allotments for 2013.

INTRODUCTION

Background: Occupied by the UK in 1841, Hong Kong was formally ceded by China the following year; various adjacent lands were added later in the 19th century. Pursuant to an agreement signed by China and the UK on 19 December 1984, Hong Kong became the Hong Kong Special Administrative Region (SAR) of the People's Republic of China on 1 July 1997. In this agreement, China promised that, under its "one country, two systems" formula, China's socialist economic system would not be imposed on Hong Kong and that Hong Kong would enjoy a high degree of autonomy in all matters except foreign and defense affairs for the next 50 years.

Flag description: red with a stylized, white, five-petal Bauhinia flower in the center; each petal

contains a small, red, five-pointed star in its middle; the red color is the same as that on the Chinese flag and represents the motherland; the fragrant Bauhinia—developed in Hong Kong the late 19th century—has come to symbolize the region; the five stars echo those on the flag of China

National symbol(s): orchid tree flower

National anthem: note: as a Special Administrative Region of China, "Yiyongjun Jinxingqu" is the official anthem (see China)

ECONOMY

Economy—overview: Hong Kong has a free market economy, highly dependent on international trade and finance—the value of goods and services trade, including the sizable share of re-exports, is about four times GDP. Hong Kong levies excise duties on only four commodities, namely: hard alcohol, tobacco, hydrocarbon oil, and methyl alcohol. There are no quotas or dumping laws. Hong Kong's open economy left it exposed to the global economic slowdown that began in 2008. Although increasing integration with China, through trade, tourism, and financial links, helped it to make an initial recovery more quickly than many observers anticipated, it again faces a possible slow down as exports to the Euro zone and US slump. The Hong Kong government is promoting the Special Administrative Region (SAR) as the site for Chinese renminbi (RMB) internationalization. Hong Kong residents are allowed to establish RMB-denominated savings accounts; RMB-denominated corporate and Chinese government bonds have been issued in Hong Kong; and RMB trade settlement is allowed. The territory far exceeded the RMB conversion quota set by Beijing for trade settlements in 2010 due to the growth of earnings from exports to the mainland. RMB deposits grew to roughly 9.1% of total system deposits in Hong Kong by the end of 2012, an increase of 59% from the previous year. The government is pursuing efforts to introduce additional use of RMB in Hong Kong financial markets and is seeking to expand the RMB quota. The mainland has long been Hong Kong's largest trading partner, accounting for about half of Hong Kong's exports by value. Hong Kong's natural resources are limited, and food and raw materials must be imported. As a result of China's easing of travel restrictions, the number of mainland tourists to the territory has surged from 4.5 million in 2001 to 34.9 million in 2012, outnumbering visitors from all other countries combined. Hong Kong has also established itself as the premier stock market for Chinese firms seeking to list abroad. In 2012 mainland Chinese companies constituted about 46.6% of the firms listed on the Hong Kong Stock Exchange and accounted for about 57.4% of the Exchange's market capitalization. During the past decade, as Hong Kong's manufacturing industry moved to the mainland, its service industry has grown rapidly. Growth slowed to 5% in 2011, and less than 2% in 2012. Credit expansion and tight housing supply conditions caused Hong Kong property prices to rise rapidly and inflation to rise 4.1% in 2012. Lower and middle income segments of the population are increasingly unable to afford adequate housing. Hong Kong continues to link its currency closely to the US dollar, maintaining an arrangement established in 1983.

HUNGARY

INTRODUCTION

Background: Hungary became a Christian kingdom in A.D. 1000 and for many centuries served as a bulwark against Ottoman Turkish expansion in Europe. The kingdom eventually became part of the polyglot Austro-Hungarian Empire, which collapsed during World War I. The country fell under Communist rule following World War II. In 1956, a revolt and an announced withdrawal

from the Warsaw Pact were met with a massive military intervention by Moscow. Under the leadership of Janos KADAR in 1968, Hungary began liberalizing its economy, introducing so-called "Goulash Communism." Hungary held its first multiparty elections in 1990 and initiated a free market economy. It joined NATO in 1999 and the EU five years later. In 2011, Hungary assumed the six-month rotating presidency of the EU for the first time.

Flag description: three equal horizontal bands of red (top), white, and green; the flag dates to the national movement of the 18th and 19th centuries, and fuses the medieval colors of the Hungarian coat of arms with the revolutionary tricolor form of the French flag; folklore attributes virtues to the colors: red for strength, white for faithfulness, and green for hope; alternatively, the red is seen as being for the blood spilled in defense of the land, white for freedom, and green for the pasturelands that make up so much of the country

National symbol(s): Holy Crown of Hungary (Crown of Saint Stephen); turul (falcon)

National anthem: name: "Himnusz" (Hymn) lyrics/music: Ferenc KOLCSEY/Ferenc ERKEL note: adopted 1844

ECONOMY

Economy—overview: Hungary has made the transition from a centrally planned to a market economy, with a per capita income nearly two-thirds that of the EU-27 average. The private sector accounts for more than 80% of GDP. Foreign ownership of and investment in Hungarian firms are widespread, with cumulative foreign direct investment worth more than \$70 billion. In late 2008, Hungary's impending inability to service its short-term debt—brought on by the global financial crisis—led Budapest to obtain an IMF/EU/World Bank-arranged financial assistance package worth over \$25 billion. The global economic downturn, declining exports, and low domestic consumption and fixed asset accumulation, dampened by government austerity measures, resulted in an economic contraction of 6.8% in 2009. In 2010 the new government implemented a number of changes including cutting business and personal income taxes, but imposed "crisis taxes" on financial institutions, energy and telecom companies, and retailers. The IMF/EU bail-out program lapsed at the end of the year and was replaced by Post Program Monitoring and Article IV Consultations on overall economic and fiscal processes. The economy began to recover in 2010 with a big boost from exports, especially to Germany, and achieved growth of approximately 1.7% in 2011. At the end of 2011 the government turned to the IMF and the EU to obtain financial backstop to support its efforts to refinance foreign currency debt and bond obligations in 2012 and beyond, but Budapest's rejection of EU and IMF economic policy recommendations led to a breakdown in talks with the lenders in late 2012. Since joining the EU in 2004, Hungary has been subject to the European Commission's Excessive Deficit Procedure; Brussels has requested that the government outline measures to sustainably reduce the budget deficit to under 3% of GDP. Ongoing economic weakness in Western Europe as well as lack of domestic investment and demand caused a GDP to fall 1.7% in 2012. Unemployment remained high, at more than 11%.

TRANSNATIONAL ISSUES

Disputes—international: bilateral government, legal, technical and economic working group negotiations continue in 2006 with Slovakia over Hungary's failure to complete its portion of the Gabčíkovo-Nagymaros hydroelectric dam project along the Danube; as a member state that forms part of the EU's external border, Hungary has implemented the strict Schengen border rules

Illicit drugs: transshipment point for Southwest Asian heroin and cannabis and for South American cocaine destined for Western Europe; limited producer of precursor chemicals, particularly for amphetamine and methamphetamine; efforts to counter money laundering, related to organized crime and drug trafficking are improving but remain vulnerable; significant consumer of ecstasy

ICELAND

INTRODUCTION

Background: Settled by Norwegian and Celtic (Scottish and Irish) immigrants during the late 9th and 10th centuries A.D., Iceland boasts the world's oldest functioning legislative assembly, the Althing, established in 930. Independent for over 300 years, Iceland was subsequently ruled by Norway and Denmark. Fallout from the Askja volcano of 1875 devastated the Icelandic economy and caused widespread famine. Over the next quarter century, 20% of the island's population emigrated, mostly to Canada and the US. Denmark granted limited home rule in 1874 and complete independence in 1944. The second half of the 20th century saw substantial economic growth driven primarily by the fishing industry. The economy diversified greatly after the country joined the European Economic Area in 1994, but Iceland was especially hard hit by the global financial crisis in the years following 2008. Literacy, longevity, and social cohesion are first rate by world standards.

GEOGRAPHY

Location: Northern Europe; island between the Greenland Sea and the North Atlantic Ocean, northwest of the United Kingdom

Geographic coordinates: 65 00 N, 18 00 W

Map references: Europe

Area: total: 103,000 sq km
country comparison to the world: 108
land: 100,250 sq km
water: 2,750 sq km

Area—comparative: slightly smaller than Kentucky

Land boundaries: 0 km

Coastline: 4,970 km

Maritime claims: territorial sea: 12 nm
exclusive economic zone: 200 nm
continental shelf: 200 nm or to the edge of the continental margin
Climate: temperate; moderated by North Atlantic Current; mild, windy winters; damp, cool summers
Terrain: mostly plateau interspersed with mountain peaks, icefields; coast deeply indented by bays and fiords

Elevation extremes: lowest point: Atlantic Ocean 0 m
highest point: Hvannadalshnukur 2,110 m (at Vatnajökull glacier)

Natural resources: fish, hydropower, geothermal power, diatomite

Land use: arable land: 1.19%

ECONOMY

Economy—overview: Iceland's Scandinavian-type social-market economy combines a capitalist

structure and freemarket principles with an extensive welfare system. Prior to the 2008 crisis, Iceland had achieved high growth, low unemployment, and a remarkably even distribution of income. The economy depends heavily on the fishing industry, which provides 40% of export earnings, more than 12% of GDP, and employs nearly 5% of the work force. It remains sensitive to declining fish stocks as well as to fluctuations in world prices for its main exports: fish and fish products, aluminum, and ferrosilicon. Iceland's economy has been diversifying into manufacturing and service industries in the last decade, particularly within the fields of software production, biotechnology, and tourism. Abundant geothermal and hydropower sources have attracted substantial foreign investment in the aluminum sector, boosted economic growth, and sparked some interest from high-tech firms looking to establish data centers using cheap green energy, although the financial crisis has put several investment projects on hold. Much of Iceland's economic growth in recent years came as the result of a boom in domestic demand following the rapid expansion of the country's financial sector. Domestic banks expanded aggressively in foreign markets, and consumers and businesses borrowed heavily in foreign currencies, following the privatization of the banking sector in the early 2000s. Worsening global financial conditions throughout 2008 resulted in a sharp depreciation of the krona vis-a-vis other major currencies. The foreign exposure of Icelandic banks, whose loans and other assets totaled more than 10 times the country's GDP, became unsustainable. Iceland's three largest banks collapsed in late 2008. The country secured over \$10 billion in loans from the IMF and other countries to stabilize its currency and financial sector, and to back government guarantees for foreign deposits in Icelandic banks. GDP fell 6.8% in 2009, and unemployment peaked at 9.4% in February 2009. GDP rose 2.7% in 2012 and unemployment declined to 5.6%. Since the collapse of Iceland's financial sector, government economic priorities have included: stabilizing the krona, implementing capital controls, reducing Iceland's high budget deficit, containing inflation, addressing high household debt, restructuring the financial sector, and diversifying the economy. Three new banks were established to take over the domestic assets of the collapsed banks. Two of them have foreign majority ownership, while the State holds a majority of the shares of the third. Iceland began making payments to the UK, the Netherlands, and other claimants in late 2011 following Iceland's Supreme Court ruling that upheld 2008 emergency legislation that gives priority to depositors for compensation from failed Icelandic banks. Iceland owes British and Dutch authorities approximately \$5.5 billion for compensating British and Dutch citizens who lost deposits in Icesave when parent bank Landsbanki failed in 2008. Iceland began accession negotiations with the EU in July 2010; however, public support has dropped substantially because of concern about losing control over fishing resources and in reaction to worries over the ongoing Eurozone crisis.

INDIA

INTRODUCTION

Background: The Indus Valley civilization, one of the world's oldest, flourished during the 3rd and 2nd millennia B.C. and extended into northwestern India. Aryan tribes from the northwest infiltrated the Indian subcontinent about 1500 B.C.; their merger with the earlier Dravidian inhabitants created the classical Indian culture. The Maurya Empire of the 4th and 3rd centuries B.C.—which reached its zenith under ASHOKA—united much of South Asia. The Golden Age ushered in by the Gupta dynasty (4th to 6th centuries A.D.) saw a flowering of Indian science, art, and culture. Islam

spread across the subcontinent over a period of 700 years. In the 10th and 11th centuries, Turks and Afghans invaded India and established the Delhi Sultanate. In the early 16th century, the Emperor BABUR established the Mughal Dynasty which ruled India for more than three centuries. European explorers began establishing footholds in India during the 16th century. By the 19th century, Great Britain had become the dominant political power on the subcontinent. The British Indian Army played a vital role in both World Wars. Years of nonviolent resistance to British rule, led by Mohandas GANDHI and Jawaharlal NEHRU, eventually resulted in Indian independence, which was granted in 1947. Large-scale communal violence took place before and after the subcontinent partition into two separate states—India and Pakistan. The neighboring nations have fought three wars since independence, the last of which was in 1971 and resulted in East Pakistan becoming the separate nation of Bangladesh. India's nuclear weapons tests in 1998 emboldened Pakistan to conduct its own tests that same year. In November 2008, terrorists originating from Pakistan conducted a series of coordinated attacks in Mumbai, India's financial capital. Despite pressing problems such as significant overpopulation, environmental degradation, extensive poverty, and widespread corruption, economic growth following the launch of economic reforms in 1991 and a massive youthful population are driving India's emergence as a regional and global power.

ECONOMY

Economy—overview: India is developing into an open-market economy, yet traces of its past autarkic policies remain. Economic liberalization measures, including industrial deregulation, privatization of state-owned enterprises, and reduced controls on foreign trade and investment, began in the early 1990s and have served to accelerate the country's growth, which averaged under 7% per year since 1997. India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly more than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output, with less than one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers. In 2010, the Indian economy rebounded robustly from the global financial crisis—in large part because of strong domestic demand—and growth exceeded 8% year-on-year in real terms. However, India's economic growth began slowing in 2011 because of a slow down in government spending and a decline in investment, caused by investor pessimism about the government's commitment to further economic reforms and about the global situation. High international crude prices have exacerbated the government's fuel subsidy expenditures, contributing to a higher fiscal deficit and a worsening current account deficit. In late 2012, the Indian Government announced additional reforms and deficit reduction measures to reverse India's slow down, including allowing higher levels of foreign participation in direct investment in the economy. The outlook for India's medium-term growth is positive due to a young population and corresponding low dependency ratio, healthy savings and investment rates, and increasing integration into the global economy. India has many long-term challenges that it has yet to fully

address, including poverty, corruption, violence and discrimination against women and girls, an inefficient power generation and distribution system, ineffective enforcement of intellectual property rights, decades-long civil litigation dockets, inadequate transport and agricultural infrastructure, limited non-agricultural employment opportunities, inadequate availability of quality basic and higher education, and accommodating rural-to-urban migration.

Telephone system: *general assessment:* supported by recent deregulation and liberalization of telecommunications laws and policies, India has emerged as one of the fastest growing telecom markets in the world; total telephone subscribership base exceeded 900 million in 2011, an overall teledensity of roughly 75%, and subscribership is currently growing more than 20 million per month; urban teledensity now exceeds 100% and rural teledensity is steadily growing

domestic: mobile cellular service introduced in 1994 and organized nationwide into four metropolitan areas and 19 telecom circles each with multiple private service providers and one or more state-owned service providers; in recent years significant trunk capacity added in the form of fiber-optic cable and one of the world's largest domestic satellite systems, the Indian National Satellite system (INSAT), with 6 satellites supporting 33,000 very small aperture terminals (VSAT)

international: country code—91; a number of major international submarine cable systems, including Sea-Me-We-3 with landing sites at Cochin and Mumbai (Bombay), Sea-Me-We-4 with a landing site at Chennai, Fiber-Optic Link Around the Globe (FLAG) with a landing site at Mumbai (Bombay), South Africa—Far East (SAFE) with a landing site at Cochin, the i2i cable network linking to Singapore with landing sites at Mumbai (Bombay) and Chennai (Madras), and Tata Indicom linking Singapore and Chennai (Madras), provide a significant increase in the bandwidth available for both voice and data traffic; satellite earth stations—8 Intelsat (Indian Ocean) and 1 Inmarsat (Indian Ocean region); 9 gateway exchanges operating from Mumbai (Bombay), New Delhi, Kolkata (Calcutta), Chennai (Madras), Jalandhar, Kanpur, Gandhinagar, Hyderabad, and Ernakulam (2011)

Broadcast media: Doordarshan, India's public TV network, operates about 20 national, regional, and local services; a large and increasing number of privately owned TV stations are distributed by cable and satellite service providers; by 2011, more than 100 million homes had access to cable and satellite TV offering more than 700 TV channels; government controls AM radio with All India Radio operating domestic and external networks; news broadcasts via radio are limited to the All India Radio Network; since 2000, privately-owned FM stations have been permitted and their numbers have increased rapidly (2007)

TRANSNATIONAL ISSUES

Disputes—international: since China and India launched a security and foreign policy dialogue in 2005, consolidated discussions related to the dispute over most of their rugged, militarized boundary, regional nuclear proliferation, Indian claims that China transferred missiles to Pakistan, and other matters continue; Kashmir remains the site of the world's largest and most militarized territorial dispute with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); India and Pakistan resumed bilateral dialogue in February 2011 after a two-year hiatus, have maintained the 2003 cease-fire in Kashmir, and continue to have disputes over water sharing of the Indus River and its tributaries; UN Military Observer Group in India and Pakistan has maintained a small group of peacekeepers since 1949; India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964; to defuse tensions and prepare for discussions on a maritime boundary, India and Pakistan seek technical resolution of the disputed boundary in Sir Creek estuary at the mouth of the Rann of Kutch in the Arabian Sea; Pakistani maps continue to show its Junagadh claim in Indian Gujarat State; Prime Minister Singh's September 2011 visit to Bangladesh resulted in the signing of a Protocol to the 1974 Land Boundary Agreement between India and Bangladesh, which had called for the settlement of longstanding boundary disputes over undemarcated areas and the exchange of territorial enclaves, but which had never been implemented; Bangladesh referred its maritime boundary claims with Burma and India to the International Tribunal on the Law of the Sea; Joint Border Committee with Nepal continues to examine contested boundary sections, including the 400 square kilometer dispute over the source of the Kalapani River; India maintains a strict border regime to keep out Maoist insurgents and control illegal cross-border activities from Nepal

Refugees and Internally displaced persons: *refugees (country of origin):* 100,003 (Tibet/

Illicit drugs: world's largest producer of licit opium for the pharmaceutical trade, but an

undetermined quantity of opium is diverted to illicit international drug markets; transit point for illicit narcotics produced in neighboring countries and throughout Southwest Asia; illicit producer of methaqualone; vulnerable to narcotics money

laundering through the hawala system; licit ketamine and precursor production

INDIAN OCEAN

INTRODUCTION

Background: The Indian Ocean is the third largest of the world's five oceans (after the Pacific Ocean and Atlantic Ocean, but larger than the Southern Ocean and Arctic Ocean). Four critically important access waterways are the Suez Canal (Egypt), Bab el Mandeb (Djibouti-Yemen), Strait of Hormuz (Iran-Oman), and Strait of Malacca (Indonesia-Malaysia). The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Indian Ocean south of 60 degrees south latitude.

Geography: INDIAN OCEAN

Location: body of water between Africa, the Southern Ocean, Asia, and Australia

Geographic coordinates: 20 00 S, 80 00 E

Map references: Physical Map of the World

Area: total: 68.556 million sq km

note: includes Andaman Sea, Arabian Sea, Bay of Bengal, Flores Sea, Great Australian Bight, Gulf of Aden, Gulf of Oman, Java Sea, Mozambique Channel, Persian Gulf, Red Sea, Savu Sea, Strait of Malacca, Timor Sea, and other tributary water bodies

Area—comparative: about 5.5 times the size of the US

Coastline: 66,526 km Climate northeast monsoon (December to April), southwest monsoon (June to October); tropical cyclones occur during May/June and October/November in the northern Indian Ocean and January/February in the southern Indian Ocean Terrain surface dominated by counterclockwise gyre (broad, circular system of currents) in the southern Indian Ocean; unique reversal of surface currents in the northern Indian Ocean; low atmospheric pressure over southwest Asia from hot, rising, summer air results in the southwest monsoon and southwest-to-northeast winds and currents, while high pressure over northern Asia from cold, falling, winter air results in the northeast monsoon and northeast-to-southwest winds and currents; ocean floor is dominated by the Mid-Indian Ocean Ridge and subdivided by the Southeast Indian Ocean Ridge, Southwest Indian Ocean Ridge, and Ninetyeast Ridge

Elevation extremes: lowest point: Java Trench-7,258 m
highest point: sea level 0 m

Natural resources: oil and gas fields, fish, shrimp, sand and gravel aggregates, placer deposits, polymetallic nodules

Natural hazards: occasional icebergs pose navigational hazard in southern reaches

Environment—current issues: endangered marine species include the dugong, seals, turtles, and whales; oil pollution in the Arabian Sea, Persian Gulf, and Red Sea

Geography—note: major chokepoints include Bab el Mandeb, Strait of Hormuz, Strait of Malacca, southern access to the Suez Canal, and the Lombok Strait

ECONOMY

Economy—overview: The Indian Ocean provides major sea routes connecting the Middle East, Africa, and East Asia with Europe and the Americas. It carries a particularly heavy traffic of

petroleum and petroleum products from the oil fields of the Persian Gulf and Indonesia. Its fish are of great and growing importance to the bordering countries for domestic consumption and export. Fishing fleets from Russia, Japan, South Korea, and Taiwan also exploit the Indian Ocean, mainly for shrimp and tuna. Large reserves of hydrocarbons are being tapped in the offshore areas of Saudi Arabia, Iran, India, and western Australia. An estimated 40% of the world's offshore oil production comes from the Indian Ocean. Beach sands rich in heavy minerals and offshore placer deposits are actively exploited by bordering countries, particularly India, South Africa, Indonesia, Sri Lanka, and Thailand.

TRANSPORTATION

Ports and terminals: Chennai (Madras, India); Colombo (Sri Lanka); Durban (South Africa); Jakarta (Indonesia); Kolkata (Calcutta, India); Melbourne (Australia); Mumbai (Bombay, India); Richards Bay (South Africa)

Transportation—note: although the number of reported incidents of piracy have dropped dramatically in 2012, the International Maritime Bureau continues to report the territorial waters of littoral states and offshore waters as high risk for piracy and armed robbery against ships, particularly in the Gulf of Aden, along the east coast of Africa, the Bay of Bengal, and the Strait of Malacca; the presence of several naval task forces in the Gulf of Aden and additional anti-piracy measures on the part of ship operators, including the use of on-board armed security teams, have reduced incidents of piracy; in response, Somali-based pirates, using hijacked fishing trawlers as "mother ships" to extend their range, shifted operations as far south as the Mozambique Channel, eastward to the vicinity of the Maldives, and northeastward to the Strait of Hormuz

TRANSNATIONAL ISSUES

Disputes—International: some maritime disputes (see littoral states)

INDONESIA

INTRODUCTION

Background: The Dutch began to colonize Indonesia in the early 17th century; Japan occupied the islands from 1942 to 1945. Indonesia declared its independence shortly before Japan's surrender, but it required four years of sometimes brutal fighting, intermittent negotiations, and UN mediation before the Netherlands agreed to transfer sovereignty in 1949. A period of sometimes unruly parliamentary democracy ended in 1957 when President SOEKARNO declared martial law and instituted "Guided Democracy." After an abortive coup in 1965 by alleged Communist sympathizers, SOEKARNO was removed from power. From 1966 until 1988, President SUHARTO ruled Indonesia with his "New Order" Government. After rioting toppled Suharto in 1998, free and fair legislative elections took place in 1999. Indonesia is now the world's third most populous democracy, the world's largest archipelagic state, and the world's largest Muslim-majority nation. Current issues include: alleviating poverty, improving education, preventing terrorism, consolidating democracy after four decades of authoritarianism, implementing economic and financial reforms, stemming corruption, reforming the criminal justice system, holding the military and police accountable for human rights violations, addressing climate change, and controlling infectious diseases, particularly those of global and regional importance. In 2005, Indonesia reached a historic peace agreement with armed separatists in Aceh, which led to democratic elections in Aceh in December 2006. Indonesia continues to face low intensity armed resistance in Papua by the separatist Free Papua Movement.

GEOGRAPHY

Location: Southeastern Asia, archipelago between the Indian Ocean and the Pacific Ocean

Geographic coordinates: 5 00 S, 120 00 E

Legislative branch: People's Consultative Assembly (Majelis Permusyawaratan Rakyat or MPR) is the upper house; it consists of members

of the DPR and DPD and has role in inaugurating and impeaching the president and in amending the constitution but does not formulate national policy; House of Representatives or Dewan Perwakilan Rakyat (DPR) (560 seats, members elected to serve five-year terms), formulates and passes legislation at the national level; House of Regional Representatives (Dewan Perwakilan Daerah or DPD), constitutionally mandated role includes providing legislative input to DPR on issues affecting regions (132 members, four from each of Indonesia's original 30 provinces, two special regions, and one special capital city district) elections: last held on 9 April 2009 (next to be held in 2014)

election results: percent of vote by party—PD 20.9%, GOLKAR 14.5%, PDI-P 14.0%, PKS 7.9%, PAN 6.0%, PPP 5.3%, PKB 4.9%, GERINDRA 4.5%, HANURA 3.8%, others 18.2%; seats by party—PD 148, GOLKAR 107, PDI-P 94, PKS 57, PAN 46, PPP 37, PKB 28, GERINDRA 26, HANURA 17

note: 29 other parties received less than 2.5% of the vote so did not obtain any seats; because of election rules, the number of seats won does not always follow the percentage of votes received by parties

Judicial branch: Supreme Court or Mahkamah Agung is the final court of appeal but does not have the power of judicial review (justices are appointed by the president from a list of candidates selected by the legislature); in March 2004 the Supreme Court assumed administrative and financial responsibility for the lower court system from the Ministry of Justice and Human Rights; Constitutional Court or Mahkamah Konstitusi (invested by the president on 16 August 2003) has the power of judicial review, jurisdiction over the results of a general election, and reviews actions to dismiss a president from office; Labor Court under supervision of Supreme Court began functioning in January 2006; anti-corruption courts have jurisdiction over corruption cases brought by the independent Corruption Eradication Commission

Political parties and leaders: Democrat Party or PD [Susilo Bambang YUDHOYONO]; Functional Groups Party or GOLKAR [Aburizal BAKRIE]; Great Indonesia Movement Party or GERINDRA [SUHARDI]; Indonesia Democratic Party-Struggle or PDI-P [MEGAWATI Sukarnoputri]; National Awakening Party or PKB [Muhaimin ISKANDAR]; National Mandate Party or PAN [Hatta RAJASA]; People's Conscience Party or HANURA [WIRANTO]; Prosperous Justice Party or PKS [Anis MATTAL]; United Development Party or PPP [Suryadharma ALI]

Political pressure groups and leaders: Commission for the "Disappeared" and Victims of Violence or KontraS; Indonesia Corruption Watch or ICW; Indonesian Forum for the Environment or WALHI

ECONOMY

Economy—overview: Indonesia, a vast polyglot nation, grew more than 6% annually in 2010-12. The government made economic advances under the first administration of President YUDHOYONO (2004-09), introducing significant reforms in the financial sector, including tax and customs reforms, the use of Treasury bills, and capital market development and supervision. During the global financial crisis, Indonesia outperformed its regional neighbors and joined China and India as the only G20 members posting growth in 2009. The government has promoted fiscally conservative policies, resulting in a debt-to-GDP ratio of less than 25%, a fiscal deficit below 3%, and historically low rates of inflation. Fitch and Moody's upgraded Indonesia's credit rating to investment grade in December 2011. Indonesia still struggles with poverty and unemployment, inadequate infrastructure, corruption, a complex regulatory environment, and unequal resource distribution among regions. The government in 2013 faces the ongoing challenge of improving Indonesia's insufficient infrastructure to remove impediments to economic growth, labor unrest over wages, and reducing its fuel subsidy program in the face of high oil prices.

TRANSNATIONAL ISSUES

Disputes—international: Indonesia has a stated foreign policy objective of establishing stable fixed land and maritime boundaries with all of its neighbors; three stretches of land borders with Timor-Leste have yet to be delimited, two of which are in the Oecussi exclave area, and no maritime or Exclusive Economic Zone (EEZ) boundaries have been established between the countries; many refugees from Timor-Leste who left in 2003 still reside in Indonesia and refuse repatriation; all borders between Indonesia and Australia have been agreed upon bilaterally, but a 1997 treaty that

would settle the last of their maritime and EEZ boundary has yet to be ratified by Indonesia's legislature; Indonesian groups challenge Australia's claim to Ashmore Reef; Australia has closed parts of the Ashmore and Cartier Reserve to Indonesian traditional fishing and placed restrictions on certain catches; land and maritime negotiations with Malaysia are ongoing, and disputed areas include the controversial Tanjung Datu and Camar Wulan border area in Borneo and the maritime boundary in the Ambalat oil block in the Celebes Sea;

Indonesia and Singapore continue to work on finalizing their 1973 maritime boundary agreement by defining unresolved areas north of Indonesia's Batam Island; Indonesian secessionists, squatters, and illegal migrants create repatriation problems for Papua New Guinea; maritime delimitation talks continue with Palau; EEZ negotiations with Vietnam are ongoing, and the two countries in Fall 2011 agreed to work together to reduce illegal fishing along their maritime boundary

Refugees and internally displaced persons: IDPs: 180,000 (government offensives against rebels in Aceh; most IDPs in Aceh, Central Kalimantan, Central Sulawesi Provinces, and Maluku) (2011)

Illicit drugs: illicit producer of cannabis largely for domestic use; producer of methamphetamine and ecstasy

IRAN

INTRODUCTION

Background: Known as Persia until 1935, Iran became an Islamic republic in 1979 after the ruling monarchy was overthrown and Shah Mohammad Reza PAHLAVI was forced into exile. Conservative clerical forces led by Ayatollah Ruhollah KHOMEINI established a theocratic system of government with ultimate political authority vested in a learned religious scholar referred to commonly as the Supreme Leader who, according to the constitution, is accountable only to the Assembly of Experts—a popularly elected 86-member body of clerics. US-Iranian relations became strained when a group of Iranian students seized the US Embassy in Tehran in November 1979 and held embassy personnel hostages until mid-January 1981. The US cut off diplomatic relations with Iran in April 1980. During the period 1980-88, Iran fought a bloody, indecisive war with Iraq that eventually expanded into the Persian Gulf and led to clashes between US Navy and Iranian military forces. Iran has been designated a state sponsor of terrorism for its activities in Lebanon and elsewhere in the world and remains subject to US, UN, and EU economic sanctions and export controls because of its continued involvement in terrorism and its nuclear weapons ambitions. Following the election of reformer Hojjat ol-Eslam Mohammad KHATAMI as president in 1997 and a reformist Majles (legislature) in 2000, a campaign to foster political reform in response to popular dissatisfaction was initiated. The movement floundered as conservative politicians, through control of unelected institutions,

prevented reform measures from being enacted and increased repressive measures. Starting with nationwide municipal elections in 2003 and continuing through Majles elections in 2004, conservatives reestablished control over Iran's elected government institutions, which culminated with the August 2005 inauguration of hardliner Mahmud AHMADI-NEJAD as president. His controversial reelection in June 2009 sparked nationwide protests over allegations of electoral fraud. The UN Security Council has passed a number of resolutions calling for Iran to suspend its uranium enrichment and reprocessing activities and comply with its IAEA obligations and responsibilities. In mid-February 2011, opposition activists conducted the largest antiregime rallies since December 2009, spurred by the success of uprisings in Tunisia and Egypt. Protester turnout probably was at most tens of thousands and security forces were deployed to disperse protesters. Additional protests in March 2011 failed to elicit significant participation largely because of the robust security response, although discontent still smolders. Deteriorating economic conditions due primarily to government mismanagement and international sanctions prompted at least two major economically based protests in July and October 2012.

Independence: 1 April 1979 (Islamic Republic of Iran proclaimed); notable earlier dates: ca. 625 B.C. (unification of Iran under the Medes); ca. A.D. 1501 (Iran reunified under the Safavids); 12 December 1925 (modern Iran established under the Pahlavis)

National holiday: Republic Day, 1 April (1979)

Constitution: 2-3 December 1979; revised 1989 *note:* the revision in 1989 expanded powers of the presidency and eliminated the prime ministership

Legal system: religious legal system based on sharia law

International law organization participation: has not submitted an ICJ jurisdiction declaration; non-party state to the ICCt

Suffrage: 18 years of age; universal

Executive branch: *chief of state:* Supreme Leader Ali Hoseini-KHAMENEI (since 4 June 1989)

head of government: President Mahmud AHMADI-NEJAD (since 3 August 2005); First Vice President Mohammad Reza RAHIMI (since 13 September 2009)

cabinet: Council of Ministers selected by the president with legislative approval; the Supreme Leader has some control over appointments to the more sensitive ministries (For more information visit the World Leaders website)

note: also considered part of the Executive branch of government are three oversight bodies: 1) Assembly of Experts (Majles-e Khoebregan), a popularly elected body charged with determining the succession of the Supreme Leader, reviewing his performance, and deposing him if deemed necessary; 2) Expediency Council or the Council for the Discernment of Expediency (Majma-ye-Tashkhis-e-Maslahat-e-Nezam) exerts supervisory authority over the executive, judicial, and legislative branches and resolves legislative issues when the Majles and the Council of Guardians disagree and since 1989 has been used to advise national religious leaders on matters of national policy; in 2005 the Council's powers were expanded to act as a supervisory body for the government; 3) Council of Guardians of the Constitution or Council of Guardians or Guardians Council (Shora-ye Negban-e Qanon-e Asasi) determines whether proposed legislation is both constitutional and faithful to Islamic law, vets candidates in popular elections for suitability, and supervises national elections

elections: supreme leader appointed for life by the Assembly of Experts; president elected by popular vote for a four-year term (eligible for a second term and additional nonconsecutive term); election last held on 14 June 2009 (next presidential election to be held in June 2013)

election results: Mahmud AHMADI-NEJAD reelected president; percent of vote—Mahmud

AHMADI-NEJAD 62.6%, Mir-Hosein MUSAVI-Khamenei 33.8%, other 3.6%; voter turnout 85% (according to official figures published by the government)

Legislative branch: unicameral Islamic Consultative Assembly or Majles-e Shura-ye Eslami or Majles (290 seats; members elected by popular vote from single and multimember districts to serve four-year terms)

elections: last held on 2 March 2012 (first round); second round held on 4 May 2012; (next election to be held in 2016)

election results: percent of vote by party—NA; seats by party—NA
Judicial branch: The Supreme Court (Qeveh Qazaieh) and the four-member High Council of the Judiciary have a single head and overlapping responsibilities; together they supervise the enforcement of all laws and establish judicial and legal policies; lower courts include a special clerical court, a revolutionary court, and a special administrative court

Political parties and leaders: *note:* formal political parties are a relatively new phenomenon in Iran and most conservatives still prefer to work through political pressure groups rather than parties; often political parties or coalitions are formed prior to elections and disbanded soon thereafter; a loose pro-reform coalition called the 2nd Khordad Front, which includes political parties as well as less formal groups and organizations, achieved considerable success in elections for the sixth Majles in early 2000; groups in the coalition included the Islamic Iran Participation Front (IIPF), Executives of Construction Party (Kargozaran), Solidarity Party, Islamic Labor Party, Mardom Salari, Mojahedin of the Islamic Revolution Organization (MIRO), and Militant Clerics Society (MCS; Ruhaniyun); the coalition participated in the seventh Majles elections in early 2004 but boycotted them after 80 incumbent reformists were disqualified; following his defeat in the 2005 presidential elections, former MCS Secretary General and sixth Majles Speaker Mehdi KARUBI formed the National Trust Party; a new conservative group, Islamic Iran Developers Coalition (Abadgaran), took a leading position in the new Majles after winning a majority of the seats in February 2004; ahead of the 2008 Majles elections, traditional and hard-line conservatives attempted to close ranks under the United Front of Principlists and the Broad Popular Coalition of Principlists; several reformist groups, such as the MIRO and the IIPF, also came together as a reformist coalition in advance of the 2008 Majles elections; the IIPF has repeatedly complained that the overwhelming majority of its candidates were unfairly disqualified from the 2008 elections

Political pressure groups and leaders: *groups that generally support the Islamic Republic:* Ansar-e Hizballah-; Followers of the Line of the Imam and the Leader; Islamic Coalition Party (Motalefeh); Islamic Engineers Society; Tehran Militant Clergy Association (MCA; Ruhaniyat)

active pro-reform student group: Office of Strengthening Unity (OSU)

opposition groups: Freedom Movement of Iran; Green Path movement [Mehdi KARUBI, Mir-Hosein MUSAVI]; Marz-e Por Gohar; National Front; various ethnic and monarchist organizations

armed political groups repressed by the government: Democratic Party of Iranian Kurdistan (KDPI); Jundallah; Komala; Mojahedin-e Khalq Organization (MEK or MKO); People's Fedayeen; People's Free Life Party of Kurdistan (PJAK)

ECONOMY

Economy—overview: Iran's economy is marked by statist policies and an inefficient state sector, which create major distortions throughout the system, and reliance on oil, which provides a large share of government revenues. Price controls, subsidies, and other rigidities weigh down the economy, undermining the potential for private-sector-led growth. Private sector activity is typically limited to small-scale workshops, farming, some manufacturing, and services. Significant informal market activity flourishes and corruption is widespread. Tehran since the early 1990s has recognized the need to reduce these inefficiencies, and in December 2010 the Majles passed President Mahmud AHMADI-NEJAD's Targeted Subsidies Law (TSL) to reduce state subsidies on food and energy. This was the most extensive economic reform since the government implemented gasoline rationing in 2007. Over a five-year period the legislation sought to phase out subsidies that previously cost Tehran \$60-\$100 billion annually and

mostly benefited Iran's upper and middle classes. Cash payouts of \$45 per person to more than 90% of Iranian households mitigated initial widespread resistance to the TSL program. However, inflation in 2012 reached its highest level in four years, eroding the value of these cash payouts and motivating the Majles to halt planned price increases for the second half of 2012 through at least March 2013. New fiscal and monetary constraints on Tehran, following international sanctions in January against Iran's Central Bank and oil exports, significantly reduced Iran's oil revenue, forced government spending cuts, and fueled a 20% currency depreciation. Economic growth turned negative for the first time in two decades. Iran also continues to suffer from double-digit unemployment and underemployment. Underemployment among Iran's educated youth has convinced many to seek jobs overseas, resulting in a significant "brain drain."

TRANSNATIONAL ISSUES

Disputes—international: Iran protests Afghanistan's limiting flow of dammed Helmand River tributaries during drought; Iraq's lack of a maritime boundary with Iran prompts jurisdiction disputes beyond the mouth of the Shatt al Arab in the Persian Gulf; Iran and UAE dispute Tunb Islands and Abu Musa Island, which are occupied by Iran; Azerbaijan, Kazakhstan, and Russia ratified Caspian seabed delimitation treaties based on

equidistance, while Iran continues to insist on a one-fifth slice of the sea; Afghan and Iranian commissioners have discussed boundary monument densification and resurvey

Refugees and internally displaced persons: **refugees (country of origin):** 2.4 million (1 million registered, 1.4 million undocumented) (Afghanistan); 42,500 (Iraq) (2013)

Trafficking in persons: **current situation:** Iran is a source, transit, and destination country for men, women, and children trafficked for the purposes of sexual exploitation and involuntary servitude; Iranian women are trafficked internally for the purpose of forced prostitution and for forced marriages to settle debts; Iranian and Afghan children living in Iran are trafficked internally for the purpose of forced marriages, commercial sexual exploitation and involuntary servitude as beggars or laborers to pay debts, provide income, or support drug addiction of their families; press reports indicate that criminal organizations play a significant role in human trafficking to and from Iran, in connection with smuggling of migrants, drugs, and arms; Iranian women and children are also subjected to sex trafficking in Pakistan, Turkey, Qatar, Kuwait, the United Arab Emirates, Bahrain, Iraq, France, Germany, and the United Kingdom

tier rating: Tier 3—Iran did not report any law enforcement efforts to punish trafficking offenders and continues to lack any semblance of victim protection measures; victims of trafficking are, by government policy, detained and deported if foreign, or simply jailed or turned away if Iranian; lack of access to Iran by US Government officials impedes the collection of information on the country's human trafficking problem and the government's efforts to curb it (2009)

Illicit drugs: despite substantial interdiction efforts and considerable control measures along the border with Afghanistan, Iran remains one of the primary transshipment routes for Southwest Asian heroin to Europe; suffers one of the highest opiate addiction rates in the world, and has an increasing problem with synthetic drugs; lacks anti-money laundering laws; has reached out to neighboring countries to share counter-drug intelligence

IRAQ

INTRODUCTION

Background: Formerly part of the Ottoman Empire, Iraq was occupied by Britain during the course of World War I; in 1920, it was declared a League of Nations mandate under UK administration. In stages over the next dozen years, Iraq attained its independence as a kingdom in 1932. A "republic" was proclaimed in 1958, but in actuality a series of strongmen ruled the country until 2003. The last was SADDAM Husayn. Territorial disputes with Iran led to an inconclusive and costly eight-year war (1980-88). In August 1990, Iraq seized Kuwait but was expelled by US-led, UN coalition forces during the Gulf War of January-February 1991. Following Kuwait's liberation, the UN Security Council (UNSC) required Iraq to scrap all weapons of mass destruction and long-range missiles and to allow UN verification inspections. Continued Iraqi noncompliance with UNSC resolutions over a period of 12 years led to the US-led invasion of Iraq in March 2003 and the ouster of the SADDAM Husayn regime. US forces remained in Iraq under a UNSC mandate through 2009 and under a bilateral security agreement thereafter, helping to provide security and to train and mentor Iraqi security forces. In October 2005, Iraqis approved a constitution in a national referendum and, pursuant to this document, elected a 275-member Council of Representatives (COR) in December 2005. The COR approved most cabinet ministers in May 2006, marking the transition to Iraq's first constitutional government in nearly a half century. In January 2009, Iraq held elections for provincial councils in all governorates except for the three governorates comprising the Kurdistan Regional Government and Kirkuk Governorate. Iraq held a national legislative election in March 2010—choosing 325 legislators in an expanded COR—and, after nine months of deadlock the COR approved the new government in December 2010. Nearly nine years after the start of the Second Gulf War in Iraq, US military operations there ended in mid-December 2011.

GEOGRAPHY

Location: Middle East, bordering the Persian Gulf, between Iran and Kuwait

Geographic coordinates: 33 00 N, 44 00 E

Map references: Middle East

Area: total: 438,317 sq km
country comparison to the world: 59
land: 437,367 sq km
water: 950 sq km

Area—comparative: slightly more than twice the size of Idaho

Land boundaries: total: 3,650 km

border countries: Iran 1,458 km, Jordan 181 km, Kuwait 240 km, Saudi Arabia 814 km, Syria 605 km, Turkey 352 km

Coastline: 58 km

Maritime claims: territorial sea: 12 nm
continental shelf: not specified

Climate: mostly desert; mild to cool winters with dry, hot, cloudless summers; northern mountainous regions along Iranian and Turkish borders experience cold winters with occasionally heavy snows that melt in early spring, sometimes causing extensive flooding in central and southern Iraq

Terrain: mostly broad plains; reedy marshes along Iranian border in south with large flooded areas; mountains along borders with Iran and Turkey

Elevation extremes: lowest point: Persian Gulf 0 m

highest point: unnamed peak; 3,611 m;
note: this peak is neither Gundah Zhur 3,607 m nor Kuh-e Hajji-Ebrahim 3,595 m

Natural resources: petroleum, natural gas, phosphates, sulfur
Land use: arable land: 9.19%
permanent crops: 0.48%

Irrigated land: 35,250 sq km (2003)

Total renewable water resources: 89.86 cu km (2011)

Freshwater withdrawal (domestic/industrial/agricultural): total: 66 cu km/yr (7%/15%/79%)
per capita: 2,616 cu m/yr (2000)

Natural hazards: dust storms; sandstorms; floods

Environment—current issues: government water control projects have drained most of the inhabited marsh areas east of An Nasiriyah by drying up or diverting the feeder streams and rivers; a once sizable population of Marsh Arabs, who inhabited these areas for thousands of years, has been displaced; furthermore, the destruction of the natural habitat poses serious threats to the area's wildlife populations; inadequate supplies of potable water; development of the Tigris and Euphrates rivers system contingent upon agreements with upstream riparian Turkey; air and water pollution; soil degradation (salination) and erosion; desertification

Environment—international agreements:
party to: Biodiversity, Law of the Sea, Ozone Layer Protection
signed, but not ratified: Environmental Modification

Geography—note: strategic location on Shatt al Arab waterway and at the head of the Persian Gulf

note: adopted 2004; following the ousting of Saddam HUSSEIN, Iraq adopted "Mawtini," a popular folk song throughout the Arab world, which also serves as an unofficial anthem of the Palestinian people

ECONOMY

Economy—overview: An improving security environment and foreign investment are helping to spur economic activity, particularly in the energy, construction, and retail sectors. Broader economic development, long-term fiscal health, and sustained improvements in the overall standard of living still depend on the central government passing major policy reforms. Iraq's largely state-run economy is dominated by the oil sector, which provides more than 90% of government revenue and 80% of foreign exchange earnings. Iraq in 2012 boosted oil exports to a 30-year high of 2.6 million barrels per day, a significant increase from Iraq's average of 2.2 million in 2011. Government revenues increased as global oil prices remained persistently high for much of 2012. Iraq's contracts with major oil companies have the potential to further expand oil exports and revenues, but Iraq will need to make significant upgrades to its oil processing, pipeline, and export infrastructure to enable these deals to reach their economic potential. The Iraqi Kurdistan Region's (IKR) autonomous Kurdistan Regional Government (KRG) passed its own oil law in 2007, and has directly signed about 50 contracts to develop IKR energy reserves. The federal government has disputed the legal authority of the KRG to conclude most of these contracts, some of which are also in areas with unresolved administrative boundaries in dispute between the federal and

regional government. Iraq is making slow progress enacting laws and developing the institutions needed to implement economic policy, and political reforms are still needed to assuage investors' concerns regarding the uncertain business climate, which may have been harmed by the November 2012 standoff between Baghdad and Erbil and the removal of the Central Bank Governor in October 2012. The government of Iraq is eager to attract additional foreign direct investment, but it faces a number of obstacles including a tenuous political system and concerns about security and societal stability. Rampant corruption, outdated infrastructure, insufficient essential services, skilled labor shortages, and antiquated commercial laws stifle investment and continue to constrain growth of private, nonoil sectors. Iraq is considering a package of laws to establish a modern legal framework for the oil sector and a mechanism to equitably divide oil revenues within the nation, although these reforms are still under contentious and sporadic negotiation. Under the Iraqi Constitution, some competencies relevant to the overall investment climate are either shared by the federal government and the regions or are devolved entirely to the regions. Investment in the IKR operates within the framework of the Kurdistan Region Investment Law (Law 4 of 2006) and the Kurdistan Board of Investment, which is designed to provide incentives to help economic development in areas under the authority of the KRG. Inflation has remained under control since 2006 as security improved. However, Iraqi leaders remain hard pressed to translate macroeconomic gains into an improved standard of living for the Iraqi populace. Unemployment remains a problem throughout the country despite a bloated public sector. Encouraging private enterprise through deregulation would make it easier for Iraqi citizens and foreign investors to start new businesses. Rooting out corruption and implementing reforms—such as restructuring banks and developing the private sector—would be important steps in this direction.

IRELAND

INTRODUCTION

Background: Celtic tribes arrived on the island between 600 and 150 B.C. Invasions by Norsemen that began in the late 8th century were finally ended when King Brian BORU defeated the Danes in 1014. English invasions began in the 12th century and set off more than seven centuries of Anglo-Irish struggle marked by fierce rebellions and harsh repressions. A failed 1916 Easter Monday Rebellion touched off several years of guerrilla warfare that in 1921 resulted in independence from the UK for 26 southern counties; six northern (Ulster) counties remained part of the UK. In 1949, Ireland withdrew from the British Commonwealth; it joined the European Community in 1973. Irish governments have sought the peaceful unification of Ireland and have cooperated with Britain against terrorist groups. A peace settlement for Northern Ireland is gradually being implemented despite some difficulties. In 2006, the Irish and British governments developed and began to implement the St. Andrews Agreement, building on the Good Friday Agreement approved in 1998.

Flag description: three equal vertical bands of green (hoist side), white, and orange; officially the flag colors have no meaning, but a common

interpretation is that the green represents the Irish nationalist (Gaelic) tradition of Ireland; orange represents the Orange tradition (minority supporters of William of Orange); white symbolizes peace (or a lasting truce) between the green and the orange *note*: similar to the flag of Cote d'Ivoire, which is shorter and has the colors reversed—orange (hoist side), white, and green; also similar to the flag of Italy, which is shorter and has colors of green (hoist side), white, and red

National symbol(s): harp

National anthem: *name*: "Amhran na bh Fiann" (The Soldier's Song)

lyrics/music: Peadar KEARNEY [English], Liam O RINN [Irish]/Patrick HEENEY and Peadar KEARNEY

note: adopted 1926; instead of "Amhran na bh Fiann," the song "Ireland's Call" is often used in athletic events where citizens of the Republic of Ireland and Northern Ireland compete as a unified team.

ECONOMY

Economy—overview: Ireland is a small, modern, trade-dependent economy. Ireland was among the initial group of 12 EU nations that began circulating the euro on 1 January 2002. GDP growth averaged 6% in 1995-2007, but economic activity has dropped sharply since the onset of the world financial crisis, with GDP falling by over 3% in 2008, nearly 7% in 2009, and less than 1% in 2010. Ireland entered into a recession in 2008 for the first time in more than a decade, with the subsequent collapse of its domestic property and construction markets. Property prices rose more rapidly in Ireland in the decade up to 2007 than in any other developed economy. Since their 2007 peak, average house prices have fallen 47%. In the wake of the collapse of the construction sector and the downturn in consumer spending and business investment, the export sector, dominated by foreign multinationals, has become a key component of Ireland's economy. Agriculture, once the most important sector, is now dwarfed by industry and services. In 2008 the former COWEN government moved to guarantee all bank deposits, recapitalize the banking system, and establish partly-public venture capital funds in response to the country's economic downturn. In 2009, in continued efforts to stabilize the banking sector, the Irish Government established the National Asset Management Agency (NAMA) to acquire problem commercial property and development loans from Irish banks. Faced with sharply reduced revenues and a burgeoning budget deficit, the Irish Government introduced the first in a series of draconian budgets in 2009. In addition to across-the-board cuts in spending, the 2009 budget included wage reductions for all public servants. These measures were not sufficient. In 2010, the budget deficit reached 32.4% of GDP—the world's largest deficit, as a percentage of GDP—because of additional government support for the banking sector. In late 2010, the former COWEN Government agreed to a \$112 billion loan package from the EU and IMF to help Dublin further increase the capitalization of its banking sector and avoid defaulting on its sovereign debt. Since entering office in March 2011, the new KENNY government has intensified austerity measures to try to meet the deficit targets under Ireland's EU-IMF program. Ireland

achieved moderate growth of 1.4% in 2011 and cut the budget deficit to 9.1% of GDP. Although the recovery slowed in 2012 because of weaker EU demand for Irish exports, Dublin managed to trim the deficit to about 8.5% of GDP.

TRANSNATIONAL ISSUES

Disputes—International: Ireland, Iceland, and the UK dispute Denmark's claim that the Faroe Islands' continental shelf extends beyond 200 nm

Illicit drugs: transshipment point for and consumer of hashish from North Africa to the UK and Netherlands and of European-produced synthetic drugs; increasing consumption of South American cocaine; minor transshipment point for heroin and cocaine destined for Western Europe; despite recent legislation, narcotics-related money laundering—using bureaux de change, trusts, and shell companies involving the offshore financial community—remains a concern

ISLE OF MAN

INTRODUCTION

Background: Part of the Norwegian Kingdom of the Hebrides until the 13th century when it was ceded to Scotland, the isle came under the British crown in 1765. Current concerns include reviving the almost extinct Manx Gaelic language. Isle of Man is a British crown dependency but is not part of the UK or of the European Union. However, the UK Government remains constitutionally responsible for its defense and international representation.

ECONOMY

Economy—overview: Offshore banking, manufacturing, and tourism are key sectors of the economy. The government offers low taxes and other incentives to high-technology companies and financial institutions to locate on the island; this has paid off in expanding employment opportunities in high-income industries. As a result, agriculture and fishing, once the mainstays of the economy, have declined in their contributions to GDP. The Isle of Man also attracts online gambling sites and the film industry. Trade is mostly with the UK. In January 2013, the Isle of Man signed a tax agreement with Guernsey and Jersey, in order to enable the islands' authorities to end tax avoidance and evasion. The Isle of Man enjoys free access to EU markets.

ISRAEL

INTRODUCTION

Background: Following World War II, the British withdrew from their mandate of Palestine, and the UN partitioned the area into Arab and Jewish states, an arrangement rejected by the Arabs. Subsequently, the Israelis defeated the Arabs in a series of wars without ending the deep tensions between the two sides. (The territories Israel occupied since the 1967 war are not included in the Israel country profile, unless otherwise noted.) On 25 April 1982, Israel withdrew from the Sinai pursuant to the 1979 Israel-Egypt Peace Treaty. In keeping with the framework established at the Madrid Conference in October 1991, bilateral negotiations were conducted between Israel and Palestinian representatives and Syria to achieve a permanent settlement. Israel and Palestinian officials signed on 13 September 1993 a Declaration of Principles (also known as the "Oslo Accords") guiding an interim period of Palestinian self-rule. Outstanding territorial and other disputes with Jordan were resolved in the 26 October 1994 Israel-Jordan Treaty of Peace. Progress toward a permanent status agreement was undermined by Israeli-Palestinian violence between September 2003 and February 2005. Israel in 2005 unilaterally disengaged from the Gaza Strip, evacuating settlers and its military while retaining control over most points of entry into the Gaza Strip. The election of HAMAS to head the Palestinian Legislative Council in 2006 froze relations between Israel and the Palestinian Authority

(PA). In 2006 Israel engaged in a 34-day conflict with Hizballah in Lebanon in June-August 2006 and a 23-day conflict with HAMAS in the Gaza Strip during December 2008 and January 2009. Prime Minister Binyamin NETANYAHU formed a coalition in March 2009 following a February 2009 general election. Direct talks with the PA launched in September 2010 collapsed following the expiration of Israel's 10-month partial settlement construction moratorium in the West Bank.

lyrics/music: Naftali Herz IMBER/traditional, arranged by Samuel COHEN

note: adopted 2004, unofficial since 1948; used as the anthem of the Zionist movement since 1897; the 1888 arrangement by Samuel COHEN is thought to be based on the Romanian folk song "Carul cu boi" (The Ox Driven Cart)

ECONOMY

Economy—overview: Israel has a technologically advanced market economy. Its major imports include crude oil, grains, raw materials, and military equipment. Cut diamonds, high-technology equipment, and pharmaceuticals are among the leading exports. Israel usually posts sizable trade deficits, which are covered by tourism and other service exports, as well as significant foreign investment inflows. The global financial crisis of 2008-09 spurred a brief recession in Israel, but the country entered the crisis with solid fundamentals—following years of prudent fiscal policy and a resilient banking sector. The economy has recovered better than most advanced, comparably sized economies. In 2010, Israel formally acceded to the OECD. Israel's economy also has weathered the Arab Spring because strong trade ties outside the Middle East have insulated the economy from spillover effects. Natural gas fields discovered off Israel's coast during the past two years have brightened Israel's energy security outlook. The Leviathan field was one of the world's largest offshore natural gas finds this past decade, and production from the Tama field is expected to meet all of Israel's natural gas demand beginning mid-2013. In mid-2011, public protests arose around income inequality and rising housing and commodity prices. The government formed committees to address some of the grievances but has maintained that it will not engage in deficit spending to satisfy populist demands.

Strip are Israeli-occupied with current status
subject to the Israeli-Palestinian Interim Agree-
ment—permanent status to be determined through
further negotiation; Israel continues construction of
a "seam line" separation barrier along parts of the
Green Line and within the West Bank; Israel with-
drew its settlers and military from the Gaza Strip and
from four settlements in the West Bank in August
2005; Golan Heights is Israeli-occupied (Lebanon
claims the Shab'a Farms area of Golan Heights);
since 1948, about 350 peacekeepers from the UN
Truce Supervision Organization headquartered in
Jerusalem monitor ceasefires, supervise armistice
agreements, prevent isolated incidents from esca-
lating, and assist other UN personnel in the region

ITALY

INTRODUCTION

Background: Italy became a nation-state in 1861 when the regional states of the peninsula, along with Sardinia and Sicily, were united under King Victor EMMANUEL II. An era of parliamentary government came to a close in the early 1920s when Benito MUSSOLINI established a Fascist dictatorship. His alliance with Nazi Germany led to Italy's defeat in World War II. A democratic republic replaced the monarchy in 1946 and economic revival followed. Italy is a charter member of NATO and the European Economic Community (EEC). It has been at the forefront of European economic and political unification, joining the Economic and Monetary Union in 1999. Persistent problems include sluggish economic growth, high youth and female unemployment, organized crime, corruption, and economic disparities between southern Italy and the more prosperous north.

GEOGRAPHY

Location: Southern Europe, a peninsula extending into the central Mediterranean Sea, northeast of Tunisia

Geographic coordinates: 42 50 N, 12 50 E

Map references: Europe

Area: total: 301,340 sq km

country comparison to the world: 72

land: 294,140 sq km

water: 7,200 sq km

note: includes Sardinia and Sicily

Area—comparative: slightly larger than Arizona

border countries: Austria 430 km, France 488 km, Holy See (Vatican City) 3.2 km, San Marino 39 km, Slovenia 199 km, Switzerland 740 km

Coastline: 7,600 km

Maritime claims: territorial sea: 12 nm

continental shelf: 200 m depth or to the depth of exploitation

Climate: predominantly Mediterranean; Alpine in far north; hot, dry in south Terrain: mostly rugged and mountainous; some plains, coastal lowlands

Elevation extremes: lowest point: Mediterranean Sea 0 m

highest point: Mont Blanc (Monte Bianco) de Courmayeur 4,748 m (a secondary peak of Mont Blanc)

Natural resources: coal, mercury, zinc, potash, marble, barite, asbestos, pumice, fluorspar, feldspar, pyrite (sulfur), natural gas and crude oil reserves, fish, arable land

Land use: arable land: 22.57%

permanent crops: 8.37%

other: 69.07% (2011)

Irrigated land: 39,510 sq km (2007)

Total renewable water resources: 191.3 cu km (2011)

Freshwater withdrawal (domestic/industrial/agricultural): total: 45.41 cu km/yr (24%/43%/34%)

per capita: 789.8 cu m/yr (2008)

Natural hazards: regional risks include landslides, mudflows, avalanches, earthquakes, volcanic eruptions, flooding; land subsidence in Venice **volcanism:** significant volcanic activity; Etna (elev. 3,330 m), which is in eruption as of 2010, is Europe's most active volcano; flank eruptions pose a threat to nearby Sicilian villages; Etna, along with the famous Vesuvius, which remains a threat to the millions of nearby residents in the Bay of Naples area, have both been deemed "Decade Volcanoes" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to their explosive history and close proximity to human populations; Stromboli, on its namesake island, has also been continuously active with moderate volcanic activity; other historically active volcanoes include Campi Flegrei, Ischia, Larderello, Pantelleria, Vulcano, and Vulcini

Environment—current issues: air pollution from industrial emissions such as sulfur dioxide; coastal and inland rivers polluted from industrial and agricultural effluents; acid rain damaging lakes; inadequate industrial waste treatment and disposal facilities

Environment—international agreements: party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Persistent Organic Pollutants, Air Pollution-Sulfur 85, Air Pollution-Sulfur 94, Air Pollution-Volatile Organic Compounds, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling signed, but not ratified: none of the selected agreements

Geography—note: strategic location dominating central Mediterranean as well as southern sea and air approaches to Western Europe

Flag description: three equal vertical bands of green (hoist side), white, and red; design inspired by the French flag brought to Italy by Napoleon in 1797; colors are those of Milan (red and white) combined with the green uniform color of the Milanese civic guard

note: similar to the flag of Mexico, which is longer, uses darker shades of red and green, and has its coat of arms centered on the white band; Ireland, which is longer and is green (hoist side), white, and orange; also similar to the flag of the Cote d'Ivoire, which has the colors reversed—orange (hoist side), white, and green

National symbol(s): white, five-pointed star (Stella d'Italia)

National anthem: name: "Il Canto degli Italiani" (The Song of the Italians)

lyrics/music: Goffredo MAMELI/Michele NOVARO

note: adopted 1946; the anthem, originally written in 1847, is also known as "L'Inno di Mameli" (Mameli's Hymn), and "Fratelli D'Italia" (Brothers of Italy)

ECONOMY

Economy—overview: Italy has a diversified industrial economy, which is divided into a developed industrial north, dominated by private companies, and a less-developed, highly subsidized, agricultural south, where unemployment is high. The Italian economy is driven in large part by the manufacture of high-quality consumer goods produced by small and medium-sized enterprises, many of them family-owned. Italy also has a sizable underground economy, which by some estimates accounts for as much as 17% of GDP. These activities are most common within the agriculture, construction, and service sectors. Italy is the third-largest economy in the euro-zone, but its exceptionally high public debt and structural impediments to growth have rendered it vulnerable to scrutiny by financial markets. Public debt has increased steadily since 2007, topping 126% of GDP in 2012, and investor concerns about the broader euro-zone crisis at times have caused borrowing costs on sovereign government debt to rise to euro-era records. During the second half of 2011 the government passed three austerity packages to reduce its budget deficit and help bring down borrowing costs. These measures included a hike in the value-added tax, pension reforms, and cuts to public administration. The government also faces pressure from investors and European partners to sustain its recent efforts to address Italy's long-standing structural impediments to growth, such as labor market inefficiencies and widespread tax evasion. In 2012 economic growth and labor market conditions deteriorated, with growth at -2.3% and unemployment rising to nearly 11%, with youth unemployment around 35%. The government has undertaken several reform initiatives designed to increase long-term economic growth. Italy's GDP is now 7% below its 2007 pre-crisis level.

JAMAICA

INTRODUCTION

Background: The island—discovered by Christopher COLUMBUS in 1494—was settled by the Spanish early in the 16th century. The native Taino, who had inhabited Jamaica for centuries, were gradually exterminated and replaced by African slaves. England seized the island in 1655 and established a plantation economy based on sugar, cocoa, and coffee. The abolition of slavery in 1834 freed a quarter million slaves, many of whom became small farmers. Jamaica gradually increased its independence from Britain. In 1958 it joined other British Caribbean colonies in forming the Federation of the West Indies. Jamaica gained full independence when it withdrew from the Federation in 1962. Deteriorating economic conditions during the 1970s led to recurrent violence as rival gangs affiliated with the major political parties evolved into powerful organized crime networks involved in international drug smuggling and money laundering. Violent crime, drug trafficking, and poverty pose significant challenges to the government today. Nonetheless, many rural and resort areas remain relatively safe and contribute substantially to the economy.

ECONOMY

Economy—overview: The Jamaican economy is heavily dependent on services, which accounted for more than 60% of GDP at the end of 2011. The country continues to derive most of its foreign exchange from tourism, remittances, and bauxite/alumina. Remittances account for nearly 15% of GDP and exports of bauxite and alumina make up roughly 5%. The bauxite/alumina sector was most affected by the global downturn while the tourism industry was resilient. Tourism revenues account for roughly 5% of GDP in 2011. Jamaica's economy faces many challenges to growth: high crime and corruption, large-scale unemployment and underemployment, and a debt-to-GDP ratio of nearly 130%. Jamaica's onerous public debt burden is the result of government bailouts to ailing sectors of the economy, most notably to the financial sector. In early 2010, the Jamaican Government created the Jamaica Debt Exchange in order to retire high-priced domestic bonds and significantly reduce

annual debt servicing. Despite the improvement, debt servicing costs still hinder the government's ability to spend on infrastructure and social programs, particularly as job losses rise in a shrinking economy. Jamaica was hard hit by the effects of the global economic crisis, experiencing economic contractions from 2008-10 and growth remains low. The SIMPSON-MILLER administration faces the difficult prospect of having to achieve fiscal discipline in order to maintain debt payments, while simultaneously attacking a serious crime problem that is hampering economic growth. High unemployment exacerbates the crime problem, including gang violence that is fueled by the drug trade. As of late 2012, the SIMPSON-MILLER government was working to negotiate a new IMF Stand-by agreement to gain access to additional funds.

JAN MAYEN

INTRODUCTION

Background: This desolate, arctic, mountainous island was named after a Dutch whaling captain who indisputably discovered it in 1614 (earlier claims are inconclusive). Visited only occasionally by seal hunters and trappers over the following centuries, the island came under Norwegian sovereignty in 1929. The long dormant Beerenberg volcano, the northernmost active volcano on earth, resumed activity in 1970 and the most recent eruption occurred in 1985.

JAPAN

INTRODUCTION

Background: In 1603, after decades of civil warfare, the Tokugawa shogunate (a military-led, dynastic government) ushered in a long period of relative political stability and isolation from foreign influence. For more than two centuries this policy enabled Japan to enjoy a flowering

of its indigenous culture. Japan opened its ports after signing the Treaty of Kanagawa with the US in 1854 and began to intensively modernize and industrialize. During the late 19th and early 20th centuries, Japan became a regional power that was able to defeat the forces of both China and Russia. It occupied Korea, Formosa (Taiwan), and southern Sakhalin Island. In 1931-32 Japan

occupied Manchuria, and in 1937 it launched a full-scale invasion of China. Japan attacked US forces in 1941—triggering America's entry into World War II—and soon occupied much of East and Southeast Asia. After its defeat in World War II, Japan recovered to become an economic power and an ally of the US. While the emperor retains his throne as a symbol of national unity, elected

politicians hold actual decision-making power. Following three decades of unprecedented growth, Japan's economy experienced a major slowdown starting in the 1990s, but the country remains a major economic power. In March 2011, Japan's strongest-ever earthquake, and an accompanying tsunami, devastated the northeast part of Honshu island, killing thousands and damaging several nuclear power plants. The catastrophe hobbled the country's economy and its energy infrastructure, and tested its ability to deal with humanitarian disasters.

GEOGRAPHY

Location: Eastern Asia, island chain between the North Pacific Ocean and the Sea of Japan, east of the Korean Peninsula

Geographic coordinates: 36 00 N, 138 00 E

Map references: Asia

Area: total: 377,915 sq km
country comparison to the world: 62

land: 364,485 sq km

water: 13,430 sq km

note: includes Bonin Islands (Ogasawara-gunto), Daito-shoto, Minami-jima, Okino-tori-shima, Ryukyu Islands (Nansei-shoto), and Volcano Islands (Kazan-retto)

Area—comparative: slightly smaller than California

Land boundaries: 0 km

Coastline: 29,751 km

Maritime claims: territorial sea: 12 nm; between 3 nm and 12 nm in the international straits—La Perouse or Soya, Tsugaru, Osumi, and Eastern and Western Channels of the Korea or Tsushima Strait
contiguous zone: 24 nm
exclusive economic zone: 200 nm

Climate: varies from tropical in south to cool temperate in north

Terrain: mostly rugged and mountainous

Elevation extremes: lowest point: Hachirogata-4 m

highest point: Fujiyama 3,776 m

Natural resources: negligible mineral resources, fish

note: with virtually no energy natural resources, Japan is the world's largest importer of coal and liquefied natural gas, as well as the second largest importer of oil

Land use: arable land: 11.26%

permanent crops: 0.81%

other: 87.93% (2011)

Irrigated land: 25,000 sq km (2010)

Total renewable water resources: 430 cu km (2011)

Freshwater withdrawal (domestic/industrial/agricultural):

total: 90.04 cu km/yr (20%/18%/62%)

per capita: 714.3 cu m/yr (2007)

Natural hazards: many dormant and some active volcanoes; about 1,500 seismic occurrences (mostly tremors but occasional severe earthquakes) every year; tsunamis; typhoons
volcanism: both Unzen (elev. 1,500 m) and Sakura-jima (elev. 1,117 m), which lies near the densely populated city of Kagoshima, have been deemed "Decade Volcanoes" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to their explosive history and close proximity to human populations; other notable historically active volcanoes include Asama, Honshu Island's most active volcano, Aso, Bandai, Fuji, Iwo-jima, Kikai, Kirishima, Komaga-take, Oshima, Suwanosejima, Tokachi, Yake-dake, and Usu

Environment—current issues: air pollution from power plant emissions results in acid rain; acidification of lakes and reservoirs degrading water quality and threatening aquatic life; Japan is one of the largest consumers of fish and tropical timber, contributing to the depletion of these resources in Asia and elsewhere

Environment—international agreements:
party to: Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling
signed, but not ratified: none of the selected agreements

Geography—note: strategic location in northeast Asia

PEOPLE AND SOCIETY

ECONOMY

Economy—overview: In the years following World War II, government-industry cooperation, a strong work ethic, mastery of high technology, and a comparatively small defense allocation (1% of GDP) helped Japan develop a technologically advanced economy. Two notable characteristics of the post-war economy were the close interlocking structures of manufacturers, suppliers, and distributors, known as keiretsu, and the guarantee of lifetime employment for a substantial portion of the urban labor force. Both features are now eroding under the dual pressures of global competition and domestic demographic change. Japan's industrial sector is heavily dependent on imported raw materials and fuels. A small agricultural sector is highly subsidized and protected, with crop yields among the highest in the world. While self-sufficient in rice production, Japan imports about 60% of its food on a caloric basis. For three decades, overall real economic growth had been spectacular—a 10% average in the 1960s, a 5% average in the 1970s, and a 4% average in the 1980s. Growth slowed markedly in the 1990s, averaging just 1.7%, largely because of the after effects of inefficient investment and an asset price bubble in the late 1980s that required a protracted period of time for firms to reduce excess debt, capital, and labor. Modest economic growth continued after 2000, but the economy has fallen into recession three times since 2008. A sharp down turn in business investment and global demand for Japan's exports in late 2008 pushed Japan into recession. Government stimulus spending helped the economy recover in late 2009 and 2010, but the economy contracted again in 2011 as the massive 9.0 magnitude earthquake and the ensuing tsunami in March disrupted manufacturing. The economy has largely recovered in the two years since the disaster, but

reconstruction in the Tohoku region has been uneven. Newly-elected Prime Minister Shinzo ABE has declared the economy his government's top priority; he has pledged to reconsider his predecessor's plan to permanently close nuclear power plants and is pursuing an economic revitalization agenda of fiscal stimulus and regulatory reform and has said he will press the Bank of Japan to loosen monetary policy. Measured on a purchasing power parity (PPP) basis that adjusts for price differences, Japan in 2012 stood as the fourth-largest economy in the world after second-place China, which surpassed Japan in 2001, and third-place India, which edged out Japan in 2012. The new government will continue a longstanding debate on restructuring the economy and reining in Japan's huge government debt, which exceeds 200% of GDP. Persistent deflation, reliance on exports to drive growth, and an aging and shrinking population are other major long-term challenges for the economy.

TRANSNATIONAL ISSUES

Disputes—international: the sovereignty dispute over the islands of Etorofu, Kunashiri, and Shikotan, and the Habomai group, known in Japan as the "Northern Territories" and in Russia as the "Southern Kuril Islands," occupied by the Soviet Union in 1945, now administered by Russia and claimed by Japan, remains the primary sticking point to signing a peace treaty formally ending World War II hostilities; Japan and South Korea claim Liancourt Rocks (Take-shima/Tok-do) occupied by South Korea since 1954; China and Taiwan dispute both Japan's claims to the uninhabited islands of the Senkaku-shoto (Diaoyu Tai) and Japan's unilaterally declared exclusive economic zone in the East China Sea, the site of intensive hydrocarbon prospecting

JERSEY

INTRODUCTION

Background: Jersey and the other Channel Islands represent the last remnants of the medieval Duchy of Normandy that held sway in both France and England. These islands were the only British soil occupied by German troops in World War II. Jersey is a British crown dependency but is not part of the UK or of the European Union. However, the UK Government is constitutionally responsible for its defense and international representation.

Diplomatic representation from the US: none (British crown dependency)

Flag description: white with a diagonal red cross extending to the corners of the flag; in the upper quadrant, surmounted by a yellow crown, a red shield with three lions in yellow; according to tradition, the ships of Jersey—in an attempt to differentiate themselves from English ships flying the horizontal cross of St. George—rotated the cross to the "X" (saltire) configuration; because this arrangement still resembled the Irish cross of St. Patrick, the yellow Plantagenet crown and Jersey coat of arms were added

National symbol(s): Jersey cow

National anthem: name: "Isle de Siez Nous" (Island Home) lyrics/music: Gerard LE FEUVRE
note: adopted 2008; serves as a local anthem; as a British crown dependency, "God Save the Queen" is official (see United Kingdom)

ECONOMY

Economy—overview: Jersey's economy is based on international financial services, agriculture, and tourism. In 2010 the financial services sector accounted for about 50% of the island's output. Potatoes, cauliflower, tomatoes, and especially flowers are important export crops, shipped mostly to the UK. The Jersey breed of dairy cattle is known worldwide and represents an important export income earner. Milk products go to the UK and other EU countries. Tourism accounts for one-quarter of GDP. In recent years, the government has encouraged light industry to locate in Jersey with the result that an electronics industry has developed, displacing more traditional industries. All raw material and energy requirements are imported as well as a large share of Jersey's food needs. Light taxes and death duties make the island a popular tax haven. In January 2013, Jersey signed a tax agreement with Guernsey and the Isle of Man, in order to enable the islands' authorities to end tax avoidance and evasion. Living standards come close to those of the UK.

JORDAN

INTRODUCTION

Background: Following World War I and the dissolution of the Ottoman Empire, the League of Nations awarded Britain the mandate to govern much of the Middle East. Britain demarcated a semi-autonomous region of Transjordan from Palestine in the early 1920s. The area gained its

independence in 1946 and thereafter became The Hashemite Kingdom of Jordan. The country's long-time ruler, King HUSSEIN (1953-99), successfully navigated competing pressures from the major powers (US, USSR, and UK), various Arab states, Israel, and a large internal Palestinian population. Jordan lost the West Bank to Israel in the 1967 Six-Day War. King HUSSEIN in 1988 permanently relinquished Jordanian claims to the West Bank; in 1994 he signed a peace treaty with Israel. King ABDALLAH II, King HUSSEIN's eldest son, assumed the throne following his father's death in 1999. He implemented modest political and economic reforms, but in the wake of the "Arab Revolution" across the Middle East, Jordanians continue to press for further political liberalization, government reforms, and economic improvements.

note: adopted 1946; the shortened version of the anthem is used most commonly, while the full version is reserved for special occasions

Economy—overview: Jordan's economy is among the smallest in the Middle East, with insufficient supplies of water, oil, and other natural resources, underlying the government's heavy reliance on foreign assistance. Other economic challenges for the government include chronic high rates of poverty, unemployment, inflation, and a large budget deficit. Since assuming the throne in 1999, King ABDALLAH has implemented significant economic reforms, such as opening the trade regime, privatizing state-owned companies, and eliminating some fuel subsidies, which in the last decade spurred economic growth by attracting foreign investment and creating some jobs. The global economic slow down and regional turmoil, however, have depressed Jordan's GDP growth, impacting export-oriented sectors, construction, and tourism. In 2011 and 2012, the government approved two economic relief packages and a budgetary supplement, meant to improve the living conditions for the middle and poor classes. Jordan's finances have also been strained by a series of natural gas pipeline attacks in Egypt, causing Jordan to substitute more expensive diesel imports, primarily from Saudi Arabia, to generate electricity. Jordan is currently exploring nuclear power generation in addition to the exploitation of abundant oil shale reserves and renewable technologies to forestall energy shortfalls. In 2012, to correct budgetary and balance of payments imbalances, Jordan entered into a \$2.1

billion, multiple year International Monetary Fund Stand-By Arrangement. Jordan's financial sector has been relatively isolated from the international financial crisis because of its limited exposure to overseas capital markets. Jordan will continue to depend heavily on foreign assistance to finance the deficit in 2013.

KAZAKHSTAN

INTRODUCTION

Background: Ethnic Kazakhs, a mix of Turkic and Mongol nomadic tribes who migrated into the region in the 13th century, were rarely united as a single nation. The area was conquered by Russia in the 18th century, and Kazakhstan became a Soviet Republic in 1936. During the 1950s and 1960s agricultural "Virgin Lands" program, Soviet citizens were encouraged to help cultivate Kazakhstan's northern pastures. This influx of immigrants (mostly Russians, but also some other deported nationalities) skewed the ethnic mixture and enabled non-ethnic Kazakhs to outnumber natives. Non-Muslim ethnic minorities departed Kazakhstan in large numbers from the mid-1990s through the mid-2000s and a national program has repatriated about a million ethnic Kazakhs thus far back to Kazakhstan. These trends have allowed Kazakhs to become the titular majority again. This dramatic demographic shift has also undermined the previous religious diversity and made the country more than 70 percent Muslim. Kazakhstan's economy is larger than those of all the other Central Asian states largely due to the country's vast natural resources. Current issues include: developing a cohesive national identity; managing Islamic revivalism; expanding the development of the country's vast energy resources and exporting them to world markets; diversifying the economy outside the oil, gas, and mining sectors; enhancing Kazakhstan's economic competitiveness; developing a multiparty parliament and advancing political and social reform; and strengthening relations with neighboring states and other foreign powers.

GEOGRAPHY

Location: Central Asia, northwest of China; a small portion west of the Ural (Zhayyq) River in eastern-most Europe

Geographic coordinates: 48 00 N, 68 00 E

Map references: Asia

Area: total: 2,724,900 sq km
country comparison to the world: 9
land: 2,699,700 sq km
water: 25,200 sq km

Area—comparative: slightly less than four times the size of Texas

Land boundaries: total: 12,185 km
border countries: China 1,533 km, Kyrgyzstan 1,224 km, Russia 6,846 km, Turkmenistan 379 km, Uzbekistan 2,203 km

Coastline: 0 km (landlocked); note—Kazakhstan borders the Aral Sea, now split into two bodies of water (1,070 km), and the Caspian Sea (1,894 km)

Maritime claims: none (landlocked)

Climate: continental, cold winters and hot summers, arid and semiarid

Terrain: vast flat steppe extending from the Volga in the west to the Altai Mountains in the east and from the plains of western Siberia in the north to oases and deserts of Central Asia in the south

Elevation extremes: lowest point: Vpadina Kaundy-132 m

highest point: Khan Tangiri Shyngy (Pik Khan-Tengri) 6,995 m

Natural resources: major deposits of petroleum, natural gas, coal, iron ore, manganese, chrome ore, nickel, cobalt, copper, molybdenum, lead, zinc, bauxite, gold, uranium

Land use: arable land: 8.82%

permanent crops: 0.03%

other: 91.15% (2011)

Irrigated land: 20,660 sq km (2010)

Total renewable water resources: 107.5 cu km (2011)

Freshwater withdrawal (domestic/industrial/agricultural): total: 21.14 cu km/yr (4%/30%/66%)

per capita: 1,304 cu m/yr (2010)

Natural hazards: earthquakes in the south; mudslides around Almaty

Environment—current issues: radioactive or toxic chemical sites associated with former defense industries and test ranges scattered throughout the country pose health risks for humans and animals; industrial pollution is severe in some cities; because the two main rivers that flowed into the Aral Sea have been diverted for irrigation, it is drying up and leaving behind a harmful layer of chemical pesticides and natural salts; these substances are then picked up by the wind and blown into noxious dust storms; pollution in the Caspian Sea; soil pollution from overuse of agricultural chemicals and salination from poor infrastructure and wasteful irrigation practices

Environment—international agreements: party to: Air Pollution, Biodiversity, Climate Change, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Ozone Layer Protection, Ship Pollution, Wetlands signed, but not ratified: Climate Change-Kyoto Protocol

Geography—note: landlocked; Russia leases approximately 6,000 sq km of territory enclosing the Baykonur Cosmodrome; in January 2004, Kazakhstan and Russia extended the lease to 2050

Flag description: a gold sun with 32 rays above a soaring golden steppe eagle, both centered on a sky blue background; the hoist side displays a national ornamental pattern "koshkar-muiz" (the horns of the ram) in gold; the blue color is of religious significance to the Turkic peoples of the country, and so symbolizes cultural and ethnic unity; it also represents the endless sky as well as water; the sun, a source of life and energy, exemplifies wealth and plenitude; the sun's rays are shaped like grain, which is the basis of abundance and prosperity; the eagle has appeared on the flags of Kazakh tribes for centuries and represents freedom, power, and the flight to the future

National symbol(s): golden eagle

National anthem: name: "Menin Qazaqstanım" (My Kazakhstan)

lyrics/music: Zhumeken NAZHIMEDENOV and Nursultan NAZARBAYEV/Shamshi KALDAYAKOV

note: adopted 2006; President Nursultan NAZARBAYEV played a role in revising the lyrics

ECONOMY

Economy—overview: Kazakhstan, geographically the largest of the former Soviet republics, excluding Russia, possesses enormous fossil fuel reserves and plentiful supplies of other minerals and metals, such as uranium, copper, and zinc. It also has a large agricultural sector featuring livestock and grain. In 2002 Kazakhstan became the first country in the former Soviet Union to receive an investment-grade credit rating. Extractive industries have been and will continue to be the engine of Kazakhstan's growth, although the country is aggressively pursuing diversification strategies. Landlocked, with restricted access to the high seas, Kazakhstan relies on its neighbors to export its products, especially oil and grain. Although its Caspian Sea ports, pipelines, and rail lines carrying oil have been upgraded, civil aviation and roadways continue to need attention. Telecoms are improving, but require considerable investment, as does the information technology base. Supply and distribution of electricity can be erratic because of regional dependencies, but the country is moving forward with plans to improve reliability of electricity and gas supply to its population. At the end of 2007, global financial markets froze up and the loss of capital inflows to Kazakhstani banks caused a credit crunch. The subsequent and sharp fall of oil and commodity prices in 2008 aggravated the economic situation, and Kazakhstan plunged into recession. While the global financial crisis took a significant toll on Kazakhstan's economy, it has rebounded well, helped by prudent government measures. GDP increased 7.5% year-on-year in 2011, and 5.0% in 2012. Rising commodity prices have helped the recovery. Despite solid macroeconomic indicators, the government realizes that its economy suffers from an overreliance on oil and extractive industries, the so-called "Dutch disease." In response, Kazakhstan has embarked on an ambitious diversification program, aimed at developing targeted sectors like transport, pharmaceuticals, telecommunications, petrochemicals and food processing. In 2010 Kazakhstan joined the Belarus-Kazakhstan-Russia Customs Union in an effort to boost foreign investment and improve trade relationships and is planning to accede to the World Trade Organization in 2013.

KENYA

INTRODUCTION

Background: Founding president and liberation struggle icon Jomo KENYATTA led Kenya from independence in 1963 until his death in 1978, when President Daniel MOI took power in a constitutional succession. The country was a de facto one-party state from 1969 until 1982 when the ruling Kenya African National Union (KANU) made itself the sole legal party in Kenya. MOI acceded to internal and external pressure for political liberalization in late 1991. The ethnically fractured opposition failed to dislodge KANU from power in elections in 1992 and 1997, which were marred by violence and fraud, but were viewed as having generally reflected the will of the Kenyan people. President MOI stepped down in December 2002 following fair and peaceful elections. Mwai KIBAKI, running as the candidate of the multi-ethnic, united opposition group, the National Rainbow Coalition (NARC), defeated KANU candidate Uhuru KENYATTA and assumed the presidency following a campaign centered on an anticorruption platform. KIBAKI's NARC coalition splintered in 2005 over a constitutional review process. Government defectors joined with KANU to form a new opposition coalition, the Orange Democratic Movement (ODM), which defeated the government's draft constitution in a popular referendum in November 2005. KIBAKI's reelection in December 2007 brought charges of vote rigging from ODM candidate Raila ODINGA and unleashed two months of violence in which as many as 1,500 people died. African Union-sponsored mediation led by former UN Secretary General Kofi ANNAN in late February 2008 resulted in a power-sharing accord bringing ODINGA into the government in the restored position of prime minister. The power sharing accord included a broad reform agenda, the centerpiece of which was constitutional reform. In August 2010, Kenyans overwhelmingly adopted a new constitution in a national referendum. The new constitution introduced additional checks and balances to executive power and significant devolution of power and resources to 47 newly created counties. It also eliminated the position of prime minister following the first presidential election under the new constitution, which occurred on March 4, 2013. Uhuru KENYATTA, the son of founding president

Jomo KENYATTA, won the March elections in the first round by a close margin and was sworn into office on 9 April 2013.

ECONOMY

Economy—overview: Kenya has been hampered by corruption and by reliance upon several primary goods whose prices have remained low. Low infrastructure investment threatens Kenya's long-term position as the largest East African economy. In the key December 2002 elections, Daniel MOI's 24-year-old reign ended, and a new opposition government took on the formidable economic problems facing the nation. After some early progress in rooting out corruption and encouraging donor support, the KIBAKI government was rocked by high-level graft scandals in 2005 and 2006. In 2006, the World Bank and IMF delayed loans pending action by the government on corruption. The international financial institutions and donors have since resumed lending, despite little action on the government's part to deal with corruption. Unemployment is very high. The country has experienced chronic budget deficits, inflationary pressures, and sharp currency depreciation—as a result of high food and fuel import prices. The discovery of oil in March 2012 provides an opportunity for Kenya to balance its growing trade deficit if the deposits are found to be commercially viable and Kenya is able to develop a port and pipeline to export its oil.

TRANSNATIONAL ISSUES

Disputes—International: Kenya served as an important mediator in brokering Sudan's north-south separation in February 2005; Kenya provides shelter to almost a quarter million refugees, including Ugandans who flee across the border periodically to seek protection from Lord's Resistance Army rebels; Kenya works hard to prevent the clan and militia fighting in Somalia from spreading across the border, which has long been open to nomadic pastoralists; the boundary that separates Kenya's and Sudan's sovereignty is unclear in the "Ilemi Triangle," which Kenya has administered since colonial times

Refugees and internally displaced persons: *refugees (country of origin):* 34,800 (South Sudan); 34,000 (Ethiopia); 11,500 (Democratic Republic of Congo); 6,000 (Sudan) (2012); 492,905 (Somalia) (2013)
IDPs: at least 300,000 (2007-2008 post-election violence; the status of the estimated 300,000 IDPs from the 2007-08 post-election violence who found refuge in host communities rather than camps—and IDPs displaced through natural disasters, drought, development and environmental projects, land disputes, cattle rustling, and inter-communal violence—is not captured in Kenya's national database; in 2012, inter-communal violence displaced approximately 118,000 people and floods displaced an estimated 100,000) (2012)

Illicit drugs: widespread harvesting of small plots of marijuana; transit country for South Asian heroin destined for Europe and North America; Indian methaqualone also transits on way to South Africa; significant potential for money-laundering activity given the country's status as a regional financial center; massive corruption, and relatively high levels of narcotics-associated activities

KIRIBATI

INTRODUCTION

Background: The Gilbert Islands became a British protectorate in 1892 and a colony in 1915; they were captured by the Japanese in the Pacific War in 1941. The islands of Makin and Tarawa were the sites of major US amphibious victories over entrenched Japanese garrisons in 1943. The Gilbert Islands were granted self-rule by the UK in 1971 and complete independence in 1979 under the new name of Kiribati. The US relinquished all claims to the sparsely inhabited Phoenix and Line Island groups in a 1979 treaty of friendship with Kiribati.

GEOGRAPHY

Location: Oceania, group of 33 coral atolls in the Pacific Ocean, straddling the Equator, as well as the International Date Line; the capital Tarawa is about half way between Hawaii and Australia

Geographic coordinates: 1 25 N, 173 00 E

Map references: Oceania

Area: total: 811 sq km

country comparison to the world: 187

land: 811 sq km water: 0 sq km

note: includes three island groups—Gilbert Islands, Line Islands, Phoenix Islands

Area—comparative: four times the size of Washington, DC

Land boundaries: 0 km

Coastline: 1,143 km

Maritime claims: territorial sea: 12 nm

exclusive economic zone: 200 nm

Climate: tropical; marine, hot and humid, moderated by trade winds

Terrain: mostly low-lying coral atolls surrounded by extensive reefs

Elevation extremes: lowest point: Pacific Ocean 0 m

highest point: unnamed elevation on Banaba 81 m

Natural resources: phosphate (production discontinued in 1979)

Land use: arable land: 2.47%

permanent crops: 39.51%

other: 58.02% (2011)

Irrigated land: NA

Natural hazards: typhoons can occur any time, but usually November to March; occasional tornadoes; low level of some of the islands make them sensitive to changes in sea level

Environment—current issues: heavy pollution in lagoon of south Tarawa atoll due to heavy migration mixed with traditional practices such as lagoon latrines and open-pit dumping; ground water at risk

Environment—international agreements: party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Whaling
signed, but not ratified: none of the selected agreements

Geography—note: 21 of the 33 islands are inhabited; Banaba (Ocean Island) in Kiribati is one of the three great phosphate rock islands in the Pacific Ocean—the others are Makatea in French Polynesia, and Nauru; Kiribati is the only country in the world to fall into all four hemispheres (northern, southern, eastern, and western)

ECONOMY

Economy—overview: A remote country of 33 scattered coral atolls, Kiribati has few natural resources and is one of the least developed Pacific Islands. Commercially viable phosphate deposits were exhausted at the time of independence from the UK in 1979. Copra and fish now represent the bulk of production and exports. The economy has fluctuated widely in recent years. Economic development is constrained by a shortage of skilled workers, weak infrastructure, and remoteness from international markets. Tourism provides more than one-fifth of GDP. Private sector initiatives and a financial sector are in the early stages of development. Foreign financial aid from the EU, UK, US, Japan, Australia, New Zealand, Canada, UN agencies, and Taiwan accounts for 20-25% of GDP. Remittances from seamen on merchant ships abroad account for more than \$5 million each year. Kiribati receives around \$15 million annually for the government budget from an Australian trust fund.

KOREA, NORTH

INTRODUCTION

Background: An independent kingdom for much of its long history, Korea was occupied by Japan beginning in 1905 following the Russo-Japanese War. Five years later, Japan formally annexed the entire peninsula. Following World War II, Korea was split with the northern half coming under Soviet-sponsored Communist control. After failing in the Korean War (1950-53) to conquer the US-backed Republic of Korea (ROK) in the southern portion by force, North Korea (DPRK), under its founder President KIM Il Sung, adopted a policy of ostensible diplomatic and economic "self-reliance" as a check against outside influence. The DPRK demonized the US as the ultimate threat to its social system through state-funded propaganda, and molded political, economic, and military policies around the core ideological objective of

eventual unification of Korea under Pyongyang's control. KIM Il Sung's son, KIM Jong Il, was officially designated as his father's successor in 1980, assuming a growing political and managerial role until the elder KIM's death in 1994. KIM Jong Un was publicly unveiled as his father's successor in September 2010. Following KIM Jong Il's death in December 2011, the regime began to take actions to transfer power to KIM Jong Un and KIM has now assumed many of his father's former titles and duties. After decades of economic mismanagement and resource misallocation, the DPRK since the mid-1990s has relied heavily on international aid to feed its population. The DPRK began to ease restrictions to allow semi-private markets, starting in 2002, but then sought to roll back the scale of economic reforms in 2005 and 2009. North Korea's history of regional military provocations; proliferation of military-related items; long-range

missile development; WMD programs including tests of nuclear devices in 2006, 2009, and 2013; and massive conventional armed forces are of major concern to the international community.

ECONOMY

Economy—overview: North Korea, one of the world's most centrally directed and least open economies, faces chronic economic problems. Industrial capital stock is nearly beyond repair as a result of years of underinvestment, shortages of spare parts, and poor maintenance. Large-scale military spending draws off resources needed for investment and civilian consumption. Industrial and power output have stagnated for years at a fraction of pre-1990 levels. Frequent weather-related crop failures aggravated chronic food shortages caused by on-going systemic problems, including a lack of arable land, collective farming practices, poor soil quality, insufficient fertilization, and persistent shortages of tractors and fuel. Large-scale international food aid deliveries as well as aid from China has allowed the people of North Korea to escape widespread starvation since famine threatened in 1995, but the population continues to suffer from prolonged malnutrition and poor living conditions. Since 2002, the government has allowed private "farmers" markets to begin selling a wider range of goods. It also permitted some private farming—on an experimental basis—in an effort to boost agricultural output. In December 2009, North Korea carried out a redenomination of its currency, capping the amount of North Korean won that could be exchanged for the new notes, and limiting the exchange to a one-week window. A concurrent crackdown on markets and foreign currency use yielded severe shortages and inflation, forcing Pyongyang to ease the restrictions by February 2010. In response to the sinking of the South Korean destroyer Cheonan and the shelling of Yeonpyeong Island, South Korea's government cut off most aid, trade, and bilateral cooperation activities, with the exception of operations at the Kaesong Industrial Complex. In 2012, KIM Jong Un's first year of leadership, the North displayed increased focus on the economy by renewing its commitment to special economic zones with China, negotiating a new payment structure to settle its \$11 billion Soviet-era debt to Russia, and purportedly proposing new agricultural and industrial policies to boost domestic production. The North Korean government often highlights its goal of becoming a "strong and prosperous" nation and attracting foreign investment, a key factor for improving the overall standard of living. Nevertheless, firm political control remains the government's overriding concern, which likely will inhibit fundamental reforms of North Korea's current economic system.

TRANSNATIONAL ISSUES

Disputes—international: risking arrest, imprisonment, and deportation, tens of thousands of North Koreans cross into China to escape famine, economic privation, and political oppression; North Korea and China dispute the sovereignty of certain islands in Yalu and Tumen rivers; Military Demarcation Line within the 4-km-wide Demilitarized Zone has separated North from South Korea since 1953; periodic incidents in the Yellow Sea with South Korea which claims the Northern Limiting Line as a maritime boundary; North Korea supports South Korea in rejecting Japan's claim to Liancourt Rocks (Tok-do/Take-shima)

Refugees and internally displaced persons: IDPs: undetermined (periodic flooding and famine during mid-1990s) (2007)

Trafficking in persons: current situation: North Korea is a source country for men, women, and children trafficked for the purposes of forced labor and commercial sexual exploitation; the most common form of trafficking involves North Korean women and girls who cross the border into China voluntarily; additionally, North Korean women and girls are lured out of North Korea to escape poor social and economic conditions by the promise of food, jobs, and freedom, only to be forced into prostitution, marriage, or exploitative labor arrangements once in China; within the country, North Koreans do not have a choice in the work the government assigns them and are not free to change jobs at will
tier rating: Tier 3—North Korea does not fully comply with minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government does not acknowledge the existence of human rights abuses in the country or recognize trafficking, either within the country or transnationally (2008)

Illicit drugs: for years, from the 1970s into the 2000s, citizens of the Democratic People's Republic of (North) Korea (DPRK), many of them diplomatic employees of the government, were

apprehended abroad while trafficking in narcotics, including two in Turkey in December 2004; police investigations in Taiwan and Japan in recent years have linked North Korea to large

illicit shipments of heroin and methamphetamine, including an attempt by the North Korean merchant ship Pong Su to deliver 150 kg of heroin to Australia in April 2003

KOREA, SOUTH

INTRODUCTION

Background: An independent kingdom for much of its long history, Korea was occupied by Japan beginning in 1905 following the Russo-Japanese War. In 1910, Tokyo formally annexed the entire Peninsula. Korea regained its independence following Japan's surrender to the United States in 1945. After World War II, a democratic-based government (Republic of Korea, ROK) was set up in the southern half of the Korean Peninsula while a Communist-style government was installed in the north (Democratic People's Republic of Korea, DPRK). During the Korean War (1950-53), U.S. troops and UN forces fought alongside ROK soldiers to defend South Korea from a DPRK invasion supported by China and the Soviet Union. A 1953 armistice split the peninsula along a demilitarized zone at about the 38th parallel. PARK Chung-hee took over leadership of the country in a 1961 coup. During his regime, from 1961 to 1979, South Korea achieved rapid economic growth, with per capita income rising to roughly 17 times the level of North Korea. South Korea held its first free presidential election under a revised democratic constitution in 1987, with former ROK Army general ROH Tae-woo winning a close race. In 1993, KIM Young-sam (1993-98) became South Korea's first civilian president. South Korea today is a fully functioning modern democracy. LEE Myung-bak (2008-2013) pursued a policy of global engagement, highlighted by Seoul's hosting of the G-20 summit in November 2010 and the Nuclear Security Summit in March 2012. South Korea also secured a non-permanent seat (2013-14) on the UN Security Council and will host the 2018 Winter Olympic Games. President PARK Geun-hye took office in February 2013 and is South Korea's first female leader. Serious tensions with North Korea have punctuated inter-Korean relations in recent years, including the North's sinking of the South Korean warship Cheonan in March 2010 and its artillery attack on South Korean soldiers

and citizens in November 2010. In January 2013, assumed a nonpermanent seat on the UN Security Council for the 2013-14 term.

note: adopted 1948, well known by 1910; both North Korea and South Korea's anthems share the same name and have a vaguely similar melody but have different lyrics

ECONOMY

Economy—overview: South Korea over the past four decades has demonstrated incredible growth

and global integration to become a high-tech industrialized economy. In the 1960s, GDP per capita was comparable with levels in the poorer countries of Africa and Asia. In 2004, South Korea joined the trillion dollar club of world economies, and is currently the world's 12th largest economy. Initially, a system of close government and business ties, including directed credit and import restrictions, made this success possible. The government promoted the import of raw materials and technology at the expense of consumer goods, and encouraged savings and investment over consumption. The Asian financial crisis of 1997-98 exposed longstanding weaknesses in South Korea's development model including high debt/equity ratios and massive short-term foreign borrowing. GDP plunged by 6.9% in 1998, and then recovered by 9% in 1999-2000. Korea adopted numerous economic reforms following the crisis, including greater openness to foreign investment and imports. Growth moderated to about 4% annually between 2003 and 2007. Korea's export focused economy was hit hard by the 2008 global economic downturn, but quickly rebounded in subsequent years, reaching 6.3% growth in 2010. The US-South Korea Free Trade Agreement was ratified by both governments in 2011 and went into effect in March 2012. Throughout 2012 the economy experienced sluggish growth because of market slowdowns in the United States, China, and the Eurozone. The incoming administration in 2013, following the December 2012 presidential election, is likely to face the challenges of balancing heavy reliance on exports with developing domestic-oriented sectors, such as services. The South Korean economy's long term challenges include a rapidly aging population, inflexible labor market, and heavy reliance on exports—which comprise half of GDP.

KOSOVO

INTRODUCTION

Background: The central Balkans were part of the Roman and Byzantine Empires before ethnic Serbs migrated to the territories of modern Kosovo in the 7th century. During the medieval period, Kosovo became the center of a Serbian Empire and saw the construction of many important Serb religious sites, including many architecturally significant Serbian Orthodox monasteries. The defeat of Serbian forces at the Battle of Kosovo in 1389 led to five centuries of Ottoman rule during which large numbers of Turks and Albanians moved to Kosovo. By the end of the 19th century, Albanians replaced the Serbs as the dominant ethnic group in Kosovo. Serbia reacquired control over Kosovo from the Ottoman Empire during the First Balkan

War of 1912. After World War II, Kosovo became an autonomous province of Serbia in the Socialist Federal Republic of Yugoslavia (S.F.R.Y.) with status almost equivalent to that of a republic under the 1974 S.F.R.Y. constitution. Despite legislative concessions, Albanian nationalism increased in the 1980s, which led to riots and calls for Kosovo's independence. At the same time, Serb nationalist leaders, such as Slobodan MILOSEVIC, exploited Kosovo Serb claims of maltreatment to secure votes from supporters, many of whom viewed Kosovo as their cultural heartland. Under MILOSEVIC'S leadership, Serbia instituted a new constitution in 1989 that revoked Kosovo's status as an autonomous province of Serbia. Kosovo's Albanian leaders responded in 1991 by organizing a referendum that declared Kosovo independent.

Under MILOSEVIC, Serbia carried out repressive measures against the Kosovar Albanians in the early 1990s as the unofficial Kosovo government, led by Ibrahim RUGOVA, used passive resistance in an attempt to try to gain international assistance and recognition of an independent Kosovo. Albanians dissatisfied with RUGOVA's passive strategy in the 1990s created the Kosovo Liberation Army and launched an insurgency. Starting in 1998, Serbian military, police, and paramilitary forces under MILOSEVIC conducted a brutal counterinsurgency campaign that resulted in massacres and massive expulsions of ethnic Albanians. Approximately 800,000 Albanians were forced from their homes in Kosovo during this time. International attempts to mediate the conflict failed, and MILOSEVIC'S rejection of a proposed settlement led to

a three-month NATO military operation against Serbia beginning in March 1999 that forced Serbia to agree to withdraw its military and police forces from Kosovo. UN Security Council Resolution 1244 (1999) placed Kosovo under a transitional administration, the UN Interim Administration Mission in Kosovo (UNMIK), pending a determination of Kosovo's future status. A UN-led process began in late 2005 to determine Kosovo's final status. The negotiations ran in stages between 2006 and 2007, but ended without agreement between Belgrade and Pristina. On 17 February 2008, the Kosovo Assembly declared Kosovo independent. Since then, over 95 countries have recognized Kosovo, and it has joined the International Monetary Fund, World Bank, and European Bank for Reconstruction and Development, and is in the process of signing a framework agreement with the European Investment Bank (EIB). In October 2008, Serbia sought an advisory opinion from the International Court of Justice (ICJ) on the legality under international law of Kosovo's declaration of independence. The ICJ released the advisory opinion in July 2010 affirming that Kosovo's declaration of independence did not violate general principles of international law, UN Security Council Resolution 1244, or the Constitutive Framework. The opinion was closely tailored to Kosovo's unique history and circumstances. Serbia continues to reject Kosovo's independence, but the two countries are currently engaged in an EU-facilitated dialogue aimed at normalizing the countries' relations.

ECONOMY

Economy—overview: Over the past few years Kosovo's economy has shown significant progress in transitioning to a market-based system and maintaining macroeconomic stability, but it is still highly dependent on the international community and the diaspora for financial and technical assistance. Remittances from the diaspora—located mainly in Germany, Switzerland, and the Nordic countries—are estimated to account for about 14% of GDP, and donor-financed activities and aid for approximately 10%. Kosovo's citizens are the poorest in Europe with an average annual per capita income (PPP) of \$7,400. Unemployment, around 45%, is a significant problem that encourages outward migration and a significant informal, unreported economy. Most of Kosovo's population lives in rural towns outside of the capital, Pristina. Inefficient, near-subsistence farming is common—the result of small plots, limited mechanization, and lack of technical expertise. With international assistance, Kosovo has been able to privatize a majority of its state-owned enterprises. Minerals and metals—including lignite, lead, zinc, nickel, chrome, aluminum, magnesium, and a wide variety of construction materials—once formed the backbone of industry, but output has declined because of ageing equipment and insufficient investment. A limited and unreliable electricity supply due to technical and financial problems is a major impediment to economic development, but Kosovo has received technical assistance to help improve accounting and controls and, in 2012, privatized its distribution network. The US Government is cooperating with the Ministry for Energy and Mines and the World Bank to prepare commercial tenders for the construction of a new power plant, rehabilitation of an old plant, and the development of a coal mine that could supply both. In July 2008, Kosovo received pledges of \$1.9 billion from 37 countries in support of its reform priorities, but the global financial crisis has limited this assistance and also negatively affected remittance inflows. In June 2009, Kosovo joined the World Bank and International Monetary Fund, and Kosovo began servicing its share of the former Yugoslavia's debt. In order to help integrate Kosovo into regional economic structures, UNMIK signed (on behalf of Kosovo) its accession to the Central Europe Free Trade Area (CEFTA) in 2006. Serbia and Bosnia previously had refused to recognize Kosovo's customs stamp or extend reduced tariff privileges for Kosovo products under CEFTA, but both countries resumed trade with Kosovo in 2011. The official currency of Kosovo is the euro, but the Serbian dinar is also

used illegally in Serb enclaves. Kosovo's tie to the euro has helped keep core inflation low. Kosovo maintained a budget surplus until 2011, when government expenditures climbed sharply.

KUWAIT

INTRODUCTION

Background: Britain oversaw foreign relations and defense for the ruling Kuwaiti AL-SABAH dynasty from 1899 until independence in 1961. Kuwait was attacked and overrun by Iraq on 2

August 1990. Following several weeks of aerial bombardment, a US-led, UN coalition began a ground assault on 23 February 1991 that liberated Kuwait in four days. Kuwait spent more than \$5 billion to repair oil infrastructure damaged during 1990-91. The AL-SABAH family has ruled since returning to power in 1991 and reestablished an elected legislature that in recent years has become increasingly assertive. The country witnessed the historic election in May 2009 of four women to its National Assembly. Amid the 2010-11 uprisings and protests across the Arab world, stateless Arabs, known as bidoon, staged small protests in February and March 2011 demanding citizenship, jobs, and other benefits available to Kuwaiti nationals. Youth activist groups—supported by opposition legislators and the prime minister's rivals within the ruling family—rallied repeatedly in 2011 for an end to corruption and the ouster of the prime minister and his cabinet. Opposition legislators forced the prime minister to resign in late 2011. In October-December 2012, Kuwait witnessed unprecedented protests in response to the Amir's changes to the electoral law by decree reducing the number of votes per

person from four to one. The opposition, led by a coalition of Sunni Islamists, tribalists, some liberals, and myriad youth groups, boycotted the December 2012 legislative election, resulting in a historic number of Shia candidates winning seats. Since 2006, the Amir has dissolved the National Assembly on five occasions (the Constitutional Court annulled the Assembly once in June 2012) and reshuffled the cabinet 12 times, usually citing political stagnation and gridlock between the legislature and the government.

ECONOMY

Economy—overview: Kuwait has a geographically small, but wealthy, relatively open economy with crude oil reserves of about 102 billion barrels—about 7% of world reserves. Petroleum accounts for nearly half of GDP, 95% of export revenues, and 95% of government income. Kuwaiti officials have committed to increasing oil production to 4 million barrels per day by 2020. The rise in global oil prices throughout 2011 and

2012 is reviving government consumption and economic growth. Kuwait has experienced a 20% increase in government budget revenue, which has led to higher budget expenditures, particularly wage hikes for many public sector employees. Kuwait has done little to diversify its economy, in part, because of this positive fiscal situation, and, in part, due to the poor business climate and the historically acrimonious relationship between the National Assembly and the executive branch, which has stymied most movement on economic reforms. In 2010, Kuwait passed an economic development plan that pledges to spend up to \$130 billion over five years to diversify the economy away from oil, attract more investment, and boost private sector participation in the economy.

TRANSNATIONAL ISSUES

Disputes—international: Kuwait and Saudi Arabia continue negotiating a joint maritime boundary with Iran; no maritime boundary exists with Iraq in the Persian Gulf

Trafficking in persons: *current situation:* Kuwait is a destination country for men and women subjected to forced labor and, to a lesser degree, forced prostitution; men and women migrate from India, Egypt, Bangladesh, Syria, Pakistan, the Philippines, Sri Lanka, Indonesia, Nepal, Iran, Jordan, Ethiopia, and Iraq to work in Kuwait, most of them in the domestic service, construction, and sanitation sectors; although most of these migrants enter Kuwait voluntarily, upon arrival some are subjected to conditions of forced labor by their sponsors and labor agents, including nonpayment of wages, long working hours without rest, deprivation of food, threats, physical or sexual abuse, and restrictions on movement, such as the withholding of passports or confinement to the workplace
tier rating: Tier 3—Kuwait does not fully comply with the minimum standards for the elimination of trafficking and is not making sufficient efforts to do so; the government did not enact its draft comprehensive anti-trafficking law; Kuwait's victim-protection measures remain weak, particularly due to its lack of proactive victim-identification procedures and continued reliance on the sponsorship system, which causes victims of trafficking to be punished for immigration violations rather than protected (2009)

KYRGYZSTAN

INTRODUCTION

Background: A Central Asian country of incredible natural beauty and proud nomadic traditions, most of Kyrgyzstan was formally annexed to Russia in 1876. The Kyrgyz staged a major revolt against the Tsarist Empire in 1916 in which almost one-sixth of the Kyrgyz population was killed. Kyrgyzstan became a Soviet republic in 1936 and achieved independence in 1991 when the USSR dissolved. Nationwide demonstrations in the spring of 2005 resulted in the ouster of President Askar AKAIEV, who had run the country since 1990. Subsequent presidential elections in July 2005 were won overwhelmingly by former prime minister Kurmanbek BAKIEV. Over the next few years, the new president manipulated the parliament to accrue new powers for himself. In July 2009, after months of harassment against his opponents and media critics, BAKIEV won re-election in a presidential campaign that the international community deemed flawed. In April 2010, violent protests in Bishkek led to the collapse of the BAKIEV regime and his eventual fleeing to Minsk, Belarus. His successor, Roza OTUNBAEVA, served as transitional president until Almazbek ATAMBAEV was inaugurated in December 2011. Continuing concerns include: the trajectory of democratization, endemic corruption, poor interethnic relations, and terrorism.

ECONOMY

Economy—overview: Kyrgyzstan is a poor, mountainous country with a dominant agricultural sector. Cotton, tobacco, wool, and meat are the main agricultural products, although only tobacco and cotton are exported in any quantity. Industrial exports include gold, mercury, uranium, natural gas, and electricity. The economy depends heavily on gold exports—mainly from output at the Kumtor gold mine—and on remittances from Kyrgyzstani migrant workers primarily in Russia. Following independence, Kyrgyzstan was progressive in carrying out market reforms, such as an improved regulatory system and land reform. Kyrgyzstan was the first Commonwealth of Independent States (CIS) country to be accepted into the World Trade Organization. Much of the government's stock in enterprises has been sold. Drops in production had been severe after the breakup of the Soviet Union in December 1991, but by mid-1995, production began to recover and exports began to increase. In 2005, the BAKIEV government and international financial institutions initiated a comprehensive medium-term poverty reduction and economic growth strategy. The government made steady strides in controlling its substantial fiscal deficit, nearly closing the gap between revenues and expenditures in 2006, before boosting expenditures more than 20% in 2007-08. GDP grew about 8% annually in 2007-08, partly due to higher gold prices internationally, but slowed to 2.9% in 2009. The overthrow of President BAKIEV in April 2010 and subsequent ethnic clashes left hundreds dead and damaged infrastructure. Shrinking trade and agricultural production, as well as the political instability caused by the change in government, caused GDP to contract 0.5% in 2010. The fiscal deficit widened to 11% of GDP in 2010, reflecting significant increases in crisis-related spending, including both rehabilitation of damaged infrastructure and bank recapitalization. The economy grew 5.7% in 2011, but slowed to around 1% in 2012, primarily due to an 83% decrease in production from Kumtor. As a result, the budget deficit increased at year's end. Progress in fighting corruption, improving transparency in licensing, business permits and taxations, restructuring domestic industry, and attracting foreign aid and investment are key to future growth.

LAOS

INTRODUCTION

Background: Modern-day Laos has its roots in the ancient Lao kingdom of Lan Xang, established in the 14th century under King FA NGUM. For 300 years Lan Xang had influence reaching into present-day Cambodia and Thailand, as well as over all of what is now Laos. After centuries of gradual decline, Laos came under the domination of Siam (Thailand) from the late 18th century until the late 19th century when it became part of French Indochina. The Franco-Siamese Treaty of 1907 defined the current Lao border with Thailand. In 1975, the Communist Pathet Lao took control of the government ending a six-century-old monarchy and instituting a strict socialist regime closely aligned to Vietnam. A gradual, limited return to private enterprise and the liberalization of foreign investment laws began in 1988. Laos became a member of ASEAN in 1997 and the WTO in 2013.

ECONOMY

Economy—overview: The government of Laos, one of the few remaining one-party communist states, began decentralizing control and encouraging private enterprise in 1986. The results, starting from an extremely low base, were striking—growth averaged 6% per year from 1988-2008 except during the short-lived drop caused by the Asian financial crisis that began in 1997. Laos' growth

exceeded 7% per year during 2008-12. Despite this high growth rate, Laos remains a country with an underdeveloped infrastructure, particularly in rural areas. It has a basic, but improving, road system, and limited external and internal land-line telecommunications. Electricity is available 75% of the country. Laos' economy is heavily dependent on capital-intensive natural resource exports. The labor force, however, still relies on agriculture, dominated by rice cultivation in low land areas, which accounts for about 30% of GDP and 75% of total employment. Economic growth has reduced official poverty rates from 46% in 1992 to 26% in 2010. The economy also has benefited from high-profile foreign direct investment in hydropower, copper and gold mining, logging, and construction though some projects in these industries have drawn criticism for their environmental impacts. Laos gained Normal Trade Relations status with the US in 2004. On the fiscal side, Laos initiated a VAT tax system in 2010. Simplified investment procedures and expanded bank credits for small farmers and small entrepreneurs will improve Laos' economic prospects. The government appears committed to raising the country's profile among investors, opening the country's first stock exchange in 2011 and participating in regional economic cooperation initiatives. Laos was admitted to the WTO in 2012. The World Bank has declared that Laos' goal of graduating from the UN Development Program's list of least-developed countries by 2020 is achievable.

female: 73,038 (2010 est.)

Military expenditures: 0.2% of GDP (2012)
country comparison to the world: 168

Military—note: serving one of the world's least developed countries, the Lao People's Armed Forces (LPAF) is small, poorly funded, and ineffectively resourced; its mission focus is border and

internal security, primarily in countering ethnic Hmong insurgent groups; together with the Lao People's Revolutionary Party and the government, the Lao People's Army (LPA) is the third pillar of state machinery, and as such is expected to suppress political and civil unrest and similar national emergencies, but the LPA also has upgraded skills to respond to avian influenza outbreaks; there is no perceived external threat to the state and the LPA maintains strong ties with the neighboring Vietnamese military (2008)

TRANSNATIONAL ISSUES

Disputes—international: southeast Asian states have enhanced border surveillance to check the

spread of avian flu; talks continue on completion of demarcation with Thailand but disputes remain over islands in the Mekong River; concern among Mekong River Commission members that China's construction of dams on the Mekong River and its tributaries will affect water levels; Cambodia and Vietnam are concerned about Laos' extensive upstream dam construction

Illicit drugs: estimated opium poppy cultivation in 2008 was 1,900 hectares, about a 73% increase from 2007; estimated potential opium production in 2008 more than tripled to 17 metric tons; unsubstantiated reports of domestic methamphetamine production; growing domestic methamphetamine problem (2007)

LATVIA

INTRODUCTION

Background: The name "Latvia" originates from the ancient Latgalians, one of four eastern Baltic tribes that formed the ethnic core of the Latvian people (ca. 8th-12th centuries A.D.). The region subsequently came under the control of Germans, Poles, Swedes, and finally, Russians. A Latvian republic emerged following World War I, but it was annexed by the USSR in 1940—an action never recognized by the US and many other countries. Latvia reestablished its independence in 1991 following the breakup of the Soviet Union. Although the last Russian troops left in 1994, the status of the Russian minority (some 28% of the population) remains of concern to Moscow. Latvia joined both NATO and the EU in the spring of 2004.

GEOGRAPHY

ECONOMY

Economy—overview: Latvia is a small, open economy with exports contributing nearly a third of GDP. Due to its geographical location, transit services are highly-developed, along with timber and wood-processing, agriculture and food products, and manufacturing of machinery and electronics industries. Corruption continues to be an impediment to attracting foreign direct investment and Latvia's low birth rate and decreasing population are major challenges to its long-term economic vitality. Latvia's economy experienced GDP growth of more than 10% per year during 2006-07, but entered a severe recession in 2008 as a result of an unsustainable current account deficit and large debt exposure amid the softening world economy. Triggered by the collapse of the second largest bank, GDP plunged 18% in 2009. The economy has not returned to pre-crisis levels despite strong growth, especially in the export sector in 2011-12. The IMF, EU, and other international donors provided substantial financial assistance to Latvia as part of an agreement to defend the currency's peg to the euro in exchange for the government's commitment to stringent austerity measures. The IMF/EU program successfully concluded in December 2011. The government of Prime Minister Valdis DOMBROVSKIS remained committed to fiscal prudence and reducing the fiscal deficit from 7.7% of GDP in 2010, to 2.7% of GDP in 2012. The majority of companies, banks, and real estate have been privatized, although the state still holds sizable stakes in a few large enterprises, including 99.8% ownership of the Latvian national airline. Latvia officially joined the World Trade Organization in February, 1999 and the EU in May 2004. Latvia intends to join the euro zone in 2014.

TRANSNATIONAL ISSUES

Disputes—international: Russia demands better Latvian treatment of ethnic Russians in Latvia; boundary demarcated with Latvia and Lithuania; the Latvian parliament has not ratified its 1998 maritime boundary treaty with Lithuania, primarily due to concerns over oil exploration rights; as a member state that forms part of the EU's external border, Latvia has implemented the strict Schengen border rules with Russia

Illicit drugs: transshipment and destination point for cocaine, synthetic drugs, opiates, and cannabis from Southwest Asia, Western Europe, Latin America, and neighboring Balkan countries; despite improved legislation, vulnerable to money laundering due to nascent enforcement capabilities and comparatively weak regulation of offshore companies and the gaming industry; CIS organized crime (including counterfeiting, corruption, extortion, stolen cars, and prostitution) accounts for most laundered proceeds

LEBANON

INTRODUCTION

Background: Following World War I, France acquired a mandate over the northern portion of the former Ottoman Empire province of Syria. The French demarcated the region of Lebanon in 1920 and granted this area independence in 1943. Since independence the country has been

marked by periods of political turmoil interspersed with prosperity built on its position as a regional center for finance and trade. The country's 1975-90 civil war that resulted in an estimated 120,000 fatalities, was followed by years of social and political instability. Sectarianism is a key element of Lebanese political life. Neighboring Syria has long

influenced Lebanon's foreign policy and internal policies, and its military occupied Lebanon from 1976 until 2005. The Lebanon-based Hizballah militia and Israel continued attacks and counterattacks against each other after Syria's withdrawal, and fought a brief war in 2006. Lebanon's borders with Syria and Israel remain unresolved.

note: adopted 1927; the anthem was chosen following a nationwide competition

ECONOMY

Economy—overview: Lebanon has a free-market economy and a strong laissez-faire commercial tradition. The government does not restrict foreign investment; however, the investment climate suffers from red tape, corruption, arbitrary licensing decisions, complex customs procedures, high taxes, tariffs, and fees, archaic legislation, and weak intellectual property rights. The Lebanese economy is service-oriented; main growth sectors include banking and tourism. The 1975-90 civil war seriously damaged Lebanon's economic infrastructure, cut national output by half, and derailed Lebanon's position as a Middle Eastern entrepot and banking hub. Following the civil war Lebanon rebuilt much of its war-torn physical and financial infrastructure by borrowing heavily—mostly from domestic banks—saddling the government with a huge debt burden. Pledges of economic and financial reforms made at separate international donor conferences during the 2000s have mostly gone unfulfilled, including those made during the Paris III Donor Conference in 2007 following the July 2006 war. The collapse of the government in early 2011 over its backing of the Special Tribunal for Lebanon and unrest in neighboring Syria slowed economic growth to the 1-2% range in 2011-12, after four years of 8% average growth. In September 2011 the Cabinet endorsed a bill that would provide \$1.2 billion in funding to improve Lebanon's downtrodden electricity sector, but fiscal limitations will test the government's ability to invest in other areas, such as water.

TRANSNATIONAL ISSUES

Disputes—international: lacking a treaty or other documentation describing the boundary,

portions of the Lebanon-Syria boundary are unclear with several sections in dispute; since 2000, Lebanon has claimed Shab'a Farms area in the Israeli-occupied Golan Heights; the roughly 2,000-strong UN Interim Force in Lebanon has been in place since 1978

IDPs: at least 47,000 (1975-90 civil war, 2007 Lebanese security forces' destruction of Palestinian refugee camp) (2011)

Illicit drugs: cannabis cultivation dramatically reduced to 2,500 hectares in 2002 despite continued significant cannabis consumption; opium poppy cultivation minimal; small amounts of Latin American cocaine and Southwest Asian heroin transit country on way to European markets and for Middle Eastern consumption; money laundering of drug proceeds fuels concern that extremists are benefiting from drug trafficking

LESOTHO

INTRODUCTION

Background: Basutoland was renamed the Kingdom of Lesotho upon independence from the UK in 1966. The Basuto National Party ruled the country during its first two decades. King MOSHOESHOE was exiled in 1990, but returned to Lesotho in 1992 and was reinstated in 1995 and subsequently succeeded by his son, King LETSIE III, in 1996. Constitutional government was restored in 1993 after seven years of military rule. In 1998, violent protests and a military mutiny following a contentious election prompted a brief but bloody intervention by South African and Botswana military forces under the aegis of the Southern African Development Community. Subsequent constitutional reforms restored relative political stability. Peaceful parliamentary elections were held in 2002, but the National Assembly elections of February 2007 were hotly contested and aggrieved parties disputed how the electoral law was applied to award proportional seats in the Assembly. In May 2012, competitive elections involving 18 parties saw Prime Minister Motsoahae Thomas THABANE form a coalition

government—the first in the country's history—that ousted the 14 year incumbent, Pakalitha MOSISILI, who peacefully transferred power the following month.

ECONOMY

Economy—overview: Small, mountainous, and completely landlocked by South Africa, Lesotho is a least developed country in which about three-fourths of the people live in rural areas and engage in subsistence agriculture. Lesotho produces less than 20% of the nation's demand for food. Rain-fed agriculture is vulnerable to weather and climate variability; an estimated 725,500 people will require food assistance in 2012/13. The distribution of income in Lesotho remains inequitable. Lesotho relies on South Africa for much of its economic activity. Lesotho imports 90% of the goods it consumes from South Africa, including most agricultural inputs. Households depend heavily on remittances from family members working in South Africa, in mines, on farms and as domestic workers, though mining employment has declined substantially since the 1990s. Government revenue depends heavily on transfers from South Africa. Customs duties from the Southern Africa Customs Union accounted for 44% of government revenue in 2012. The South African Government also pays royalties for water transferred to South Africa from a dam and reservoir system in Lesotho. However, the government continues to strengthen its tax system to reduce dependency on customs duties and other transfers. Access to credit remains a problem for the private sector. The government maintains a large presence in the economy—public expenditures accounted for 55% of GDP in 2010 and the government remains Lesotho's largest employer. Lesotho's largest private employer is the textile and garment industry—approximately Basotho, mainly women, work in factories producing garments for export to South Africa and the US. Diamond mining in Lesotho has grown in recent years and may contribute 8.5% to GDP by 2015, according to current forecasts. Lesotho's \$362.5 million Millennium Challenge Account Compact, which focused on strengthening the healthcare system, developing the private sector, and providing access to improved water supplies and sanitation facilities, will end in September 2013. Despite the 2008/09 global economic crisis, the economy has recovered strongly with growth averaging nearly 5% per year since 2010.

Military—note: Lesotho's declared policy is maintenance of its independent sovereignty and preservation of internal security; in practice, external security is guaranteed by South Africa; restructuring of the Lesotho Defense Force (LDF) and Ministry of Defense and Public Service over the past five years has focused on subordinating the defense apparatus to civilian control and restoring the LDF's cohesion; the restructuring has considerably improved capabilities and professionalism, but the LDF is disproportionately large for a small, poor country; the government has outlined a reduction to a planned 1,500-man strength, but these plans have met with vociferous resistance from the political opposition and from inside the LDF (2008)

TRANSNATIONAL ISSUES

Disputes—international: South Africa has placed military units to assist police operations along the border of Lesotho, Zimbabwe, and Mozambique to control smuggling, poaching, and illegal migration

LIBERIA

INTRODUCTION

Background: Settlement of freed slaves from the US in what is today Liberia began in 1822; by 1847, the Americo-Liberians were able to establish a republic. William TUBMAN, president from 1944-71, did much to promote foreign investment and to bridge the economic, social, and political

gaps between the descendants of the original settlers and the inhabitants of the interior. In 1980, a military coup led by Samuel DOE ushered in a decade of authoritarian rule. In December 1989, Charles TAYLOR launched a rebellion against DOE's regime that led to a prolonged civil war in which DOE was killed. A period of relative peace in 1997 allowed for elections that brought TAYLOR to power, but major fighting resumed in 2000. An August 2003 peace agreement ended the war and prompted the resignation of former president Charles TAYLOR, who faces war crimes charges in The Hague related to his involvement in Sierra Leone's civil war. After two years of rule by a transitional government, democratic elections in late 2005 brought President Ellen JOHNSON SIRLEAF to power. She subsequently won reelection in 2011 in a second round vote that was boycotted by the opposition and remains challenged to build Liberia's economy and reconcile a nation still recovering from 14 years of fighting. The United Nations Security Council in September 2012 passed Resolution 2066 which calls for a reduction of UN troops in Liberia by half by 2015, bringing the troop total down to fewer than 4000, and challenging Liberia's security sector to fill the gaps.

ECONOMY

Economy—overview: Liberia is a low income country heavily reliant on foreign assistance for revenue. Civil war and government mismanagement destroyed much of Liberia's economy, especially the infrastructure in and around the capital, Monrovia. Many businesses fled the country, taking capital and expertise with them, but with the conclusion of fighting and the installation of a democratically-elected government in 2006, several have returned. Liberia has the distinction of having the highest ratio of direct foreign investment to GDP in the world. Richly endowed with water, mineral resources, forests, and a climate favorable to agriculture, Liberia had been a producer and exporter of basic products, primarily raw timber and rubber and is reviving those sectors. Local manufacturing, mainly foreign owned, had been small in scope. President JOHNSON SIRLEAF, a Harvard-trained banker and administrator, has taken steps to reduce corruption, build support from international donors, and encourage private investment. Embargos on timber and diamond exports have been lifted, opening new sources of revenue for the government and Liberia shipped its first major timber exports to Europe in 2010. The country reached its Heavily Indebted Poor Countries initiative completion point in 2010 and nearly \$5 billion of international debt was permanently eliminated. This new status will enable Liberia to establish a sovereign credit rating and issue bonds. Liberia's Paris Club creditors agreed to cancel Liberia's debt as well. The IMF has completed the sixth review of Liberia's extended credit facility, bringing total disbursements to over \$379 million. The African Development Bank approved a grant of \$48 million in 2011 to support economic governance and competitiveness. Rebuilding infrastructure and raising incomes will depend on generous financial and technical assistance from donor countries and foreign investment in key sectors, such as infrastructure and power generation. The country has achieved high growth during 2010-12 due to favorable world prices for its commodities.

TRANSNATIONAL ISSUES

Disputes—international: although civil unrest continues to abate with the assistance of 18,000 UN Mission in Liberia peacekeepers, as of January 2007, Liberian refugees still remain in Guinea, Cote d'Ivoire, Sierra Leone, and Ghana; Liberia, in turn, shelters refugees fleeing turmoil in Cote d'Ivoire; despite the presence of over 9,000 UN forces in Cote d'Ivoire since 2004, ethnic conflict continues to spread into neighboring states who can no longer send their migrant workers to Ivorian cocoa plantations; UN sanctions ban Liberia from exporting diamonds and timber

Refugees and internally displaced persons: *refugees (country of origin):* 61,153 (Cote d'Ivoire) (2013)

IDPs: undetermined (civil war from 1990-2004; unclear how many have found durable solutions; many dwell in slums in Monrovia) (2012)

Illicit drugs: transshipment point for Southeast and Southwest Asian heroin and South American cocaine for the European and US markets; corruption, criminal activity, arms-dealing, and diamond trade provide significant potential for money laundering, but the lack of well-developed financial system limits the country's utility as a major money-laundering center

LIBYA

INTRODUCTION

Background: The Italians supplanted the Ottoman Turks in the area around Tripoli in 1911 and did not relinquish their hold until 1943 when defeated in World War II. Libya then passed to UN administration and achieved independence in 1951. Following a 1969 military coup, Col. Muammar al-QADHAFI assumed leadership and began to espouse his political system at home, which was a combination of socialism and Islam. During the 1970s, QADHAFI used oil revenues to promote his ideology outside Libya, supporting subversive and terrorist activities that included the downing of two airliners—one over Scotland, another in Northern Africa—and a discotheque bombing in Berlin. UN sanctions in 1992 isolated QADHAFI politically and economically following the attacks; sanctions were lifted in 2003 following Libyan acceptance of responsibility for the bombings and agreement to claimant compensation. QADHAFI also agreed to end Libya's program to develop weapons of mass destruction, and he made significant strides in normalizing relations with Western nations. Unrest that began in several Middle Eastern and North African countries in late 2010 erupted in Libyan cities in early 2011. QADHAFI's brutal crackdown on protesters spawned a civil war that triggered UN authorization of air and naval intervention by the international community. After months of seesaw fighting between government and opposition forces, the QADHAFI regime was toppled in mid-2011 and replaced by a transitional government. Libya in 2012 formed a new parliament and elected a new prime minister.

Flag description: three horizontal bands of red (top), black (double width), and green with a white crescent and star centered on the black stripe; the National Transitional Council reintroduced this flag design of the former Kingdom of Libya (1951-1969) on 27 February 2011; it replaced the former all-green banner promulgated by the QADHAFI regime in 1977; the colors represent the three major regions of the country: red stands for Fezzan, black symbolizes Cyrenaica, and green denotes Tripolitania; the crescent and star represent Islam, the main religion of the country

National symbol(s): star and crescent; hawk

National anthem: *name:* "Allahu Akbar" (God Is Greatest)

lyrics/music: Mahmoud el-SHERIF/Abdalla Shams el-DIN

note: adopted 1969; the anthem was originally a battle song for the Egyptian Army in the 1956 Suez War

ECONOMY

Economy—overview: Libya's economy is structured primarily around the nation's energy sector, which generates about 95% of export earnings, 80% of GDP, and 99% of government income. Substantial revenue from the energy sector coupled with a small population give Libya one of the highest per capita GDPs in Africa, but Tripoli largely has not used its significant financial resources to develop national infrastructure or the economy, leaving many citizens poor. In the final five years of QADHAFI's rule, Libya made some progress on economic reform as part of a broader campaign to reintegrate the country into the international fold. This effort picked up steam after UN sanctions were lifted in September 2003 and after Libya announced in December 2003 that it would abandon programs to build weapons of mass destruction. The process of lifting US unilateral sanctions began in the spring of 2004; all sanctions were removed by June 2006, helping Libya attract greater foreign direct investment, especially in the energy and banking sectors. Libyan oil and gas licensing rounds drew high international interest, but new rounds are unlikely to be successful until Libya establishes a more permanent government and is able to offer more attractive financial terms on contracts and increase security. Libya faces a long road ahead in liberalizing its primarily socialist economy, but the revolution has unleashed previously restrained entrepreneurial activity and increased the potential for the evolution of a more market-based economy. The service and construction sectors, which account for roughly 60% of GDP, expanded over the past five years and could become a larger share of GDP if Tripoli prioritizes capital spending on development projects once political and security uncertainty subside. Climatic conditions and poor soils severely limit agricultural output, and Libya imports about 80% of its food. Libya's primary agricultural water source is the Great Manmade River Project

TRANSNATIONAL ISSUES

Disputes—International: dormant disputes include Libyan claims of about 32,000 sq km still reflected on its maps of southeastern Algeria and the FLN's assertions of a claim to Chirac Pastures in southeastern Morocco; various Chadian rebels from the Aozou region reside in southern Libya

Refugees and internally displaced persons: IDPs: 74,000 (conflict between 'pro-Qadhafi and anti-Qadhafi forces; figure does not include displaced third-country nationals) (2012)

Trafficking in persons: current situation:

Libya is a transit and destination country for men and women from sub-Saharan Africa and Asia trafficked for the purposes of forced labor and commercial sexual exploitation; migrants seek employment in Libya as laborers and domestic workers or transit Libya enroute to Europe; most of the estimated 1.5 to 2 million foreigners fled Libya during its 2011 revolution and many who stayed, especially those from sub-Saharan Africa, were detained as suspected mercenaries

tier rating: Tier 3—the Libyan Government does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the TNC has failed to demonstrate significant efforts to investigate and prosecute trafficking offenses or to protect trafficking victims; the government's policies and practices with respect to undocumented migrant workers resulted in Libyan authorities detaining and punishing trafficking victims for unlawful acts that were committed as a result of being trafficked (2012)

LIECHTENSTEIN**INTRODUCTION**

Background: The Principality of Liechtenstein was established within the Holy Roman Empire in 1719. Occupied by both French and Russian troops during the Napoleonic Wars, it became a sovereign state in 1806 and joined the Germanic Confederation in 1815. Liechtenstein became fully independent in 1866 when the Confederation dissolved. Until the end of World War I, it was closely tied to Austria, but the economic devastation caused by that conflict forced Liechtenstein to enter into a customs and monetary union with Switzerland. Since World War II (in which Liechtenstein remained neutral), the country's low taxes have spurred outstanding economic growth. In 2000, shortcomings in banking regulatory oversight resulted in concerns about the use

of financial institutions for money laundering. However, Liechtenstein implemented anti-money laundering legislation and a Mutual Legal Assistance Treaty with the US that went into effect in 2003.

ECONOMY

Economy—overview: Despite its small size and limited natural resources, Liechtenstein has developed into a prosperous, highly industrialized, free-enterprise economy with a vital financial service sector and likely the second highest per capita income in the world. The Liechtenstein economy is widely diversified with a large number of small businesses. Low business taxes—the maximum tax rate is 20%—and easy incorporation rules have induced many holding companies to establish nominal offices in Liechtenstein providing 30% of state revenues. The country participates in a customs union with Switzerland and uses the Swiss franc as its national currency. It imports more than 90% of its energy requirements. Liechtenstein has been a member of the European Economic Area (an organization serving as a bridge between the European Free Trade Association (EFTA) and the EU) since May 1995. The government is working to harmonize its economic policies with those of an integrated Europe. Since 2008, Liechtenstein has faced renewed international pressure—particularly from Germany—to improve transparency in its banking and tax systems. In December 2008, Liechtenstein signed a Tax Information Exchange Agreement with the US. Upon Liechtenstein's conclusion of 12 bilateral information-sharing agreements, the OECD in October 2009 removed the principality from its "grey list" of countries that had yet to implement the organization's Model Tax Convention. By the end of 2010, Liechtenstein had signed 25 Tax Information Exchange Agreements or Double Tax Agreements. In 2011 Liechtenstein joined the Schengen area, which allows passport-free travel across 26 European countries.

LITHUANIA

INTRODUCTION

Background: Lithuanian lands were united under MINDAUGAS in 1236; over the next

century, through alliances and conquest, Lithuania extended its territory to include most of present-day Belarus and Ukraine. By the end of the 14th century Lithuania was the largest state in Europe. An alliance with Poland in 1386 led the two countries into a union through the person of a common ruler. In 1569, Lithuania and Poland formally united into a single dual state, the Polish-Lithuanian Commonwealth. This entity survived until 1795 when its remnants were partitioned by surrounding countries. Lithuania regained its independence following World War I but was annexed by the USSR in 1940—an action never recognized by the US and many other countries. On 11 March 1990, Lithuania became the first of the Soviet republics to declare its independence, but Moscow did not recognize this proclamation until September of 1991 (following the abortive coup in Moscow). The last Russian troops withdrew in 1993. Lithuania subsequently restructured its economy for integration into Western European institutions; it joined both NATO and the EU in the spring of 2004.

ECONOMY

Economy—overview: Lithuania gained membership in the World Trade Organization and joined the EU in May 2004. Despite its EU accession, Lithuania's trade with its Central and Eastern European neighbors, and Russia in particular, accounts for a significant share of total trade. Foreign investment and business support have helped in the transition from the old command economy to a market economy. Lithuania's economy grew on average 8% per year for the four years prior to 2008 driven by exports and domestic demand. Lithuania's GDP plunged nearly 15% in 2009. The three former Soviet Baltic republics were among the hardest hit by the 2008-09 financial crisis. The government's efforts to attract foreign investment, to develop export markets, and to pursue broad economic reforms has been key to Lithuania's quick recovery from a deep recession, making Lithuania one of the fastest growing economies in the EU. Lithuania is committed to meeting the Maastricht criteria to join the euro zone, which the government expects to achieve by 2015. Under the Conservative Party's leadership, Lithuania raised the monthly minimum wage in 2012 nearly 25% over 2011. Despite government efforts, unemployment—at 13.2% in 2012—remains high.

TRANSNATIONAL ISSUES

Disputes—international: Lithuania and Russia committed to demarcating their boundary in 2006

in accordance with the land and maritime treaty ratified by Russia in May 2003 and by Lithuania in 1999; Lithuania operates a simplified transit regime for Russian nationals traveling from the Kaliningrad coastal exclave into Russia, while still conforming, as a EU member state having an external border with a non-EU member, to strict Schengen border rules; boundary demarcated with Latvia and Lithuania; as of January 2007, ground demarcation of the boundary with Belarus was

complete and mapped with final ratification documents in preparation

Illicit drugs: transshipment and destination point for cannabis, cocaine, ecstasy, and opiates from Southwest Asia, Latin America, Western Europe, and neighboring Baltic countries; growing production of high-quality amphetamines, but limited production of cannabis, methamphetamines; susceptible to money laundering despite changes to banking legislation

LUXEMBOURG

INTRODUCTION

Background: Founded in 963, Luxembourg became a grand duchy in 1815 and an independent state under the Netherlands. It lost more than half of its territory to Belgium in 1839 but gained a larger measure of autonomy. Full independence was attained in 1867. Overrun by Germany in both world wars, it ended its neutrality in 1948 when it entered into the Benelux Customs Union and when it joined NATO the following year. In 1957, Luxembourg became one of the six founding countries of the European Economic Community (later the European Union), and in 1999 it joined the euro currency area. In January 2013, Luxembourg assumed a nonpermanent seat on the UN Security Council for the 2013-14 term.

The industrial sector, initially dominated by steel, has become increasingly diversified to include chemicals, rubber, and other products. Growth in the financial sector, which now accounts for about 27% of GDP, has more than compensated for the decline in steel. Most banks are foreign-owned and have extensive foreign dealings, but Luxembourg has lost some of its advantages as a favorable tax location because of OECD and EU pressure. The economy depends on foreign and cross-border workers for about 40% of its labor force. Luxembourg, like all EU members, suffered from the global economic crisis that began in late 2008, but unemployment has trended below the EU average. Following strong expansion from 2004 to 2007, Luxembourg's economy contracted 3.6% in 2009, but rebounded in 2010-11 before slowing again in 2012. The country continues to enjoy an extraordinarily high standard of living—GDP per capita ranks among the highest in the world, and is the highest in the euro zone. Turmoil in the world financial markets and lower global demand during 2008-09 prompted the government to inject capital into the banking sector and implement stimulus measures to boost the economy. Government stimulus measures and support for the banking sector, however, led to a 5% government budget deficit in 2009. Nevertheless, the deficit was cut to 1.1% in 2011 and 0.9% in 2012. Even during the financial crisis and recovery, Luxembourg retained the highest current account surplus as a share of GDP in the euro zone, owing largely

to their strength in financial services. Public debt remains among the lowest of the region although it has more than doubled since 2007 as percentage of GDP. Luxembourg's economy, while stable, grew slowly in 2012 due to ongoing weak growth in the euro area. Authorities have strengthened supervision of domestic banks because of their exposure to the activities of foreign banks.

INTRODUCTION

Background: Colonized by the Portuguese in the 16th century, Macau was the first European settlement in the Far East. Pursuant to an agreement signed by China and Portugal on 13 April 1987, Macau became the Macau Special Administrative Region (SAR) of the People's Republic of China on 20 December 1999. In this agreement, China promised that, under its "one country, two systems" formula, China's political and economic system would not be imposed on Macau, and that Macau would enjoy a high degree of autonomy in all matters except foreign affairs and defense for the next 50 years.

ECONOMY

Economy—overview: Since opening up its locally-controlled casino industry to foreign competition in 2001, Macau has attracted tens of billions of dollars in foreign investment, transforming the territory into one of the world's largest gaming centers. Macau's gaming and tourism businesses were fueled by China's decision to relax travel restrictions on Chinese citizens wishing to visit Macau. By 2006, Macau's gaming revenue surpassed that of the Las Vegas strip, and gaming-related taxes accounted for more than 70% of total government revenue. Macau's economy slowed dramatically in 2009 as a result of the global economic slowdown, but strong growth resumed in 2010-11, largely on the back of tourism from mainland China and the gaming sectors. In 2012, this city of 582,000 hosted nearly 28 million visitors. Almost 60% came from mainland China. Macau's traditional manufacturing industry has slowed greatly since the termination of the Multi-Fiber Agreement in 2005. China is Macau's second largest goods export market, behind Hong Kong, and followed by the United States. In 2012, exports were less than US\$1 billion, while gaming receipts were US\$38 billion, a 13.5% increase over 2011. Macau's economy expanded by 10% in 2012; although impressive, it was a slower growth rate than in previous years. Macau continues to face the challenges of managing its growing casino industry, money-laundering, and the need to diversify the economy away from heavy dependence on gaming revenues. Macau's currency, the pataca, is closely tied to the Hong Kong dollar, which is also freely accepted in the territory.

MACEDONIA

INTRODUCTION

Background: Macedonia gained its independence peacefully from Yugoslavia in 1991. Greece's objection to the new state's use of what it considered a Hellenic name and symbols delayed international recognition, which occurred under the provisional designation of "the Former Yugoslav Republic of Macedonia." In 1995, Greece lifted a 20-month trade embargo and the two countries agreed to normalize relations, but the issue of the name remained unresolved and negotiations for a solution are ongoing. Since 2004, the United States and 133 other nations have recognized Macedonia by its constitutional name, Republic of Macedonia. Some ethnic Albanians, angered by perceived political and economic inequities, launched an insurgency in 2001 that eventually won the support of the majority of Macedonia's ethnic Albanian population and led to the internationally brokered Ohrid Framework Agreement, which ended the fighting and established guidelines for the creation of new laws that enhanced the rights of minorities. Fully implementing the Framework Agreement, maintaining momentum on democratic reforms, and stimulating economic growth and development continue to be challenges for Macedonia, although progress has been made over the past several years.

ECONOMY

Economy—overview: Macedonia is vulnerable to economic developments in Europe—due to strong trade ties—and dependent on regional integration and progress toward EU membership for continued economic growth. At independence in September 1991, Macedonia was the least developed of the Yugoslav republics, producing a mere 5% of the total federal output of goods and

services. The collapse of the Socialist Federal Republic of Yugoslavia ended transfer payments from the central government and eliminated advantages from inclusion in a de facto free trade area. An absence of infrastructure, UN sanctions on the downsized Yugoslavia, and a Greek economic embargo over a dispute about the country's constitutional name and flag hindered economic growth until 1996. Since then, Macedonia has maintained macroeconomic stability with low inflation, but it has so far lagged the region in attracting foreign investment and creating jobs, despite making extensive fiscal and business sector reforms. Official unemployment remains high at more than 31%, but may be overstated based on the existence of an extensive gray market, estimated to be between 20% and 45% of GDP, that is not captured by official statistics. In the wake of the global economic downturn, Macedonia has experienced decreased foreign direct investment and a large trade deficit. However, as a result of conservative fiscal policies and a sound financial system, in 2010 the country credit rating improved slightly to BB+ and was kept at that level in 2011-12. However, macroeconomic stability has been maintained by a prudent monetary policy, which keeps the domestic currency pegged against the euro. As a result, GDP growth was modest, but positive at about 3% both in 2010 and 2011, and inflation was under control. The government loosened fiscal policy in 2012 and the budget deficit expanded to 3.5% of GDP.

Illicit drugs: major transshipment point for Southwest Asian heroin and hashish; minor transit point for South American cocaine destined for Europe; although not a financial center and most criminal activity is thought to be domestic, money laundering is a problem due to a mostly cash-based economy and weak enforcement

MADAGASCAR

INTRODUCTION

Background: Formerly an independent kingdom, Madagascar became a French colony in 1896 but regained independence in 1960. During 1992-93, free presidential and National Assembly elections were held ending 17 years of single-party rule. In 1997, in the second presidential race, Didier RATSIRAKA, the leader during the 1970s and 1980s, was returned to the presidency. The 2001 presidential election was contested between the followers of Didier RATSIRAKA and Marc RAVALOMANANA, nearly causing secession of half of the country. In April 2002, the High Constitutional Court announced RAVALOMANANA the winner. RAVALOMANANA achieved a second term following a landslide victory in the generally free and fair presidential elections of 2006. In early 2009, protests over increasing restrictions on opposition press and activities resulted in RAVALOMANANA handing over power to the military, which then conferred the presidency on the mayor of Antananarivo, Andry RAJOELINA, in what amounted to a coup d'etat. Numerous attempts have been made by regional and international organizations to resolve

the subsequent political gridlock by forming a power-sharing government. Madagascar's independent electoral commission and the UN originally planned to hold a presidential election in early May 2013, but postponed the election until late July 2013, due to logistical delays.

ECONOMY

Economy—overview: After discarding socialist economic policies in the mid-1990s, Madagascar followed a World Bank and IMF-led policy of privatization and liberalization that has been undermined since the start of the political crisis. This strategy placed the country on a slow and steady growth path from an extremely low level. Agriculture, including fishing and forestry, is a mainstay of the economy, accounting for more than one-fourth of GDP and employing 80% of the population. Exports of apparel boomed in recent years primarily due to duty-free access to the US, however, Madagascar's failure to comply with the requirements of the African Growth and Opportunity Act (AGOA) led to the termination of the country's duty-free access in January 2010 and a sharp fall in textile production. Deforestation and erosion, aggravated by the use of firewood as the primary source of fuel, are serious concerns. The current political crisis, which began in early 2009, has dealt additional blows to the economy. Tourism dropped more than 50% in 2009 compared with the previous year, and many investors are wary of entering the uncertain investment environment. Growth was anemic during 2010 to 2012 although expansion in mining and agricultural sectors is expected to contribute to more growth in 2013.

MALAWI

INTRODUCTION

Background: Established in 1891, the British protectorate of Nyasaland became the independent nation of Malawi in 1964. After three decades of one-party rule under President Hastings Kamuzu BANDA the country held multiparty elections in 1994, under a provisional constitution that came into full effect the following year. President Binguwa MUTHARIKA, elected in May 2004 after a failed attempt by the previous president to amend the constitution to permit another term, struggled to assert his authority against his predecessor and subsequently started his own party, the Democratic Progressive Party (DPP) in 2005. MUTHARIKA was reelected to a second term in May 2009. As president, he oversaw some economic improvement in his first term, but was accused of economic mismanagement and poor governance in his second term. He died abruptly in April 2012 and was succeeded by his vice president, Joyce BANDA. Population growth, increasing pressure on agricultural lands, corruption, and the spread of HIV/AIDS pose major problems for Malawi.

ECONOMY**Economy—overview:** Landlocked Malawi ranks among the world's most densely populated and least developed countries. The economy is predominately agricultural with about 80% of the population living in rural areas. Agriculture, which has benefited from fertilizer subsidies since 2006, accounts for one-third of GDP and 90% of export revenues. The performance of the tobacco sector is key to short-term growth as tobacco accounts for more than half of exports. The economy depends on substantial inflows of economic assistance from the IMF, the World Bank, and individual donor nations. In 2006, Malawi was approved for relief under the Heavily Indebted Poor Countries (HIPC) program. In December 2007, the US granted Malawi eligibility status to receive financial support within the Millennium Challenge Corporation (MCC) initiative. The government faces many challenges including developing a market economy, improving educational facilities, facing up to environmental problems, dealing with the rapidly growing problem of HIV/AIDS, and satisfying foreign donors that fiscal discipline is being tightened. Since 2005 President BANDA's government has exhibited improved financial discipline under the guidance of Finance Minister Goodall GONDWE and signed a three year Poverty Reduction and Growth Facility worth \$56 million with the IMF. The government has announced infrastructure projects that could yield improvements, such as a new oil pipeline for better fuel access, and the potential for a waterway link through Mozambican rivers

to the ocean for better transportation options. Since 2009, however, Malawi has experienced some setbacks, including a general shortage of foreign exchange, which has damaged its ability to pay for imports, and fuel shortages that hinder transportation and productivity. Investment fell 23% in 2009, and continued to decline in 2010. The government has failed to address barriers to investment such as unreliable power, water shortages, poor telecommunications infrastructure, and the high costs of services. Donors, who provided an average of 36% of government revenue in the past five year, suspended general budget support for Malawi in 2011 due to a negative IMF review and governance issues.

MALAYSIA

INTRODUCTION

Background: During the late 18th and 19th centuries, Great Britain established colonies and protectorates in the area of current Malaysia; these were occupied by Japan from 1942 to 1945. In 1948, the British-ruled territories on the Malay Peninsula except Singapore formed the Federation of Malaya, which became independent in 1957. Malaysia was formed in 1963 when the former British colonies of Singapore, as well as Sabah and Sarawak on the northern coast of Borneo, joined the Federation. The first several years of the country's independence were marred by a Communist insurgency, Indonesian confrontation with Malaysia, Philippine claims to Sabah, and Singapore's withdrawal in 1965. During the 22-year term of Prime Minister MAHATHIR bin Mohamad (1981-2003), Malaysia was successful in diversifying its economy from dependence on exports of raw materials to the development of manufacturing, services, and tourism. Prime Minister Mohamed NAJIB bin Abdul Razak (in office since April 2009) has continued these pro-business policies and has introduced some civil reforms.

Flag description: 14 equal horizontal stripes of red (top) alternating with white (bottom); there is a blue rectangle in the upper hoist-side corner bearing a yellow crescent and a yellow 14-pointed star; the flag is often referred to as Jalur Gemilang (Stripes of Glory); the 14 stripes stand for the equal status in the federation of the 13 member states and the federal government; the 14 points on the star represent the unity between these entities; the crescent is a traditional symbol of Islam; blue symbolizes the unity of the Malay people and yellow is the royal color of Malay rulers **note:** the design is based on the flag of the US

National symbol(s): tiger

National anthem: *name:* "Negaraku" (My Country)

lyrics/music: collective, led by Tunku ABDUL RAHMAN/Pierre Jean DE BERANGER

note: adopted 1957; the full version is only performed in the presence of the king; the tune, which was adopted from a popular French melody titled "La Rosalie," was originally the anthem of the state of Perak

ECONOMY

Economy—overview: Malaysia, a middle-income country, has transformed itself since the 1970s from a producer of raw materials into an emerging multi-sector economy. Under current Prime Minister NAJIB, Malaysia is attempting to achieve high-income status by 2020 and to move farther up the value-added production chain by attracting investments in Islamic finance, high technology industries, biotechnology, and services. NAJIB's Economic Transformation Program (ETP) is a series of projects and policy measures intended to accelerate the country's economic growth. The government has also taken steps to liberalize some services sub-sectors. The NAJIB administration also is continuing efforts to boost domestic demand and reduce the economy's dependence on exports. Nevertheless, exports—particularly of electronics, oil and gas, palm oil and rubber—remain a significant driver of the economy. As an oil and gas exporter, Malaysia has profited from higher world energy prices, although the rising cost of domestic gasoline and diesel fuel, combined with strained government finances, has forced Kuala Lumpur to begin to reduce government subsidies. The government is also trying to lessen its dependence on state oil producer Petronas. The oil and gas sector supplies about 35% of government revenue in 2011. Bank Negeri Malaysia (central bank) maintains

healthy foreign exchange reserves, and a well-developed regulatory regime has limited Malaysia's exposure to riskier financial instruments and the global financial crisis. Nevertheless, Malaysia could be vulnerable to a fall in commodity prices or a general slow down in global economic activity because exports are a major component of GDP. In order to attract increased investment, NAJIB has raised possible revisions to the special economic and social preferences accorded to ethnic Malays under the New Economic Policy of 1970, but he has encountered significant opposition, especially from Malay nationalists and other vested interests.

TRANSNATIONAL ISSUES

Disputes—International: while the 2002 "Declaration on the Conduct of Parties in the South China Sea" has eased tensions over the Spratly Islands, it is not the legally binding "code of conduct" sought by some parties; Malaysia was not party to the March 2005 joint accord among the national oil companies of China, the Philippines, and Vietnam on conducting marine seismic activities in the Spratly Islands; disputes continue over deliveries of fresh water to Singapore, Singapore's land reclamation, bridge construction, and maritime boundaries in the Johor and Singapore Straits; in 2008, ICJ awarded sovereignty of Pedra Branca (Pulau Batu Puteh/Horsburgh Island) to Singapore, and Middle Rocks to Malaysia, but did not rule on maritime regimes, boundaries, or disposition of South Ledge; land and maritime negotiations with Indonesia are ongoing, and disputed areas include the controversial Tanjung Datu and Camar Wulan

border area in Borneo and the maritime boundary in the Ambalat oil block in the Celebes Sea; separatist violence in Thailand's predominantly Muslim southern provinces prompts measures to close and monitor border with Malaysia to stem terrorist activities; Philippines retains a dormant claim to Malaysia's Sabah State in northern Borneo; Per Letters of Exchange signed in 2009, Malaysia in 2010 ceded two hydrocarbon concession blocks to Brunei in exchange for Brunei's sultan dropping claims to the Limbang corridor, which divides Brunei; piracy remains a problem in the Malacca Strait

Refugees and internally displaced persons: refugees (*country of origin*): 81,146 (Burma) (2011)

Trafficking in persons: *current situation:* Malaysia is a destination and, to a lesser extent, a source and transit country for women and children trafficked for the purpose of commercial sexual exploitation, and men, women, and children for forced labor; Malaysia is mainly a destination country for men, women, and children who migrate willingly from countries including Indonesia, Nepal, India, Thailand, China, the Philippines, Burma, Cambodia, Bangladesh, Pakistan, and Vietnam to work, some of whom are subjected to conditions of involuntary servitude by Malaysian employers in the domestic, agricultural, construction, plantation, and industrial sectors; a small number of Malaysian citizens were reportedly trafficked internally and abroad to Singapore, China, and Japan for commercial sexual exploitation

tier rating: Tier 2 Watch List—the Government of Malaysia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; while the government increased the number of convictions obtained under the Anti-Trafficking in Persons and Anti-Smuggling of Migrants Act during the year and continued public awareness efforts on trafficking, it did not effectively investigate and prosecute labor trafficking cases, and failed to address problems of government complicity in trafficking and lack of effective victim care and counseling by authorities (2009)

Illicit drugs: drug trafficking prosecuted vigorously and carries severe penalties; heroin still primary drug of abuse, but synthetic drug demand remains strong; continued ecstasy and methamphetamine producer for domestic users and, to a lesser extent, the regional drug market

MALDIVES

INTRODUCTION

Background: A sultanate since the 12th century, the Maldives became a British protectorate in 1887. It became a republic in 1968, three years after independence. President Maumoon Abdul GAYOOM dominated the islands' political scene for 30 years, elected to six successive terms by single-party referendums. Following political demonstrations in the capital Male in August 2003, the president and his government pledged to embark upon democratic reforms including a more representative political system and expanded political freedoms. Progress was sluggish, however, and many promised reforms were slow to be realized. Nonetheless, political parties were legalized in 2005. In June 2008, a constituent assembly—termed the "Special Majlis"—finalized a new constitution, which was ratified by the president in August. The first-ever presidential elections under a multi-candidate, multi-party system were held in October 2008. GAYOOM was defeated in a runoff poll by Mohamed NASHEED, a political activist who had been jailed several years earlier by the former regime. President NASHEED faced a number of challenges including strengthening democracy and combating poverty and drug abuse. In early February 2012, after several weeks of street protests following his sacking of a top judge, NASHEED resigned the presidency and handed over power to Vice President Mohammed WAHEED Hassan Maniku. In mid-2012, the Commission of National Inquiry was set by the Government to probe events leading to the regime change. Though no evidence of a coup was found, the report recommended the need to strengthen the country's democratic institutions to avert similar events in the future, and to further investigate alleged police misconduct during the crisis. Maldives officials have played a prominent role in international climate change discussions (due to the islands' low elevation and the threat from sea-level rise) on the United Nations Human Rights Council, and in encouraging regional cooperation, especially between India and Pakistan.

ECONOMY

Economy—overview: Tourism, Maldives' largest economic activity, accounts for 28% of GDP and more than 60% of foreign exchange receipts. Fishing is the second leading sector, but the fish catch has dropped sharply in recent years. Agriculture and manufacturing continue to play a lesser role in the economy, constrained by the limited availability of cultivable land and the shortage of domestic labor. Lower than expected tourist arrivals and fish exports, combined with high government spending on social needs, subsidies, and civil servant salaries contributed to a balance of payments crisis, which was temporarily eased with a \$79.3 million IMF Stand-By agreement. However, after the first two disbursements, the IMF withheld subsequent disbursements due to concerns over Maldives' growing budget deficit, and the government has been seeking other sources of budgetary support ever since. A new Goods and Services Tax (GST) on tourism introduced in January 2011, on general goods and services in October 2011, and a new Business Profit Tax introduced in July 2011 have provided a boost to revenue. Economic growth slowed to 3.4% of GDP in 2012, compared to 7.0% in 2011 because of slower tourist arrivals and weak global conditions. Diversifying the economy beyond tourism and fishing, reforming public finance, increasing employment opportunities, and combating corruption, cronyism, and a growing drug problem are major near-term challenges facing the government. Gross foreign reserves at the end of November 2012 were approximately \$356 million, compared with \$326 million in 2011, and were sufficient to finance only 2.6 months of imports. Over the longer term Maldivian authorities worry about the impact of erosion and possible global warming on their low-lying country; 80% of the area is 1 meter or less above sea level.

MALI

INTRODUCTION

Background: The Sudanese Republic and Senegal became independent of France in 1960 as the Mali Federation. When Senegal withdrew after only a few months, what formerly made up the Sudanese Republic was renamed Mali. Rule by dictatorship was brought to a close, in 1991 by a military coup that ushered in a period of democratic rule. President Alpha KONARE won Mali's first two democratic presidential elections in 1992 and 1997. In keeping with Mali's two-term constitutional limit, he stepped down in 2002 and was succeeded by Amadou TOURE, who was elected to a second term in 2007 elections that were widely judged to be free and fair. Malian returnees from Libya in 2011 exacerbated tensions in northern Mali, and Tuareg ethnic militias started a rebellion in January 2012. Low- and mid-level soldiers, frustrated with the poor handling of the rebellion overthrew TOURE on 22 March. Intensive mediation efforts led by the Economic Community of West African States (ECOWAS) returned power to a civilian administration in April with the appointment of interim President Dioncounda TRAORE. The post-coup chaos led to rebels expelling the Malian military from the three northern regions of the country and allowed Islamic militants to set up strongholds. Hundreds of thousands of northern Malians fled the violence to southern Mali and neighboring countries, exacerbating regional food

insecurity in host communities. A military intervention to retake the three northern regions began in January 2013 and within a month most of the north had been retaken. Democratic elections are scheduled for mid-2013.

ECONOMY

Economy—overview: Among the 25 poorest countries in the world, Mali is a landlocked country highly dependent on gold mining and agricultural exports for revenue. The country's fiscal status fluctuates with gold and agricultural commodity prices and the harvest. Mali remains dependent on foreign aid. Economic activity is largely confined to the riverine area irrigated by the Niger River and about 65% of its land area is desert or semidesert. About 10% of the population is nomadic and about 80% of the labor force is engaged in farming and fishing. Industrial activity is concentrated on processing farm commodities. The government in 2011 completed an IMF extended credit facility program that has helped the economy grow, diversify, and attract foreign investment. Mali is developing its cotton and iron ore extraction industries to diversify foreign exchange revenue away from gold. Mali has invested in tourism but security issues are hurting the industry. Mali experienced economic growth of about 5% per year between 1996-2010, but the global recession and a military coup caused a decline in output in 2012. The interim government slashed public spending in the context of a declining state of security and declining international aid.

Refugees and internally displaced persons: refugees (country of origin): 12,442 (Mauritania) (2011)

IDPs: 228,918 (Tuareg rebellion since 2012) (2013)

Trafficking in persons: current situation: Mali is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; women and girls are forced into domestic servitude, agricultural labor, and support roles in gold mines, as well as subjected to sex trafficking; Malian boys are found in conditions of forced labor in agricultural settings, gold mines, and the informal commercial sector, as well as forced begging both within Mali and neighboring countries; Malians and other Africans who travel through Mali to Mauritania, Algeria, or Libya, in hopes of reaching Europe are particularly at risk of becoming victims of human trafficking; men and boys, primarily of Songhai ethnicity, are subjected to the longstanding practice of debt bondage in the salt mines of Taoudenni in northern Mali; some members of Mali's black Tamacheck community are subjected to traditional slavery-related practices, and this involuntary servitude reportedly has extended to their children

tier rating: Tier 2—the Government of Mali does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government acknowledged that human trafficking is a problem in Mali, but it did not demonstrate significant efforts to prosecute and convict trafficking offenders; Mali was not placed on Tier 3 because the government has a written plan that, if implemented, would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking and is devoting sufficient resources to implement that plan (2012)

MALTA

INTRODUCTION

Background: Great Britain formally acquired possession of Malta in 1814. The island staunchly supported the UK through both world wars and remained in the Commonwealth when it became independent in 1964. A decade later Malta became a republic. Since about the mid-1980s, the island has transformed itself into a freight transshipment point, a financial center, and a tourist destination. Malta became an EU member in May 2004 and began using the euro as currency in 2008.

Flag description: two equal vertical bands of white (hoist side) and red; in the upper hoist-side corner is a representation of the George Cross, edged in red; according to legend, the colors are taken from the red and white checkered banner of Count Roger of Sicily who removed a bi-colored corner and granted it to Malta in 1091; an uncontested explanation is that the colors are those of the Knights of Saint John who ruled Malta from 1530 to 1798; in 1942, King George VI of the United Kingdom awarded the George Cross to the islanders for their exceptional bravery and gallantry in World War II; since independence in 1964, the George Cross bordered in red has appeared directly on the white field

National symbol(s): Maltese cross

National anthem: *name:* "L-Innu Malti" (The Maltese Anthem)

lyrics/music: Dun Karm PSAILA/Robert SAMMUT

note: adopted 1945; the anthem is written in the form of a prayer

ECONOMY

Economy—overview: Malta—the smallest economy in the euro zone—produces only about 20% of its food needs, has limited fresh water supplies, and has few domestic energy sources. Malta's geographic position between Europe and North Africa makes it a target for irregular migration, which has strained Malta's political and economic resources. Malta's fertility rate is below the EU average, and population growth in recent years has largely been from immigration, putting increasing pressure on the pension system. Malta adopted the euro on 1 January 2008. Malta's economy is dependent on foreign trade, manufacturing, and tourism, and was hurt by the global economic downturn. Malta has low unemployment relative to other European countries, and growth has recovered since the 2009 recession. Malta's financial services industry has grown in recent years and it has avoided contagion from the European financial crisis, largely because its debt is mostly held domestically and its banks have low exposure to the sovereign debt of peripheral European countries. Malta reduced its deficit below 3 percent of GDP, leading the EU to dismiss its official excessive deficit procedure against Malta in 2012.

INTRODUCTION

Background: After almost four decades under US administration as the easternmost part of the UN Trust Territory of the Pacific Islands, the Marshall Islands attained independence in 1986 under a Compact of Free Association. Compensation claims continue as a result of US nuclear testing on some of the atolls between 1947 and 1962. The Marshall Islands hosts the US Army Kwajalein Atoll (USAKA) Reagan Missile Test Site, a key installation in the US missile defense network.

ECONOMY

Economy—overview: US assistance and lease payments for the use of Kwajalein Atoll as a US military base are the mainstay of this small island country. The Marshall Islands received roughly \$1 billion in aid from the US during 1986-2001 under the original Compact of Free Association (Compact). In 2002 and 2003, the US and the Marshall Islands renegotiated the Compact's financial package for a 20-year period, from 2004 to 2024. Under the amended Compact, the Marshall Islands will receive roughly \$1.5 billion in direct US assistance. Agricultural production, primarily subsistence, is concentrated on small farms; the most important commercial crops are coconuts and breadfruit. Industry is limited to handicrafts, tuna processing, and copra. Tourism holds some potential. The islands and atolls have few natural resources, and imports exceed

exports. Under the amended Compact, the US is also funding, jointly with the Marshall Islands, a Trust Fund for the people of the Marshall Islands that will provide an income stream beyond 2024 when direct Compact aid is to end.

MAURITANIA

INTRODUCTION

Background: Independent from France in 1960, Mauritania annexed the southern third of the former Spanish Sahara (now Western Sahara) in 1976 but relinquished it after three years of raids by the Polisario guerrilla front seeking independence for the territory. Maaouya Ould Sid Ahmed TAYA seized power in a coup in 1984 and ruled Mauritania with a heavy hand for more than two decades. A series of presidential elections that he held were widely seen as flawed. A bloodless coup in August 2005 deposed President TAYA and ushered in a military council that oversaw a transition to democratic rule. Independent candidate Sidi Ould Cheikh ABDALLAHI was inaugurated in April 2007 as Mauritania's first freely and fairly elected president. His term ended prematurely in August 2008 when a military junta led by General Mohamed Ould Abdel AZIZ deposed him and installed a military council government. AZIZ was subsequently elected president in July 2009 and sworn in the following month. AZIZ sustained injuries from an accidental shooting by his own troops in October 2012, but has continued to maintain his authority. The country continues to experience ethnic tensions among its black population (Afro-Mauritanians) and white and black Moor (Arab-Berber) communities, and is having to confront a growing terrorism threat by al-Qa'ida in the Islamic Maghreb (AQIM).

ECONOMY

Economy—overview: Half the population still depends on agriculture and livestock for a livelihood, even though many of the nomads and subsistence farmers were forced into the cities by recurrent droughts in the 1970s and 1980s. Mauritania has extensive deposits of iron ore, which account for nearly 40% of total exports. The nation's coastal waters are among the richest fishing areas in the world but overexploitation by foreigners threatens this key source of revenue. The country's first deepwater port opened near Nouakchott in 1986. Before 2000, drought and economic mismanagement resulted in a buildup of foreign debt. In February 2000, Mauritania qualified for debt relief under the Heavily Indebted Poor Countries (HIPC) initiative and nearly all of its foreign debt has since been forgiven. A new investment code approved in December 2001 improved the opportunities for direct foreign investment. Mauritania and the IMF agreed to a three-year Poverty Reduction and Growth Facility (PRGF) arrangement in 2006. Mauritania made satisfactory progress, but the IMF, World Bank, and other international actors suspended assistance and investment in Mauritania after the August 2008 coup. Since the presidential election in July 2009, donors have resumed assistance. Oil prospects, while initially promising, have largely

failed to materialize, and the government has placed a priority on attracting private investment to spur economic growth. The Government also emphasizes reduction of poverty, improvement of health and education, and privatization of the economy. Economic growth remained around 5% in 2010/12, mostly because of rising prices of gold, copper, iron ore, and oil.

Trafficking in persons: current situation: Mauritania is a source and destination country for men, women, and children subjected to conditions of forced labor and sex trafficking; women, men, and children from traditional slave castes are subjected to slavery-related practices rooted in ancestral master-slave relationships; Mauritanian boys called talibe are trafficked within the country by religious teachers for forced begging; Mauritanian girls, as well as girls from Mali, Senegal, The Gambia, and other West African countries, are forced into domestic servitude; Mauritanian women and girls are forced into prostitution in the country or transported to countries in the Middle East for the same purpose **tier rating:** Tier 3—the Government of Mauritania does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government acknowledges that some forms of trafficking are a problem in the country, and during the year, it created a multi-stakeholder body to lead its efforts related to child trafficking, child smuggling, and child labor; hereditary slavery was officially outlawed in 2007, but many officials do not recognize that the practice continues despite its prohibition; the government did not take proactive measures to identify trafficking victims or provide them with protective services, and it continued to jail individuals in prostitution and detain illegal migrants without screening either population for trafficking victims (2009)

MAURITIUS

INTRODUCTION

Background: Although known to Arab and Malay sailors as early as the 10th century, Mauritius was first explored by the Portuguese in the 16th century and subsequently settled by the Dutch—who named it in honor of Prince Maurits van NASSAU—in the 17th century. The French assumed control in 1715, developing the island into an important naval base overseeing Indian Ocean trade, and establishing a plantation economy of sugar cane. The British captured the island in 1810, during the Napoleonic Wars. Mauritius remained a strategically important British naval base, and later an air station, playing an important role during World War II for anti-submarine and convoy operations, as well as the collection of signals intelligence.

Independence from the UK was attained in 1968. A stable democracy with regular free elections and a positive human rights record, the country has attracted considerable foreign investment and has earned one of Africa's highest per capita incomes.

ECONOMY

Economy—overview: Since independence in 1968, Mauritius has developed from a low-income, agriculturally based economy to a middle-income diversified economy with growing industrial, financial, and tourist sectors. For most of this period, annual growth has been on the order of 5% to 6%. This achievement has been reflected in more equitable income distribution, increased life expectancy, lowered infant mortality, and a much-improved infrastructure. The economy rests on sugar, tourism, textiles and apparel, and financial services, and is expanding into fish processing, information and communications technology, and hospitality and property development. Sugarcane is grown on about 90% of the cultivated land area and accounts for 15% of export earnings. The government's development strategy centers on creating vertical and horizontal clusters of development in these sectors. Mauritius has attracted more than 32,000 offshore entities, many aimed at commerce in India, South Africa, and China. Investment in the banking sector alone has reached over \$1 billion. Mauritius, with its strong textile sector, has been well poised to take advantage of the Africa Growth and Opportunity Act (AGOA). Mauritius' sound economic policies and prudent banking practices helped to mitigate negative effects of the global financial crisis in 2008-09. GDP grew in the 3-4% per year range in 2010-12, and the country continues to expand its trade and investment outreach around the globe.

MEXICO

INTRODUCTION

Background: The site of several advanced Amerindian civilizations—including the Olmec, Toltec, Teotihuacan, Zapotec, Maya, and Aztec—Mexico was conquered and colonized by Spain in the early 16th century. Administered as the Viceroyalty of New Spain for three centuries, it achieved its

independence early in the 19th century. The global financial crisis beginning in late 2008 caused a massive economic downturn the following year, although growth returned quickly in 2010. Ongoing economic and social concerns include low real wages, underemployment for a large segment of the population, inequitable income distribution, and few advancement opportunities for the largely indigenous population in the impoverished southern states. The elections held in 2000 marked the first time since the 1910 Mexican Revolution that an opposition candidate—Vicente FOX of the National Action Party (PAN)—defeated the party in government, the Institutional Revolutionary Party (PRI). He was succeeded in 2006 by another PAN candidate Felipe CALDERÓN, but the PRI regained the presidency in 2012. Since 2007,

Mexico's powerful drug-trafficking organizations have engaged in bloody feuding, resulting in tens of thousands of drug-related homicides.

Flag description: three equal vertical bands of green (hoist side), white, and red; Mexico's coat of arms (an eagle with a snake in its beak perched on a cactus) is centered in the white band; green signifies hope, joy, and love; white represents peace and honesty; red stands for hardiness, bravery, strength, and valor; the coat of arms is derived from a legend that the wandering Aztec people were to settle at a location where they would see an eagle on a cactus eating a snake; the city they founded, Tenochtitlan, is now Mexico City

note: similar to the flag of Italy, which is shorter, uses lighter shades of red and green, and does not have anything in its white band

National symbol(s): golden eagle

National anthem: *name:* "Himno Nacional Mexicano" (National Anthem of Mexico)

lyrics/music: Francisco Gonzalez BOCANEGRA/Jaime Nuno ROCA

note: adopted 1943, in use since 1854; the anthem is also known as "Mexicanos, al grito de Guerra" (Mexicans, to the War Cry); according to tradition, Francisco Gonzalez BOCANEGRA, an accomplished poet, was uninterested in submitting lyrics to a national anthem contest; his fiancée locked him in a room and refused to release him until the lyrics were completed

ECONOMY

Economy—overview: Mexico has a free market economy in the trillion dollar class. It contains a mixture of modern and outmoded industry and agriculture, increasingly dominated by the private sector. Recent administrations have expanded competition in seaports, railroads, telecommunications, electricity generation, natural gas distribution, and airports. Per capita income is roughly one-third that of the US; income distribution remains highly unequal. Since the implementation of the North American Free Trade Agreement

(NAFTA) in 1994, Mexico's share of US imports has increased from 7% to 12%, and its share of Canadian imports has doubled to 5.5%. Mexico has free trade agreements with over 50 countries including Guatemala, Honduras, El Salvador, the European Free Trade Area, and Japan—putting more than 90% of trade under free trade agreements. In 2012 Mexico formally joined the Trans-Pacific Partnership negotiations and in July it formed the Pacific Alliance with Peru, Colombia and Chile. In 2007, during its first year in office, the Felipe CALDERON administration was able to garner support from the opposition to successfully pass pension and fiscal reforms. The administration passed an energy reform measure in 2008 and another fiscal reform in 2009. Mexico's GDP plunged 6.2% in 2009 as world demand for exports dropped, asset prices tumbled, and remittances and investment declined. GDP posted positive growth of 5.6% in 2010 with exports—particularly to the United States—leading the way. Growth slowed to 3.9% in 2011 and slightly recovered to 4% in 2012. In November 2012, Mexico's legislature passed a comprehensive labor reform which was signed into law by former President Felipe CALDERÓN. Mexico's new PRI government, led by President Enrique PENA NIETO, has said it will prioritize structural economic reforms and competitiveness. The new president signed the Pact for Mexico, an agreement that lists 95 priority commitments, along with the leaders of the country's three main political parties: the Institutional Revolutionary Party (PRI), the National Action Party (PAN) and the Party of the Democratic Revolution (PRD).

TRANSNATIONAL ISSUES

Disputes—International: abundant rainfall in recent years along much of the Mexico-US border region has ameliorated periodically strained water-sharing arrangements; the US has intensified security measures to monitor and control legal and illegal personnel, transport, and commodities across its border with Mexico; Mexico must deal with thousands of impoverished Guatemalans and other Central Americans who cross the porous border looking for work in Mexico and the United States; Belize and Mexico are working to solve minor border demarcation discrepancies arising from inaccuracies in the 1898 border treaty

Refugees and internally displaced persons: IDPs: 160,000 (government's quashing of Zapatista uprising in 1994 in eastern Chiapas Region; drug cartel violence and government's military response since 2007; violence between and within indigenous groups) (2011)

Illicit drugs: major drug-producing and transit nation; world's second largest opium poppy cultivator; opium poppy cultivation in 2009 rose 31% over 2008 to 19,500 hectares yielding a potential production of 50 metric tons of pure heroin, or 125 metric tons of "black tar" heroin, the dominant form of Mexican heroin in the western United States; marijuana cultivation increased 45% to 17,500 hectares in 2009; government conducts the largest independent illicit-crop eradication program in the world; continues as the primary transshipment country for US-bound cocaine from South America, with an estimated 95% of annual cocaine movements toward the US stopping in Mexico; major drug syndicates control the majority of drug trafficking throughout the country; producer and distributor of ecstasy; significant money-laundering center; major supplier of heroin and largest foreign supplier of marijuana and methamphetamine to the US market (2007)

FEDERATED STATES OF MICRONESIA

INTRODUCTION

Background: In 1979 the Federated States of Micronesia, a UN Trust Territory under US administration, adopted a constitution. In 1986, independence was attained under a Compact of Free Association with the US, which was amended and renewed in 2004. Present concerns include large-scale unemployment, overfishing, and overdependence on US aid.

ECONOMY

Economy—overview: Economic activity consists of subsistence farming and fishing and government which is funded largely by Compact of Free Association (Compact) assistance provided by the US. The islands have few known mineral deposits worth commercial exploration. The potential for tourism is also limited by isolation, lack of adequate facilities, and limited air and water connections hinder development. Under the terms of the original Compact, the US provided \$1.3 billion in grants and aid in 1986-2001. The US and the Federated States of Micronesia (FSM) negotiated a second (amended) Compact agreement in 2002-2003 that took effect in 2004. The amended Compact runs for a 20-year period to 2024; during which the US will provide roughly \$2.1 billion to the FSM. The amended Compact also includes a Trust Fund for the people of the FSM which is to provide an income stream beyond 2024 when Compact grants are to end. The country's medium-term economic outlook appears fragile because of reduced US assistance and lackluster performance of its small and stagnant private sector.

MOLDOVA

INTRODUCTION

Background: Part of Romania during the interwar period, Moldova was incorporated into the Soviet Union at the close of World War II. Although the country has been independent from the USSR since 1991, Russian forces have remained on Moldovan territory east of the Nistru River supporting a Transnistrian separatist region

composed of a Slavic majority population (mostly Ukrainians and Russians), but with a sizeable ethnic Moldovan minority. One of the poorest nations in Europe, Moldova became the first former Soviet state to elect a Communist, Vladimir VORONIN, as its president in 2001. VORONIN served as Moldova's president until he resigned in September 2009, following the opposition's gain of a narrow majority in July parliamentary elections and the Communist Party's (PCRM) subsequent inability to attract the three-fifths of parliamentary votes required to elect a president. Four Moldovan opposition parties formed a new coalition, the Alliance for European Integration (AEI), which has acted as Moldova's governing coalition since. Moldova experienced significant political uncertainty between 2009 and early 2012, holding three general elections and numerous presidential ballots in parliament, all of which failed to secure a president. Following November 2010 parliamentary elections, a reconstituted AEI-coalition consisting of three of the four original AEI parties formed a government, and in March 2012 was finally able to elect an independent president.

progress from its small economic base. With its moderate climate and good farmland, Moldova's economy relies heavily on its agriculture sector, featuring fruits, vegetables, wine, and tobacco. With few natural energy resources, Moldova imports almost all of its energy supplies from Russia and Ukraine. Moldova's dependence on Russian energy is underscored by an estimated \$4.3 billion debt to Russian natural gas supplier Gazprom due largely to unreimbursed natural gas consumption in the separatist Transnistria region. Previous Russian decisions to ban Moldovan wine and agricultural products, coupled with their decision to double the price Moldova paid for Russian natural gas and the large debt continue to hamper economic growth. Moldova also depends heavily on the annual \$1 billion in remittances from the estimated one million Moldovans working in Europe and former Soviet Bloc countries. During the global financial crisis in 2009, Moldova experienced a 6% contraction of its GDP, a shrinkage due to increased unemployment and decrease in remittances. To stabilize the country, the IMF allocated \$186 million to Moldova to cover its immediate budgetary needs in the fall of 2009, and the Moldovan Government agreeing with the IMF to a new program worth \$574 million. In 2010, an upturn in the world economy boosted GDP growth to about 7% and inflation to more than 7%. Economic reforms have been slow because of corruption and strong political forces backing government controls. Nevertheless, the government's primary goal of EU integration has resulted in some market-oriented progress. The granting of EU trade preferences has encouraged higher growth rates, but the agreements are unlikely to serve as a panacea, given the extent to which export success depends on higher quality standards and other factors. The economy had modest growth in 2011, expanding by 6.8%. However, in 2012, with the Euro crisis and a devastating drought, Moldova's GDP stalled at an estimated 0.3% growth over 2011. Moldova's economic future remains vulnerable to political uncertainty, weak administrative capacity, vested bureaucratic interests, higher fuel prices and the concerns of foreign investors as well as the presence of an illegal separatist regime in Moldova's Transnistria region.

TRANSNATIONAL ISSUES

Disputes—international: Moldova and Ukraine operate joint customs posts to monitor the transit of people and commodities through Moldova's break-away Transnistria region, which remains under the auspices of an Organization for Security and Cooperation in Europe-mandated peacekeeping mission comprised of Moldovan, Transnistrian, Russian, and Ukrainian troops

Illicit drugs: limited cultivation of opium poppy and cannabis, mostly for CIS consumption; transshipment point for illicit drugs from Southwest Asia via Central Asia to Russia, Western Europe, and possibly the US; widespread crime and underground economic activity

MONACO

INTRODUCTION

Background: The Genoese built a fortress on the site of present day Monaco in 1215. The current ruling Grimaldi family first seized temporary control in 1297, and again in 1331, but were not able to permanently secure their holding until 1419. Economic development was spurred in the late 19th century with a railroad linkup to France and the opening of a casino. Since then, the principality's mild climate, splendid scenery, and gambling facilities have made Monaco world famous as a tourist and recreation center.

ECONOMY

Economy—overview: Monaco, bordering France on the Mediterranean coast, is a popular resort, attracting tourists to its casino and pleasant climate. The principality also is a banking center and has successfully sought to diversify into services and small, high-value-added, nonpolluting industries. The state has no income tax and low business taxes and thrives as a tax haven both for individuals who have established residence and for foreign companies that have set up businesses and offices. Monaco, how ever, is not a tax-free shelter; it charges nearly 20% value-added tax, collects stamp duties, and companies face a 33% tax on profits unless they can show that three-quarters of profits are generated within the principality. Monaco's reliance on tourism and banking for its economic growth has left it vulnerable to a downturn in France and other European economies which are the principality's main trade partners. In 2009, Monaco's GDP fell by 11.5% as the euro-zone crisis precipitated a sharp drop in tourism and retail activity and home sales. A modest recovery ensued in 2010 with GDP growth of 2.5%, but Monaco's economic prospects remain clouded in uncertainty tied to future euro-zone growth. Weak economic growth also has deteriorated public finances as the principality recorded a budget deficit of 1.3% of GDP in 2012. Monaco was formally removed from the OECD's "grey list" of uncooperative tax jurisdictions in late 2009, but continues to face international pressure to abandon its banking secrecy laws and help combat tax evasion. The state retains monopolies in a number of sectors, including tobacco, the telephone network, and the postal service. Living standards are high, roughly comparable to those in prosperous French metropolitan areas.

MONGOLIA

INTRODUCTION

Background: The Mongols gained fame in the 13th century when under Chinggis KHAAN they established a huge Eurasian empire through conquest. After his death the empire was divided into several powerful Mongol states, but these broke apart in the 14th century. The Mongols eventually retired to their original steppe homelands and in the late 17th century came under Chinese rule. Mongolia won its independence in 1921 with Soviet backing and a Communist regime was installed in 1924. The modern country of Mongolia, however, represents only part of the Mongols' historical homeland; more ethnic Mongolians live in the Inner Mongolia Autonomous Region in the People's Republic of China than in Mongolia. Following a peaceful democratic revolution, the ex-Communist Mongolian People's Revolutionary Party (MPRP) won elections in 1990 and 1992, but was defeated by the Democratic Union Coalition (DUC) in the 1996 parliamentary election. The MPRP won an overwhelming majority in the 2000 parliamentary election, but the party lost seats in the 2004 election and shared power with democratic coalition parties from 2004-08. The MPRP regained a solid majority in the 2008 parliamentary elections but nevertheless formed a coalition government with the Democratic Party that lasted until January 2012. In 2009, current President ELBEGDORJ of the Democratic Party was elected to office. In 2010, the MPRP voted to retake the name of the Mongolian People's Party (MPP), a name it used in the early 1920s. Shortly thereafter, a new party was formed by former president ENKHBAYAR, which adopted the MPRP name. In the 2012 Parliamentary elections, a coalition of four political parties led by the Democratic Party, gained control of the Parliament.

ECONOMY

Economy—overview: Mongolia's extensive mineral deposits and attendant growth in mining-sector activities have transformed Mongolia's economy, which traditionally has been dependent on herding and agriculture. Mongolia's copper, gold, coal, molybdenum, fluorspar, uranium, tin, and tungsten deposits, among others, have

attracted foreign direct investment. Soviet assistance, at its height one-third of GDP, disappeared almost overnight in 1990 and 1991 at the time of the dismantlement of the USSR. The following decade saw Mongolia endure both deep recession, because of political inaction and natural disasters, as well as economic growth, because of reform-embracing, free-market economics and extensive privatization of the formerly state-run economy. The country opened a fledgling stock exchange in 1991. Mongolia joined the World Trade Organization in 1997 and seeks to expand its participation in regional economic and trade regimes. Growth averaged nearly 9% per year in 2004-08 largely because of high copper prices globally and new gold production. By late 2008, Mongolia was hit hard by the global financial crisis. Slower global economic growth hurt the country's exports, notably copper, and slashed government revenues. As a result, Mongolia's real economy contracted 1.3% in 2009. In early 2009, the International Monetary Fund reached a \$236 million Stand-by Arrangement with Mongolia and the country has largely emerged from the crisis with better regulations and closer supervision. The banking sector strengthened but weaknesses remain. In October 2009, Mongolia passed long-awaited legislation on an investment agreement to develop the Oyu Tolgoi mine, considered to be among the world's largest untapped copper deposits. Recent calls by nationalist politicians to renegotiate the investment agreement, however, have called into question the attractiveness of Mongolia as a destination for foreign direct investment. Negotiations to develop the massive Tavan Tolgoi coal field face similar obstacles. The economy grew by 6.4% in 2010, 17.5% in 2011, and by more than 12.3% in 2012, largely on the strength of commodity exports to nearby countries and high government spending domestically. Mongolia's economy, however, faces near-term economic risks from the government's loose fiscal policies, which are contributing to high inflation, and uncertainties in foreign demand for Mongolian exports. Trade with China represents more than half of Mongolia's total external trade—China receives more than 90% of Mongolia's exports. Mongolia purchases 95% of its petroleum products and a substantial amount of electric power from Russia, leaving it vulnerable to price increases. Due to severe winter weather in 2009-10, Mongolia lost 22% of its total livestock, and meat prices doubled. Inflation remained higher than 10% for much of 2010-12, due in part to higher food and fuel prices. The economic slow down in China during 2011-2012 resulted in fewer Mongolian exports, a widened trade gap, and decreased government revenues, putting pressure on Mongolian fiscal policy. Remittances from Mongolians working abroad, particularly in South Korea, are significant.

MONTENEGRO

INTRODUCTION

Background: The use of the name Crna Gora (Montenegro) began in the 13th century in reference to a highland region in the Serbian province of Zeta. The later medieval state of Zeta maintained its existence until 1496 when Montenegro finally fell under Ottoman rule. Over subsequent centuries, Montenegro, while a part of the Ottoman Empire, was able to maintain a level of autonomy. From the 16th to 19th centuries, Montenegro was a theocracy ruled by a series of bishop princes; in 1852, it was transformed into a secular principality. Montenegro was recognized as an independent sovereign principality at the Congress of Berlin in 1878. After World War I, during which Montenegro fought on the side of the Allies, Montenegro was absorbed by the Kingdom of Serbs, Croats, and Slovenes, which became the Kingdom of Yugoslavia in 1929; at the conclusion of World War II, it became a constituent republic of the Socialist Federal Republic of Yugoslavia. When the latter dissolved in 1992, Montenegro federated with Serbia, first as the Federal Republic of Yugoslavia and, after 2003, in a looser State Union of Serbia and Montenegro. In May 2006, Montenegro invoked its right under the Constitutional Charter of Serbia and Montenegro to hold a referendum on independence from the state union. The vote for severing ties with Serbia barely exceeded 55%—the threshold set by the EU—allowing Montenegro to formally restore its independence on 3 June 2006.

Flag description: a red field bordered by a narrow golden-yellow stripe with the Montenegrin coat of arms centered; the arms consist of a double-headed golden eagle—symbolizing the unity of church and state—surmounted by a crown; the eagle holds a golden scepter in its right claw and a blue orb in its left; the breast shield over the eagle shows a golden lion passant on a green field in front of a blue sky; the lion is symbol of episcopal authority and harks back to the three and a half centuries that Montenegro was ruled as a theocracy

National symbol(s): double-headed eagle

National anthem: name: "Oj, svijetla majska zoro" (Oh, Bright Dawn of May)
lyrics/music: Sekula DRLJEVIC/unknown, arranged by Zarko MIKOVIC
note: adopted 2004, the anthem's music is based on a Montenegrin folk song

ECONOMY

Economy—overview: Montenegro's economy is transitioning to a market system, but the state sector remains large and additional institutional changes are needed. The economy relies heavily on tourism and the export of refined metals. Unprofitable state-owned enterprises weigh on public finances. Montenegro severed its economy from federal control and from Serbia during the MILOSEVIC era and maintained its own central bank, adopted the deutsch mark, then the euro—rather than the Yugoslav dinar—as official currency, collected customs tariffs, and managed its own budget. The dissolution of the

loose political union between Serbia and Montenegro in 2006 led to separate membership in several international financial institutions, such as the European Bank for Reconstruction and Development. In January 2007, Montenegro joined the World Bank and IMF. Montenegro became the 156th member of World Trade Organization in December 2011. The European Council (EC) granted candidate country status to Montenegro at the December 2010 session. Montenegro began negotiations to join the EC in June, 2012, having met the conditions set down by the European Council, which called on Montenegro to take steps to fight corruption and organized crime. Unemployment and regional disparities in development are key political and economic problems. Montenegro has privatized its large aluminum complex—the dominant industry—as well as most of its financial sector, and has begun to attract foreign direct investment in the tourism sector. The global financial crisis had a significant negative impact on the economy, due to the ongoing credit crunch, a decline in the real estate sector, and a fall in aluminum exports. In 2012, real GDP growth slipped to 0.5%, reflecting the general downturn in most of Europe.

MONTSERRAT

INTRODUCTION

Background: English and Irish colonists from St. Kitts first settled on Montserrat in 1632; the first African slaves arrived three decades later. The British and French fought for possession of the island for most of the 18th century, but it finally was confirmed as a British possession in 1783. The island's sugar plantation economy was converted to small farm landholdings in the mid 19th century. Much of this island was devastated and two-thirds of the population fled abroad because of the eruption of the Soufriere Hills Volcano that began on 18 July 1995. Montserrat has endured volcanic activity since, with the last eruption occurring in July 2003.

ECONOMY

Economy—overview: Severe volcanic activity, which began in July 1995, has put a damper on this small, open economy. A catastrophic eruption in June 1997 closed the airport and seaports, causing further economic and social dislocation. Two-thirds of the 12,000 inhabitants fled the island. Some began to return in 1998 but lack of housing limited the number. The agriculture sector continued to be affected by the lack of suitable land for farming and the destruction of crops. Prospects for the economy depend largely on developments in relation to the volcanic activity and on public sector construction activity. Half of the island remains uninhabitable. In January 2013, the EU announced the disbursement of a \$55.2 million aid package to Montserrat in order to boost the country's economic recovery, with a specific focus on public finance management, public sector reform, and prudent economic management.

MOROCCO

INTRODUCTION

Background: In 788, about a century after the Arab conquest of North Africa, a series of Moroccan Muslim dynasties began to rule in Morocco. In the 16th century, the Sa'adi monarchy, particularly under Ahmad al-MANSUR (1578-1603), repelled foreign invaders and inaugurated a golden age. The Alaouite dynasty, to which the current Moroccan royal family belongs, dates from the 17th century. In 1860, Spain occupied northern Morocco and ushered in a half century of trade rivalry among European powers that saw Morocco's sovereignty steadily erode; in 1912, the French imposed a protectorate over the country. A protracted independence struggle with France ended successfully in 1956. The internationalized city of Tangier and most Spanish possessions were turned over to the new country that same year. Sultan MOHAMMED V, the current monarch's grandfather, organized the new state as a constitutional monarchy and in 1957 assumed the title of king. Although Morocco is not the UN-recognized Administering Power for the Western Sahara, it exercises de facto administrative

control there. The UN assists with direct negotiations between Morocco and the Polisario Front, but the status of the territory remains unresolved. Gradual political reforms in the 1990s resulted in the establishment of a bicameral legislature, which first met in 1997. Morocco enjoys a moderately free press, but the government has taken action against journalists who they perceive to be challenging the monarchy, Islam, or the status of Western Sahara. Influenced by protests elsewhere in the region, in February 2011 thousands of Moroccans began weekly rallies in multiple cities across the country to demand greater democracy and end to government corruption. Overall the response of Moroccan security forces was subdued compared to the violence elsewhere in the region. King MOHAMMED VI responded quickly with a reform program that included a new constitution and early elections. The constitution was passed by popular referendum in July 2011; some new powers were extended to parliament and the prime minister, but ultimate authority remains in the hands of the monarch. In early elections in November 2012, the Justice and Development Party—a moderate Islamist party, won the largest number of seats, becoming the first Islamist party to lead the Moroccan Government. In January 2012, Morocco assumed a nonpermanent seat on the UN Security Council for the 2012-13 term.

ECONOMY

Economy—overview: Morocco has capitalized on its proximity to Europe and relatively low labor costs to build a diverse, open, market-oriented economy. In the 1980s Morocco was a heavily indebted country before pursuing austerity measures and pro-market reforms, overseen by the IMF. Since taking the throne in 1999, King MOHAMMED VI has presided over a stable economy marked by steady growth, low inflation, and gradually falling unemployment, although a poor harvest and economic difficulties in Europe contributed to an economic slowdown in 2012. Industrial development strategies and infrastructure improvements—most visibly illustrated by a new port and free trade zone near Tangier—are improving Morocco's competitiveness. Morocco also seeks to expand its renewable energy capacity with a goal of making renewable 40% of electricity output by 2020. Key sectors of the economy include agriculture, tourism, phosphates, textiles, apparel, and subcomponents. To boost exports, Morocco entered into a bilateral Free Trade Agreement with the United States in 2006 and an Advanced Status agreement with the European Union in 2008. Despite Morocco's economic progress, the country suffers from high unemployment, poverty, and illiteracy, particularly in rural areas. In 2011 and 2012, high prices on fuel—which is subsidized and almost entirely imported—strained the government's budget and widened the country's current account deficit. Key economic challenges for Morocco include fighting corruption and reforming the education system, the judiciary, and the government's costly subsidy program.

TRANSNATIONAL ISSUES

Disputes—international: claims and administers Western Sahara whose sovereignty remains unresolved; Morocco protests Spain's control over the coastal enclaves of Ceuta, Melilla, and Penon de Velez de la Gomera, the islands of Penon de Alhucemas and Islas Chafarinas, and surrounding waters; both countries claim Isla Perejil (Leila Island); discussions have not progressed on a comprehensive maritime delimitation, setting limits on resource exploration and refugee interdiction,

since Morocco's 2002 rejection of Spain's unilateral designation of a median line from the Canary Islands; Morocco serves as one of the primary launching areas of illegal migration into Spain from North Africa; Algeria's border with Morocco remains an irritant to bilateral relations, each nation accusing the other of harboring militants and arms smuggling; the National Liberation Front's assertions of a claim to Chirac Pastures in southeastern Morocco is a dormant dispute

Illicit drugs: one of the world's largest producers of illicit hashish; shipments of hashish mostly directed to Western Europe; transit point for cocaine from South America destined for Western Europe; significant consumer of cannabis

MOZAMBIQUE

INTRODUCTION

Background: Almost five centuries as a Portuguese colony came to a close with independence in 1975. Large-scale emigration, economic dependence on South Africa, a severe drought, and a prolonged civil war hindered the country's development until the mid 1990s. The ruling Front for the Liberation of Mozambique (Frelimo) party formally abandoned Marxism in 1989, and a new constitution the following year provided for multiparty elections and a free market economy. A UN-negotiated peace agreement between Frelimo and rebel Mozambique National Resistance (Renamo) forces ended the fighting

in 1992. In December 2004, Mozambique underwent a delicate transition as Joaquim CHISSANO stepped down after 18 years in office. His elected successor, Armando Emilio GUEBUZA, promised to continue the sound economic policies that have encouraged foreign investment. President GUEBUZA was reelected to a second term in October 2009. However, the elections were flawed by voter fraud, questionable disqualification of candidates, and Frelimo use of government resources during the campaign. As a result, Freedom House removed Mozambique from its list of electoral democracies.

ECONOMY

Economy—overview: At independence in 1975, Mozambique was one of the world's poorest countries. Socialist mismanagement and a brutal civil war from 1977-92 exacerbated the situation. In 1987, the government embarked on a series of macroeconomic reforms designed to stabilize the economy. These steps, combined with donor assistance and with political stability since the multi-party elections in 1994, have led to dramatic improvements in the country's growth rate. Fiscal reforms, including the introduction of a value-added tax and reform of the customs service, have improved the government's revenue collection abilities. In spite of these gains, Mozambique remained dependent upon foreign assistance for 40% of its 2012 annual budget and over half the population remained below the poverty line. Subsistence agriculture continues to employ the vast majority of the country's work force and smallholder agricultural productivity and productivity growth is weak. A substantial trade imbalance persists although aluminum production from the Mozal smelter has significantly boosted export earnings in recent years. In 2012, The Mozambican government took over Portugal's last remaining share in the Cahora Bassa Hydroelectricity Company (HCB), a significant contributor to the Southern African Power Pool. The government has plans to expand the Cahora Bassa Dam and build additional dams to increase its electricity exports and fulfill the needs of its burgeoning domestic industries. Mozambique's once substantial foreign debt has been reduced through forgiveness and rescheduling under the IMF's Heavily Indebted Poor Countries (HIPC) and Enhanced HIPC initiatives, and is now at a manageable level. In July 2007, the US government's Millennium Challenge Corporation (MCC) signed a \$506.9 million Compact with Mozambique. Compact projects will end in September 2013 and are focusing on improving sanitation, roads, agriculture, and the business regulation environment in an effort to spur economic growth in the four northern provinces of the country. Citizens rioted in September 2010, after fuel, water, electricity, and bread price increases were announced. In an attempt to lessen the negative impact on people, the government implemented subsidies, decreased taxes and tariffs, and instituted other fiscal measures. Mozambique grew at an average annual rate of 6%-8% in the decade up to 2012, one of Africa's strongest performances. Mozambique's ability to attract large investment

projects in natural resources is expected to fuel continued high growth in coming years. Revenues from these vast resources, including natural gas, coal, titanium and hydroelectric capacity, could overtake donor assistance within five years.

country comparison to the world: 147

Telephones—mobile cellular: 7.855 million (2011)
country comparison to the world: 89

Telephone system: *general assessment:* a fair telecommunications system that is shackled with a heavy state presence, lack of competition, and high operating costs and charges
domestic: stagnation in the fixed-line network contrasts with rapid growth in the mobile-cellular network; mobile-cellular coverage now includes all the main cities and key roads, including those from Maputo to the South African and Swaziland borders, the national highway through Gaza and Inhambane provinces, the Beira corridor, and from Nampula to Nacala; extremely low fixed-line teledensity; despite significant growth in mobile-cellular services, teledensity remains low at about 35 per 100 persons
international: country code—258; landing point for the EASSy and SEACOM fiber-optic submarine cable systems; satellite earth stations—5 Intelsat (2 Atlantic Ocean and 3 Indian Ocean) (2011)

Broadcast media: state-run TV station supplemented by private TV station; Portuguese state TV's African service, RTP Africa, and Brazilian-owned TV Miramar are available; state-run radio provides nearly 100% territorial coverage and broadcasts in multiple languages; a number of privately owned and community-operated stations; transmissions of multiple international broadcasts are available (2007)

TRANSNATIONAL ISSUES

Disputes—international: South Africa has placed military units to assist police operations along the border of Lesotho, Zimbabwe, and Mozambique to control smuggling, poaching, and illegal migration

Illicit drugs: southern African transit point for South Asian hashish and heroin, and South American cocaine probably destined for the European and South African markets; producer of cannabis (for local consumption) and methaqualone (for export to South Africa); corruption and poor regulatory capability make the banking system vulnerable to money laundering, but the lack of a well-developed financial infrastructure limits the country's utility as a money-laundering center

NAMIBIA

INTRODUCTION

Background: South Africa occupied the German colony of South-West Africa during World War I and administered it as a mandate until after World War II, when it annexed the territory. In 1966 the Marxist South-West Africa People's Organization (SWAPO) guerrilla group launched a war of independence for the area that became Namibia, but it was not until 1988 that South Africa agreed to end its administration in accordance with a UN peace plan for the entire region. Namibia has been governed by SWAPO since the country won independence in 1990. Hifikepunye POHAMBIA was elected president in November 2004 in a landslide victory replacing Sam NUJOMA who led the country during its first 14 years of self rule. POHAMBIA was reelected in November 2009.

ECONOMY
Economy—overview: The economy is heavily dependent on the extraction and processing of minerals for export. Mining accounts for 8% of GDP, but provides more than 50% of foreign exchange earnings. Rich alluvial diamond deposits make Namibia a primary source for gem-quality diamonds. Marine diamond mining is becoming increasingly important as the terrestrial diamond supply has dwindled. Namibia is the world's fourth-largest producer of uranium. It also produces large quantities of zinc and is a small producer of gold and other minerals. The mining sector employs only about 3% of the population. Namibia normally imports about 50% of its cereal requirements; in drought years food shortages are a major problem in rural areas. A high per capita GDP, relative to the region, hides one of the world's most unequal income distributions, as shown by Namibia's 59.7 GINI coefficient. The Namibian economy is closely linked to South Africa with the Namibian dollar pegged one-to-one to the South African rand. Namibia receives 30%-40% of its revenues from the Southern African Customs Union (SACU). Volatility in the size of Namibia's annual SACU allotment complicates budget planning. Namibia's economy remains vulnerable to volatility in the price of uranium. The rising cost of mining diamonds, increasingly from the sea, has reduced profit margins. Namibian authorities recognize these issues and have emphasized the need to increase higher value raw materials, manufacturing, and services, especially in the logistics and transportation sectors.

TRANSNATIONAL ISSUES

Disputes—International: concerns from international experts and local populations over the Okavango Delta ecology in Botswana and human displacement scuttled Namibian plans to construct a hydroelectric dam on Pops Falls along the Angola-Namibia border; the governments of South Africa and Namibia have not signed or ratified the text of the 1994 Surveyor's General agreement placing the boundary in the middle of the Orange River; Namibia has supported, and in 2004 Zimbabwe dropped objections to, plans between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river

NAURU

INTRODUCTION

Background: The exact origins of the Nauruans are unclear since their language does not resemble any other in the Pacific region. Germany annexed the island in 1888. A German-British consortium began mining the island's phosphate deposits early in the 20th century. Australian forces occupied Nauru in World War I; it subsequently became a League of Nations mandate. After the Second World War—and a brutal occupation by Japan—Nauru became a UN trust territory. It achieved independence in 1968 and joined the UN in 1999 as the world's smallest independent republic.

ECONOMY

Economy—overview: Revenues of this tiny island traditionally have come from exports of phosphates. Few other resources exist, with most necessities being imported, mainly from Australia, its former occupier and later major source of support. In 2005 an Australian company entered into an agreement to exploit remaining supplies. Primary reserves of phosphates were exhausted and mining ceased in 2006, but mining of a deeper layer of "secondary phosphate" in the interior of the island began the following year. The secondary phosphate deposits may last another 30 years. The rehabilitation of mined land and the replacement of income from phosphates are serious long-term problems. In anticipation of the exhaustion of Nauru's phosphate deposits, substantial amounts of phosphate income were invested in trust funds to help cushion the transition and provide for Nauru's economic future. As a result of heavy spending from the trust funds, the government faced virtual bankruptcy. To cut costs the government has frozen wages and reduced overstuffed public service departments. Nauru lost further revenue in 2008 with the closure of Australia's refugee processing center, making it almost totally dependent on food imports and foreign aid. Housing, hospitals, and other capital plant are deteriorating. The cost to Australia of keeping the government and economy afloat continues to climb. Few comprehensive statistics on the Nauru economy exist with estimates of Nauru's GDP varying widely.

NAVASSA ISLAND

INTRODUCTION

Background: This uninhabited island was claimed by the US in 1857 for its guano. Mining took place between 1865 and 1898. The lighthouse, built in 1917, was shut down in 1996 and administration of Navassa Island transferred from the US Coast Guard to the Department of the Interior. A 1998 scientific expedition to the island described it as a unique preserve of Caribbean biodiversity; the following year it became a National Wildlife Refuge and annual scientific expeditions have continued.

GEOGRAPHY

NEPAL

INTRODUCTION

Background: In 1951, the Nepali monarch ended the century-old system of rule by hereditary premiers and instituted a cabinet system of government. Reforms in 1990 established a multiparty democracy within the framework of a constitutional monarchy. An insurgency led by Maoist extremists broke out in 1996. The ensuing 10-year civil war between insurgents and government forces witnessed the dissolution of the cabinet and parliament and assumption of absolute power by

the king. Several weeks of mass protests in April 2006 were followed by several months of peace negotiations between the Maoists and government officials, and culminated in a November 2006 peace accord and the promulgation of an interim constitution. Following a nationwide election in April 2008, the newly formed Constituent Assembly (CA) declared Nepal a federal democratic republic and abolished the monarchy at its first meeting the following month. The CA elected the country's first president in July. Between 2008 and 2011 there have been four different coalition governments, led twice by the United Communist Party of Nepal-Maoist, which received a plurality of votes in the Constituent Assembly election, and twice by the Communist Party of Nepal-United Marxist-Leninist. In August 2011, Baburam BHATTARAI of the United Communist Party of Nepal (Maoist) became prime minister. After the CA failed to draft a constitution by the May 2012 deadline, BHATTARAI dissolved the CA and called for new elections. Months of negotiations

failed to produce a new election date. Finally, in March 2013, the chief justice of Nepal's Supreme Court, Khil Raj REGMI, was sworn in as Chairman of the Interim Council of Ministers for Elections to lead an interim government and charged with holding Constituent Assembly elections by December 2013.

Flag description: red with a blue border around the unique shape of two overlapping right triangles; the smaller, upper triangle bears a white stylized moon and the larger, lower triangle displays a white 12-pointed sun; the color red represents the rhododendron (Nepal's national flower) and is a sign of victory and bravery, the blue border signifies peace and harmony; the two right triangles are a combination of two single pennons (pennants) that originally symbolized the Himalaya Mountains while their charges represented the families

of the king (upper) and the prime minister, but today they are understood to denote Hinduism and Buddhism, the country's two main religions; the moon represents the serenity of the Nepalese people and the shade and cool weather in the Himalayas, while the sun depicts the heat and higher temperatures of the lower parts of Nepal; the moon and the sun are also said to express the hope that the nation will endure as long as these heavenly bodies

note: Nepal is the only country in the world whose flag is not rectangular or square

National symbol(s): rhododendron blossom

ECONOMY

Economy—overview: Nepal is among the poorest and least developed countries in the world, with about one-quarter of its population living below the poverty line. Agriculture is the mainstay of the economy, providing a livelihood for three-fourths of the population and accounting for a little over one-third of GDP. Industrial activity mainly involves the processing of agricultural products, including pulses, jute, sugarcane, tobacco, and grain. Nepal has considerable scope for exploiting its potential in hydropower, with an estimated 42,000 MW of feasible capacity, but political instability hampers foreign investment. Additional challenges to Nepal's growth include its landlocked geographic location, civil strife and labor unrest, and its susceptibility to natural disaster.

NETHERLANDS

INTRODUCTION

Background: The Dutch United Provinces declared their independence from Spain in 1579; during the 17th century, they became a leading seafaring and commercial power, with settlements and colonies around the world. After a 20-year French occupation, a Kingdom of the Netherlands was formed in 1815. In 1830 Belgium seceded and formed a separate kingdom. The Netherlands remained neutral in World War I, but suffered invasion and occupation by Germany in World War II. A modern, industrialized nation, the Netherlands is also a large exporter of agricultural products. The country was a founding member of NATO and the EEC (now the EU) and participated in the introduction of the euro in 1999. In October 2010, the former Netherlands Antilles was dissolved and the three smallest islands—Bonaire, Sint Eustatius, and Saba—became special municipalities in the Netherlands administrative structure. The larger islands of Sint Maarten and Curacao joined the Netherlands and Aruba as constituent countries forming the Kingdom of the Netherlands.

Flag description: three equal horizontal bands of red (top), white, and blue; similar to the flag of Luxembourg, which uses a lighter blue and is longer; the colors were those of WILLIAM I, Prince of Orange, who led the Dutch Revolt against Spanish sovereignty in the latter half of the 16th century; originally the upper band was orange, but because it tended to fade to red over time, the red shade was eventually made the permanent color; the banner is perhaps the oldest tricolor in continuous use

National symbol(s): lion

National anthem: *name:* "Het Wilhelmus" (The William)

lyrics/music: Philips VAN MARNIX van Sint Aldegonde (presumed)/unknown

note: adopted 1932, in use since the 17th century, making it the oldest national anthem in the world; also known as "Wilhelmus van Nassouwe" (William of Nassau), it is in the form of an acrostic, where the first letter of each stanza spells the name of the leader of the Dutch Revolt

ECONOMY

Economy—overview: The Dutch economy is the sixth-largest economy in the euro-zone and is noted for its stable industrial relations, moderate unemployment and inflation, a sizable trade surplus, and an important role as a European transportation hub. Industrial activity is predominantly in food processing, chemicals, petroleum refining, and electrical machinery. A highly mechanized agricultural sector employs only 2% of the labor force but provides large surpluses for the food-processing industry and for exports. The Netherlands, along with 11 of its EU partners, began circulating the euro currency on 1 January 2002. After 26 years of uninterrupted economic growth, the Dutch economy—highly dependent on an international financial sector and international trade—contracted by 3.5% in 2009 as a result of the global financial crisis. The Dutch financial sector suffered, due in part to the high exposure of some Dutch banks to U.S. mortgage-backed securities. In 2008, the government nationalized two banks and injected billions of dollars of capital into other financial institutions, to prevent further deterioration of a crucial sector. The government also sought

to boost the domestic economy by accelerating infrastructure programs, offering corporate tax breaks for employers to retain workers, and expanding export credit facilities. The stimulus programs and bank bailouts, however, resulted in a government budget deficit of 5.3% of GDP in 2010 that contrasted sharply with a surplus of 0.7% in 2008. The government of Prime Minister Mark RUTTE began implementing fiscal consolidation measures in early 2011, mainly reductions in expenditures, which resulted in an improved budget deficit in 2011. In 2012 tax revenues dropped nearly 9%, GDP contracted, and the budget deficit deteriorated. Although jobless claims continued to grow, the unemployment rate remained relatively low at 6.8 percent.

NEW CALEDONIA

INTRODUCTION

Background: Settled by both Britain and France during the first half of the 19th century, the island became a French possession in 1853. It served as a penal colony for four decades after 1864. Agitation for independence during the 1980s and early 1990s ended in the 1998 Noumea Accord, which over a period of 15 to 20 years will transfer an increasing amount of governing responsibility from France to New Caledonia. The agreement also commits France to conduct a referendum between 2014 and 2018 to decide whether New Caledonia should assume full sovereignty and independence.

ECONOMY

Economy—overview: New Caledonia has about 25% of the world's known nickel reserves. Only a small amount of the land is suitable for cultivation, and food accounts for about 20% of imports. In addition to nickel, substantial financial support from France—equal to more than 15% of GDP—and tourism are keys to the health of the economy; during 2009-10, France sent more development assistance to New Caledonia than to any of its other overseas territories. Substantial new investment in the nickel industry, combined with the recovery of global nickel prices, brightens the economic outlook for the next several years.

NEW ZEALAND

INTRODUCTION

Background: The Polynesian Maori reached New Zealand in about A.D. 800. In 1840, their chieftains entered into a compact with Britain, the Treaty of Waitangi, in which they ceded sovereignty to Queen Victoria while retaining territorial rights. That same year, the British began the first organized colonial settlement. A series of land wars between 1843 and 1872 ended with the defeat of the native peoples. The British colony of New Zealand became an independent dominion in 1907 and supported the UK militarily in both world wars. New Zealand's full participation in a number of defense alliances lapsed by the 1980s. In recent years, the government has sought to address longstanding Maori grievances.

Government—note:

ECONOMY

Economy—overview: Over the past 20 years the government has transformed New Zealand from an agrarian economy dependent on concessionary British market access to a more industrialized, free market economy that can compete globally. This dynamic growth has boosted real incomes—but left behind some at the bottom of the ladder—and broadened and deepened the technological capabilities of the industrial sector. Per capita income rose for ten consecutive years until 2007 in purchasing power parity terms, but fell in 2008-09. Debt-driven consumer spending drove robust growth in the first half of the decade, helping fuel a large balance of payments deficit that posed a challenge for economic managers. Inflationary pressures caused the central bank to raise its key rate steadily from January 2004 until it was among the highest in the OECD in 2007-08; international capital inflows attracted to the high rates further strengthened the currency and housing market, however, aggravating the current account deficit. The economy fell into recession before the start of the global financial crisis and contracted for five consecutive quarters in 2008-09. In line with global peers, the central bank cut interest rates aggressively and the government developed fiscal stimulus measures. The economy posted a 2% decline in 2009, but pulled out of recession late in the year, and achieved roughly 2% per year growth in 2010-12. Nevertheless, key trade sectors remain vulnerable to weak external demand. The government plans to raise productivity growth and develop infrastructure, while reining in government spending.

NICARAGUA

INTRODUCTION

Background: The Pacific coast of Nicaragua was settled as a Spanish colony from Panama in the early 16th century. Independence from Spain was declared in 1821 and the country became an independent republic in 1838. Britain occupied the Caribbean Coast in the first half of the 19th century, but gradually ceded control of the region in subsequent decades. Violent opposition to governmental manipulation and corruption spread to all classes by 1978 and resulted in a short-lived civil war that brought the Marxist Sandinista guerrillas to power in 1979. Nicaraguan aid to leftist rebels in El Salvador caused the US to sponsor anti-Sandinista contra guerrillas through much of the 1980s. After losing free and fair elections in 1990, 1996, and 2001, former Sandinista President Daniel ORTEGA Saavedra was elected president in 2006 and reelected in 2011. The 2008 municipal elections, 2010 regional elections, November 2011 presidential elections, and 2012 municipal elections were marred by widespread irregularities. Nicaragua's infrastructure and economy—hard hit by the earlier civil war and by Hurricane Mitch in 1998—are slowly being rebuilt, but democratic institutions have been weakened under the ORTEGA administration.

PEOPLE AND SOCIETY

Nationality: noun: Nicaraguan(s)

adjective: Nicaraguan

Ethnic groups: mestizo (mixed Amerindian and white) 69%, white 17%, black 9%, Amerindian 5%

Languages: Spanish (official) 97.5%, Miskito 1.7%, other 0.8% (1995 census)

note: English and indigenous languages found on the Atlantic coast

Religions: Roman Catholic 58.5%, Protestant 23.2% (Evangelical 21.6%, Moravian 1.6%), Jehovah's Witnesses 0.9%, other 1.7%, none 15.7% (2005 census)

Demographic profile: Despite being one of the poorest countries in Latin America, Nicaragua has improved its access to potable water and sanitation and has ameliorated its life expectancy, infant and child mortality, and immunization rates. However, income distribution is very uneven, and the poor, agriculturalists, and indigenous people continue to have less access to healthcare services. Nicaragua's total fertility rate has fallen from around 6 children per woman in 1980 to just above replacement level today, but the high birth rate among adolescents perpetuates a cycle of poverty and low educational attainment. Nicaraguans emigrate primarily to Costa Rica and to a lesser extent the United States. Nicaraguan men have been migrating seasonally to Costa Rica to harvest bananas and coffee since the early 20th century. Political turmoil, civil war, and natural disasters from the 1970s through the 1990s dramatically increased the flow of refugees and permanent migrants seeking jobs, higher wages, and better social and healthcare benefits. Since 2000, Nicaraguan emigration to Costa Rica has slowed and stabilized. Today roughly 300,000 Nicaraguans are permanent residents of Costa Rica—about 75% of the foreign population—and thousands more migrate seasonally for work, many illegally.

Flag description: three equal horizontal bands of blue (top), white, and blue with the national coat of arms centered in the white band; the coat of arms features a triangle encircled by the words REPUBLICA DE NICARAGUA on the top and AMERICA CENTRAL on the bottom; the banner is based on the former blue-white-blue flag of the Federal Republic of Central America; the blue bands symbolize the Pacific Ocean and the Caribbean Sea, while the white band represents the land between the two bodies of water

note: similar to the flag of El Salvador, which features a round emblem encircled by the words REPUBLICA DE EL SALVADOR EN LA AMERICA CENTRAL centered in the white band; also similar to the flag of Honduras, which has five blue stars arranged in an X pattern centered in the white band

National symbol(s): turquoise-browed motmot (bird)

National anthem: *name:* "Salve a ti, Nicaragua" (Hail to Thee, Nicaragua)

lyrics/music: Salomon Ibarra MAYORGA/traditional, arranged by Luis Abraham DELGADILLO

note: although only officially adopted in 1971, the music was approved in 1918 and the lyrics in 1939; the tune, originally from Spain, was used as an anthem for Nicaragua from the 1830's until 1876

ECONOMY

Economy—overview: Nicaragua, the poorest country in Central America and the second poorest in the Western Hemisphere, has widespread underemployment and poverty. The Dominican Republic-Central America-United States Free Trade Agreement (CAFTA-DR) has been in effect since April 2006 and has expanded export opportunities for many agricultural and manufactured goods. Textiles and agriculture combined account for nearly 50% of Nicaragua's exports.

The ORTEGA administration's promotion of mixed business initiatives, owned by the Nicaraguan and Venezuelan state oil firms, together with the weak rule of law, could undermine the investment climate for domestic and international private firms in the near-term. Nicaragua relied on an IMF external credit facility to meet internal and external-debt financing obligations. The most recent IMF program ended in 2011 and Nicaragua is currently in negotiations for a new program. Nicaragua depends heavily on foreign development assistance, however, donors have curtailed this funding in response to November 2008, and subsequent electoral fraud. Nicaragua still struggles with a high public debt burden, however, it succeeded in reducing that burden in 2011. The economy grew at a rate of about 4% in 2012.

NIGER

INTRODUCTION

Background: Niger became independent from France in 1960 and experienced single-party and military rule until 1991, when Gen. Ali SAIBOU was forced by public pressure to allow multiparty elections, which resulted in a democratic government in 1993. Political infighting brought the government to a standstill and in 1996 led to a coup by Col. Ibrahim BARE. In 1999, BARE was killed in a counter coup by military officers who restored democratic rule and held elections that brought Mamadou TANDJA to power in December of that year. TANDJA was reelected in 2004 and in 2009 spearheaded a constitutional amendment that would allow him to extend his term as president. In February 2010, a military coup deposed TANDJA, immediately suspended the constitution, and dissolved the Cabinet. ISSOUFOU Mahamadou emerged victorious from a crowded field in the election following the coup and was inaugurated in April 2011. Niger is one of the poorest countries in the world with minimal government services and insufficient funds to develop its resource base. The largely agrarian and subsistence-based economy is frequently disrupted by extended droughts common to the Sahel region of Africa. The Nigerien Movement for Justice, a predominately Tuareg ethnic group, emerged in February 2007, and attacked several military targets in Niger's northern region throughout 2007 and 2008. Successful government offensives in 2009 limited the rebels' operational capabilities. Niger is facing increased security concerns on its borders from various external threats including insecurity in Libya and spillover from the rebellion in Mali.

ECONOMY

Economy—overview: Niger is a landlocked, Sub-Saharan nation, whose economy centers on subsistence crops, livestock, and some of the world's largest uranium deposits. Agriculture contributes about 40% of GDP and provides livelihood for about 90% of the population. Niger also has sizable reserves of oil, and oil production, refining, and exports are expected to grow significantly between 2011 and 2016. Drought, desertification, and strong population growth have undercut the economy. Niger shares a common currency, the CFA franc, and a common central bank, the Central Bank of West African States (BCEAO), with seven other members of the West African Monetary Union. In December 2000, Niger qualified for enhanced debt relief under the International Monetary Fund program for Highly Indebted Poor Countries (HIPC) and concluded an agreement with the Fund on a Poverty Reduction and Growth Facility (PRGF). Debt relief provided under the enhanced HIPC initiative significantly reduced Niger's annual debt service obligations, freeing funds for expenditures on basic health care, primary education, HIV/AIDS prevention, rural infrastructure, and other programs geared at poverty reduction. In December 2005, Niger received 100% multilateral debt relief from the IMF, which translated into the forgiveness of approximately US\$86 million in debts to the IMF, excluding the remaining assistance under HIPC. The economy was hurt when the international community cut off non-humanitarian aid in response to TANDJA's moves to extend his term as president. Nearly half of the government's budget is derived from foreign donor resources.

Future growth may be sustained by exploitation of oil, gold, coal, and other mineral resources. The government, however, has made efforts to secure a new three-year extended credit facility with the IMF following the one that completed in 2011. Oil revenue to the government has fallen well short of its budgeted level. Strikes risk undermining political stability. Food security remains a problem in Niger and is exacerbated by refugees from Mali.

TRANSNATIONAL ISSUES

Disputes—International: Libya claims about 25,000 sq km in a currently dormant dispute in the Tommo region; location of Benin-Niger-Nigeria tripoint is unresolved; only Nigeria and Cameroon have heeded the Lake Chad Commission's admonition to ratify the delimitation treaty that also includes the Chad-Niger and Niger-Nigeria boundaries; the dispute with Burkina Faso was referred to the ICJ in 2010

Refugees and internally displaced persons:

refugees (country of origin): 50,000 (Mali) (2013)

IDPs: undetermined (unknown how many of the 11,000 people displaced by clashes between government forces and the Tuareg militant group, Niger Movement for Justice; in 2007 are still displaced; inter-communal violence) (2012)

Trafficking in persons: current situation: Niger is a source, transit, and destination country for children and women trafficked for forced labor and sexual exploitation; caste-based slavery practices, rooted in ancestral master-slave relationships, continue in isolated areas of the country; children are trafficked within Niger for forced begging, forced labor in gold mines, domestic servitude, sexual exploitation, and possibly for forced labor in agriculture and stone quarries; women and children from neighboring states are trafficked to and through Niger for domestic servitude, sexual exploitation, forced labor in mines and on farms; and as mechanics and welders; to a lesser extent, Nigerien women and children are recruited from Niger and transported to Nigeria, North Africa, the Middle East, and Europe for domestic servitude and sex trafficking

tier rating: Tier 2 Watch List—the Government of Niger does not fully comply with the minimum standards for the elimination of trafficking; the government has not shown evidence of increasing efforts to address human trafficking; however, Niger was granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented, would constitute making significant efforts to meet the minimum standards for the elimination of trafficking and is devoting sufficient resources to that plan; during the year, the government took some steps to finalize a national legal framework to combat trafficking and the president spoke publicly about the government's commitment to pursue vigorous law enforcement action against slavery, child prostitution, exploitive child begging, and other forms of human trafficking (2012)

NIGERIA

INTRODUCTION

Background: British influence and control over what would become Nigeria and Africa's most populous country grew through the 19th century. A series of constitutions after World War II granted Nigeria greater autonomy; independence came in 1960. Following nearly 16 years

of military rule, a new constitution was adopted in 1999, and a peaceful transition to civilian government was completed. The government continues to face the daunting task of reforming a petroleum-based economy, whose revenues have been squandered through corruption and mismanagement, and institutionalizing democracy. In addition, Nigeria continues to experience longstanding ethnic and religious tensions. Although both the 2003 and 2007 presidential elections were marred by significant irregularities and violence, Nigeria is currently experiencing its longest period of civilian rule since independence. The general elections of April 2007 marked the first civilian-to-civilian transfer of power in the country's history.

Economy—overview: Oil-rich Nigeria has been hobbled by political instability, corruption, inadequate infrastructure, and poor macroeconomic management, but in 2008 began pursuing economic reforms. Nigeria's former military rulers failed to diversify the economy away from its overdependence on the capital-intensive oil sector, which provides 95% of foreign exchange earnings and about 80% of budgetary revenues. Following the signing of an IMF stand-by agreement in August 2000, Nigeria received a debt-restructuring deal from the Paris Club and a \$1 billion credit from the IMF, both contingent on economic reforms. Nigeria pulled out of its IMF program in April 2002, after failing to meet spending and exchange rate targets, making it ineligible for additional debt forgiveness from the Paris Club. In November 2005, Abuja won Paris Club approval for a debt-relief deal that eliminated \$18 billion of debt in exchange for \$12 billion in payments—a total package worth \$30 billion of Nigeria's total \$37 billion external debt. Since 2008 the government has begun to show the political will to implement the market-oriented reforms urged by the IMF, such as modernizing the banking system, removing subsidies, and resolving regional disputes over the distribution of earnings from the oil industry. GDP rose strongly in 2007-12 because of growth in non-oil sectors and robust global crude oil prices. President JONATHAN has established an economic team that includes experienced and reputable members and has announced plans to increase transparency, diversify economic growth, and improve fiscal

management. Lack of infrastructure and slow implementation of reforms are key impediments to growth. The government is working toward developing stronger public-private partnerships for roads, agriculture, and power. Nigeria's financial sector was hurt by the global financial and economic crises, but the Central Bank governor has taken measures to restructure and strengthen the sector to include imposing mandatory higher minimum capital requirements.

TRANSNATIONAL ISSUES

Disputes—international: Joint Border Commission with Cameroon reviewed 2002 ICJ ruling on the entire boundary and bilaterally resolved differences, including June 2006 Greentree Agreement that immediately cedes sovereignty of the Bakassi Peninsula to Cameroon with a phase-out of Nigerian control within two years while

resolving patriation issues; the ICJ ruled on an equidistance settlement of Cameroon-Equatorial Guinea-Nigeria maritime boundary in the Gulf of Guinea, but imprecisely defined coordinates in the ICJ decision and a sovereignty dispute between Equatorial Guinea and Cameroon over an island at the mouth of the Ntem River all contribute to the delay in implementation; only Nigeria and Cameroon have heeded the Lake Chad Commission's admonition to ratify the delimitation treaty which also includes the Chad-Niger and Niger-Nigeria boundaries; location of Benin-Niger-Nigeria tripoint is unresolved

Refugees and internally displaced persons: refugees (country of origin): 5,299 (Liberia) (2011) IDPs: undetermined (communal violence between Christians and Muslims, political violence; flooding; forced evictions; competition for resources; displacement is mostly short-term) (2012)

Illicit drugs: a transit point for heroin and cocaine intended for European, East Asian, and North American markets; consumer of amphetamines; safe haven for Nigerian narcotraffickers operating worldwide; major money-laundering center; massive corruption and criminal activity; Nigeria has improved some anti-money-laundering controls, resulting in its removal from the Financial Action Task Force's (FATF's) Noncooperative Countries and Territories List in June 2006; Nigeria's anti-money-laundering regime continues to be monitored by FATF

NIUE

INTRODUCTION

Background: Niue's remoteness, as well as cultural and linguistic differences between its Polynesian inhabitants and those of the rest of the Cook Islands, have caused it to be separately administered. The population of the island continues to drop (from a peak of 5,200 in 1966 to an estimated 1,311 in 2011) with substantial emigration to New Zealand 2,400 km to the southwest.

ECONOMY

Economy—overview: The economy suffers from the typical Pacific island problems of geographic

isolation, few resources, and a small population. Government expenditures regularly exceed revenues, and the shortfall is made up by critically needed grants from New Zealand that are used to pay wages to public employees. Niue has cut government expenditures by reducing the public service by almost half. The agricultural sector consists mainly of subsistence gardening, although some cash crops are grown for export. Industry consists primarily of small factories to process passion fruit, lime oil, honey, and coconut cream. The sale of postage stamps to foreign collectors is an important source of revenue. The island in recent years has suffered a serious loss of population because of emigration to New Zealand. Efforts to increase GDP include the promotion of tourism and financial services, although the International Banking Repeal Act of 2002 resulted in the termination of all offshore banking licenses. Economic aid from New Zealand in FY08/09 was US\$5.7 million. Niue suffered a devastating typhoon in January 2004, which decimated nascent economic programs. While in the process of rebuilding, Niue has been dependent on foreign aid.

NORFOLK ISLAND

INTRODUCTION

Background: Two British attempts at establishing the island as a penal colony (1788-1814 and 1825-55) were ultimately abandoned. In 1856, the island was resettled by Pitcairn Islanders,

descendants of the Bounty mutineers and their Tahitian companions.

NORTHERN MARIANA ISLANDS

INTRODUCTION

Background: Under US administration as part of the UN Trust Territory of the Pacific, the people of the Northern Mariana Islands decided in the 1970s not to seek independence but instead to forge closer links with the US. Negotiations for territorial status began in 1972. A covenant to establish a commonwealth in political union with the US was approved in 1975, and came into force on 24 March 1976. A new government and constitution went into effect in 1978.

ECONOMY

Economy—overview: The Northern Mariana Islands' economy benefits substantially from financial assistance from the US. The tourist industry employs approximately a quarter of the work force and accounts for roughly one-fourth of GDP. As a share of total arrivals, the number of Japanese tourists has dropped recently to less than half, while Korean visitors account for roughly one-third. Annual tourist arrivals have remained below 400,000 since 2007. Other services such as trade are also important to the local economy. The small agriculture sector is made up of cattle ranches and small farms producing coconuts, breadfruit, tomatoes, and melons.

NORWAY

INTRODUCTION

Background: Two centuries of Viking raids into Europe tapered off following the adoption of Christianity by King Olav TRYGGVASON in 994. Conversion of the Norwegian kingdom occurred over the next several decades. In 1397, Norway was absorbed into a union with Denmark that lasted more than four centuries. In 1814, Norwegians resisted the cession of their country to Sweden and adopted a new constitution. Sweden then invaded Norway but agreed to let Norway keep its constitution in return for accepting the union under a Swedish king. Rising nationalism throughout the 19th century led to a 1905 referendum granting Norway independence. Although Norway remained neutral in World War I, it suffered heavy losses to its shipping. Norway proclaimed its neutrality at the outset of World War II, but was nonetheless occupied

for five years by Nazi Germany (1940-45). In 1949, neutrality was abandoned and Norway became a member of NATO. Discovery of oil and gas in adjacent waters in the late 1960s boosted Norway's economic fortunes. In referenda held in 1972 and 1994, Norway rejected joining the EU. Key domestic issues include immigration and integration of ethnic minorities, maintaining the country's extensive social safety net with an aging population, and preserving economic competitiveness.

ECONOMY

Economy—overview: The Norwegian economy is a prosperous mixed economy, with a vibrant private sector, a large state sector, and an extensive social safety net. The government controls key areas, such as the vital petroleum sector, through extensive regulation and large-scale state-majority-owned enterprises. The country is richly endowed with natural resources—petroleum, hydropower, fish, forests, and minerals—and is highly dependent on the petroleum sector, which accounts for the largest portion of export revenue and about 20% of government revenue. Norway is the world's third-largest natural gas exporter, and seventh largest oil exporter, making one of its largest offshore oil finds in 2011. Norway opted to stay out of the EU during a referendum in November 1994; nonetheless, as a member of the European Economic Area, it contributes sizably to the EU budget. In anticipation of eventual declines in oil and gas production, Norway saves state revenue from the petroleum sector in the world's second largest sovereign wealth fund, valued at over \$700 billion in January 2013 and uses the fund's return to help finance public expenses. After solid GDP growth in 2004-07, the economy slowed in 2008, and contracted in 2009, before returning to positive growth in 2010-12, however, the government budget is set to remain in surplus.
